## FOREWORD

*Cotton Counts Its Customers* contains annual estimates of the quantities of cotton and competing materials consumed in specified textile products manufactured in the United States. The product list is extensive, but not exhaustive -- a full accounting of fiber consumption is not implied (see Data Limitations later in this text). Each annual edition provides end-use data for the most recent three years. The 1996 edition contains final 1993, revised 1994, and preliminary 1995 end-use consumption data. The report is presented in two sections:

**Section I** summarizes end-use consumption of cotton and competing materials in 92 major product classifications.

**Section II** is a detailed tabulation of statistical data for each end-use item within the major product classifications. Included in this section are: (a) domestic production of each item, (b) total woven fabrics, knitting yarns, and other textile materials consumed in each use, (c) cotton's percentage share of total materials and (d) the quantity of raw cotton consumed in each end use.

### ***Conversion Factors and Methodology***

Ideally, total gray material and raw fiber consumption are calculated on the basis of estimated average weight of all materials -- cotton and other -- in each end use. An estimate of total pounds of gray fabric, yarn, and other materials consumed by end use is utilized. However, there continue to be differences in processing wastes and sizing contents of cotton compared to that of other fibers. To the extent these differences exist, the measure of raw fiber in bales continues to be expressed in "cotton equivalents" rather than in actual volume of all fibers consumed.

### ***End-Use Consumption Versus Mill Consumption***

As in previous editions, end-use estimates of raw cotton consumption do not agree with total mill consumption of cotton for a specified calendar year because:

- Many small uses are not included in the end-use estimates;
- Time lags occur between mill consumption of raw cotton and the conversion of yarns and fabrics into end-use products;
- Inventories of yarns and fabrics vary from one year to another;
- An unknown quantity of spinnable cotton waste included in some end-use products has been calculated as staple cotton; and,
- Imported yarns and fabrics used in products manufactured in the United States are included in this report; exported yarns and fabrics are excluded.

### ***Material Classifications***

**Woven** includes woven textile fabrics consumed in direct competition with conventional nonwoven fabrics, such as nonwoven textiles, plastic film, leather, and paper. In some uses, however, classification detail in column (A) notes exclusion of these competing materials. Woven fabrics are reported in square yards, pounds, and bale equivalents.

**Knits** includes (a) knitted fabrics, reported in square yards, pounds, and bale equivalents, and (b) knitting yarns (for such items as hosiery) are reported only in pounds and bale equivalents.

Despite considerable expansion in classification detail, there remain a few end uses where reliable data are not available for separating knitted items from woven items. In such cases, knitting data are included with woven fabrics, although classification detail has been expanded considerably to minimize such occurrences.

**Other** includes tire cord, tufting yarns, thread, rope, cordage, twine, etc. Volume is expressed in pounds and bale equivalents.

### ***Units of Measure and Abbreviations***

Production estimates are reported in thousands as follows: dozen, dozen pairs, linear yards, square yards, pounds, sets, or units.

The conversions to gray materials required per unit of production are reported in square yards or pounds. Total materials consumed are reported in square yards and/or pounds and in 480 pound net weight bales. Cotton consumed is reported in square yards and/or pounds and in 480 pound net weight bales.

Abbreviations used are:

Doz. -- Dozen

Dz. Pr. -- Dozen Pair

Lyds. -- Linear Yards

Syds -- Square Yards

Lbs. -- Pounds

### ***Explanation of Column Headings***

- Column (A) -- A list of end uses for textile materials.
- Column (B) -- United States production of end-use items.
- Column (C) -- Gray material required per unit of production.
- Column (D) -- Square yards of woven and knitted fabric consumed, including competing materials such as plastic film, leather, and paper (unless product detail in Column (A) notes exclusion). Not all categories will be included in the aggregate due to nonconformity of data.
- Column (E) -- Pounds of all materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (F) -- 480 pound net weight bale equivalents of all materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (G) -- Percentage of total material consumption accounted for by cotton at the raw fiber (bale) level. "Percent Cotton" in this report represents a weighted calculation involving 100% cotton materials plus cotton content of blends and mixtures. Note: Percent cotton for all sub-totals and totals is computed by dividing Column (J) by Column (F).
- Column (H) -- Square yards of gray woven and knitted cotton fabrics consumed in categories included in Column (D). Includes 100% cotton materials plus cotton content of blends and mixtures expressed in square yards.
- Column (I) -- Pounds of cotton materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, tufting yarns, thread, rope, cordage, twine, etc. Includes 100% cotton materials plus cotton content of blends and mixtures.
- Column (J) -- 480 pound net weight bale equivalents of cotton materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, thread, rope, cordage, twine, etc. Includes 100% cotton materials plus cotton content of blends and mixtures.

