CONSUMPTION OF COTTON AND COMPETING MATERIALS

SECTION I: CONSUMPTION OF COTTON AND COMPETING MATERIALS SUMMARIZED BY MAJOR END USES, REVISED 1994, REVISED 1995, AND PRELIMINARY 1996. (1)

(A) Total Materials Consumed: Thousands of 480 Pound Bales. (2)

(B) Cotton's Percentage Share of the Total Market. (3)

(C) Cotton Consumed: Thousands of 480 Pound Bales.

## FOREWORD

*Cotton Counts Its Customers* contains annual estimates of the quantities of cotton and competing materials consumed in specified textile products manufactured in the United States. The product list is extensive, but not exhaustive -- a full accounting of fiber consumption is not implied (See End-Use Consumption Versus Mill Consumption later in this text). Each annual edition provides end-use data for the most recent three years. The 1997 edition contains final 1994, revised 1995, and preliminary 1996 end-use consumption data. The report is presented in two sections:

**Section I** summarizes end-use consumption of cotton and competing materials in 92 major product classifications.

**Section II** is a detailed tabulation of statistical data for each end-use item within the major product classifications. Included in this section are: (a) domestic production of each item, (b) total woven fabrics, knitting yarns, and other textile materials consumed in each use, (c) cotton's percentage share of total materials and (d) the quantity of raw cotton consumed in each end use.

### ***Conversion Factors and Methodology***

Ideally, total gray material and raw fiber consumption are calculated on the basis of estimated average weight of all materials -- cotton and other -- in each end use. An estimate of total pounds of gray fabric, yarn, and other materials consumed by end use is utilized. However, there continue to be differences in processing wastes and sizing contents of cotton compared to that of other fibers. To the extent that these differences exist, the measure of raw fiber in bales continues to be expressed in "cotton equivalents" rather than actual volume of all fibers consumed.

### ***End-Use Consumption Versus Mill Consumption***

As in previous editions, end-use estimates of raw cotton consumption do not agree with total mill consumption of cotton for a specified calendar year because:

- Many small uses are not included in the end-use estimates;
- Time lags occur between mill consumption of raw cotton and the conversion of yarns and fabric into end-use products;
- Inventories of yarns and fabrics vary from one year to another;
- An unknown quantity of spinnable cotton waste included in some end-use products has been calculated as staple cotton; and,
- Imported yarns and fabrics used in products manufactured in the United States are included in this report; exported yarns and fabrics are excluded.

### **Material Classifications**

**Woven** includes woven textile fabrics consumed in direct competition with nonwoven fabrics, such as nonwoven textiles, plastic film, leather, and paper. In some uses, however, classification detail in column (A) notes exclusion of these competing materials. Woven fabrics are reported in square yards, pounds, and bale equivalents.

**Knits** includes (a) knitted fabrics, reported in square yards, pounds, and bale equivalents, and (b) knitting yarns (for such items as hosiery) are reported only in pounds and bale equivalents.

Despite considerable expansion in classification detail, there remains a few end uses where reliable data are not available for separating knitted items from woven items. In such cases, knitting data are included with woven fabrics, although classification detail has been expanded considerably to minimize such occurrences.

**Other** includes tire cord, tufting yarns, thread, rope, cordage, twine, etc. Volume is expressed in pounds and bale equivalents.

### **Units of Measure and Abbreviations**

Production estimates are reported in thousands as follows: dozen, dozen pairs, linear yard, square yards, pounds, sets, or units.

The conversion to gray materials required per unit of production are reported in square yards or pounds. Total materials consumed are reported in square yards and/or pounds and in 480 pound net weight bales. Cotton consumed is reported in square yards and/or pounds and in 480 pound net weight bales.

Abbreviations used are:

Doz. -- Dozen  
Dz. Pr. -- Dozen Pair  
Lyds. -- Linear Yards

Syds -- Square Yards  
Lbs. -- Pounds

**Explanation of Column Headings**

- Column (A) -- A list of end uses for textile materials.
- Column (B) -- United States production of end-use items.
- Column (C) -- Gray materials required per unit or production
- Column (D) -- Square yards of woven and knitted fabric consumed, including competing materials such as plastic film, leather, and paper (unless product detail in Column (A) notes exclusion). Not all categories will be included in the aggregate due to non-conformity of data.
- Column (E) -- Pounds of all materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (F) -- 480 Pound net weight bale equivalents of all materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (G) -- Percentage of total material consumption accounted for by cotton at the raw fiber (bale) level. "Percent Cotton" in this report represents a weighted calculation involving 100% cotton material plus cotton content of blends and mixtures. Note: Percent cotton for all sub-totals and totals is computed by dividing Column (J) by Column (F).
- Column (H) -- Square yards of gray woven and knitted cotton fabrics consumed in categories included in Column (D). Includes 100% cotton materials plus cotton content of blends and mixtures expressed in square yards.
- Column (I) -- Pounds of cotton materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, tufting yarns, thread, rope, cordage, twine, etc. Includes 100% cotton materials plus cotton content of blends and mixtures.
- Column (J) -- 480 pound net weight bale equivalents of cotton materials consumed in all categories, including woven fabrics, knitted fabrics and yarns, thread, rope, cordage, twine, etc. Includes 100% cotton materials plus cotton content of blends and mixtures.

**Acknowledgment**

Statistical data in this report were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many representatives of private companies, trade associations, and government agencies who contributed information are acknowledged with appreciation.

## **The National Cotton Council**

The National Cotton Council (NCC) is the central organization representing all seven sectors of the U.S. cotton industry; producers, ginners, warehousemen, merchants, cottonseed crushers, cooperatives, and textile manufacturers.

It is a representative body composed of approximately 300 delegates elected through certified state, regional, and national organizations. A majority of elected delegates from each sector must approve all NCC policies, thus assuring unity of purpose and action.

The central goal of NCC is increased consumption and profitability of U.S. cotton, cottonseed, and their products. It seeks that goal through (a) industry representation on matters involving government and (b) diverse programs of domestic and foreign market development, research support, economic analysis, public relations, and technical services.

The cover stock used in the publication was made from recycled paper cuttings. Also, the white pages are recycled and recyclable paper and printing is in soy inks. The binding adhesive has EPA approval.