### ***Acknowledgment***

Statistical data in this report were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many representatives of private companies, trade associations, and government agencies who contributed information are acknowledged with appreciation.

**FOOTNOTES**

- (1) Data in this section are summarized from more detailed calculations in Section II.
- (2) Total material consumption expressed in 480-pound cotton bale equivalents.
- (3) Percentages are calculated from consumption estimates rounded to nearest ten bales (Section II).
- (4) Refer to Foreword for remarks about knit, woven and other tabulations.
- (5) Refer to Foreword for explanation of vertical column headings.
- (6) Includes jogging and tennis shorts.
- (7) For data on lining and pocketing materials, refer to:  
Item 17 - Men's and Boys'  
Item 36 - Women's, Misses', and Juniors'  
Item 52 - Girls', Children's, and Infants'
- (8) Coverage of casual sport coats and suits has been dropped; items, if any are reported in tailored sport coats (Item 2) and dress suits (Item 11).
- (9) Includes ski and down-filled vests.
- (10) Includes light weight uniform jackets.
- (11) Assumes an average size for handkerchiefs.
- (12) Boys' hosiery reported in Item 41.
- (13) Includes boys' work pants.
- (14) Excludes interlining materials.
- (15) Includes outerwear T-shirts.
- (16) Includes sweater vests.
- (17) Includes uniforms.
- (18) Includes jeans made of fabric other than denim.
- (19) Denim only.
- (20) Principally knit, but includes small quantity of woven pile liners.
- (21) Includes T-shirts and tank tops.

- (22) Foundation garments may be 100% woven fabrics, 100% knit fabrics, or a combination thereof; material requirements in Column 'C' are weighted averages reflecting usage of knitting yarns and woven fabrics.
- (23) See Item 41 for women's socks.
- (24) Excludes knit diapers along with diapers and diaper liners made from paper and/or nonwoven fabrics.
- (25) Includes slips, petticoats, half-slips, vests, undershirts, thermal underwear, etc.
- (26) Includes slumber bags and/or zippered comforters made by comforter and quilt manufacturers.
- (27) Excludes materials consumed in the manufacture of ready-made slip covers, reported in Item 65.
- (28) Coated substrate materials consist of knits, wovens and nonwovens.
- (29) Includes knit fabrics consumed as mattress ticking.
- (30) Includes flange, dust cover and backing.
- (31) Nonwoven and knitted fabrics consumed in crib and mattress pad are reported along with woven fabrics.
- (32) Includes sewing supplies, fabrics, patterns, yarn and other needlework accessories. Excludes drapery, upholstery, and slip cover fabrics sold as yard goods.
- (33) Excludes automotive and other transportation carpeting, reported in Item 71.
- (34) Includes small quantity of knit bed sheets and pillowcases.
- (35) Excludes paper and other non-textile substrates.
- (36) Includes ABS, unsupported vinyl and carpeting used in sidewall areas.
- (37) Knit and woven substrate fabrics.
- (38) Includes cotton tire cord and tire cord fabric as well as cotton filling yarns in synthetic tire fabrics.
- (39) Includes original equipment and replacement tops.
- (40) Principally solid woven and stitched belting.
- (41) Also contains small amount of knitted and nonwoven.
- (42) Estimates include cloth, paper, and nonwoven covers for case bound books. Covers for paper and bound news-stand books, work books, pamphlets and related items are excluded. Loose-leaf binders have been dropped from coverage.
- (43) Excludes filling materials as well as absorbent cotton and rayon balls.

- (44) Increased use of staple cotton beginning to take place.
- (45) Includes seam webbing.
- (46) Includes fish nets, lines, and seine twine.
- (47) Data exclude shoe laces and materials consumed in heels and soles.
- (48) Principally leather, but includes a small volume of woven fabrics.
- (49) Average length and girth are assumed; does not include fill.

### **The National Cotton Council**

The National Cotton Council (NCC) is the central organization representing all seven sectors of the U.S. cotton industry; producers, ginner, warehousemen, merchants, cottonseed crushers, cooperatives, and textile manufacturers.

It is a representative body composed of approximately 300 delegates elected through certified state, regional, and national organizations. A majority of elected delegates from each sector must approve all NCC policies, thus assuring unity of purpose and action.

The central goal of NCC is increased consumption and profitability of U.S. cotton, cottonseed, and their products. It seeks that goal through (a) industry representation on matters involving government and (b) diverse programs of domestic and foreign market development, research support, economic analysis, public relations, and technical services.

The cover stock used in this publication was made from recycled paper cuttings. Also, the white pages are recycled and recyclable paper, and printing is in soy inks. The binding adhesive has EPA approval.
