FOREWORD

This edition of "Cotton Counts Its Customers" contains preliminary 1964 end-use consumption estimates for cotton and competing materials measured at both the gray fabric or yarn and raw fiber levels.

Consumption data reflect fiber and material usage in consumer products manufactured in the United States during the calendar year 1964. Most end-use estimates are comparable with those shown in previous editions of this report; however, recent trade information and preliminary data from the "1963 Census of Manufactures" indicate that end-use estimates for some items in previous editions of this report are not completely comparable with 1964 figures. End uses in which non-comparability is considered significant are indicated by an asterick (*).

Section I of this report presents: a) a summary of cotton consumption by major end uses, and cotton's percentage share of the total market in terms of raw cotton equivalents; and b) an array of end uses by the quantity of cotton consumed.

Section II reports specific end uses within each major use. It contains detailed estimates of: a) domestic production of end-use items; b) equivalent cotton materials required per unit of production; c) end-use consumption of total materials in terms of cotton equivalents; d) percent of the market accounted for by cotton; and e) end-use consumption of cotton materials.

Total end-use estimates of raw cotton consumption generally differ from total mill consumption of raw cotton during the same calendar year primarily because:

- (a) many small uses are not included in the end-use estimates;
- (b) time lags occur between mill consumption of raw cotton and conversion of yarns and fabrics into final end-use products;
- (c) estimates of materials consumed are based on "typical" cotton yarns and fabrics, and not on actual tabulations of every construction used;
- (d) some end products included in this report contain an unknown quantity of spinnable cotton waste;
- (e) end products fabricated in the United States from imported yarns and fabrics are included in this report; exports of yarns and fabrics, as such, are excluded.

A special edition of "Cotton Counts Its Customers" scheduled for distribution in January, 1966, will contain revised production and consumption

detail for the 1957-1964 period and a listing of typical cotton yarns and fabrics utilized in major end-use products.

Data pertaining to 1964 exports and imports of chiefly cotton textile products, omitted from this issue, will be reported in the special edition.

Statistics in this edition were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many private company representatives, trade associations, and government agencies who contributed information for use in this publication are acknowledged with appreciation.

FOOTNOTES, SECTION I

- 1/ Cotton's estimated percentage share of total fibers and materials consumed in terms of cotton equivalents.
- 2/ Domestic mill consumption of raw cotton differs from total bale consumption on an end-use basis for reasons stated in the Foreword. Mill consumption is based on data reported in "Cotton Situation," March, 1965; published by Economic Research Service, United States Department of Agriculture.
- * Not completely comparable with estimates reported in previous editions of this publication. A revised series of comparable data for the years 1957-1964 will be shown in a special edition of "Cotton Counts Its Customers" scheduled for distribution in January, 1966. See Section II for additional 1964 end-use detail.

SECTION II: ESTIMATED END-USE CONSUMPTION OF COTTON AND COMPETING MATERIALS

Estimated production of end-use items and quantities of cotton and competing materials utilized in making end products during the calendar year 1964 are presented in this section. Measurements of total materials consumed are in terms of cotton equivalents; i.e., the total quantity of cotton which would have been required if cotton had accounted for all materials consumed. Consumption estimates, measured at both the gray fabric or yarn and raw fiber levels, relate only to items included in this report and do not represent total domestic consumption of cotton or competing materials.

The 1964 production of end-use items were converted into cotton equivalents on the basis of data reported in Section III of the 1958 Special Edition of "Cotton Counts Its Customers," with revisions where necessary to adjust for changes in fabric weight and width, and for material requirements per unit of production. All estimates of materials consumed are based on "typical" cotton constructions and not on a tabulation of the exact quantity of every construction utilized, since such data are not available.

Materials included in this report are classified by principal construction:

Woven Fabrics — Includes woven textile fabrics and other materials such as non-woven textiles, plastic film, leather, and paper which are consumed in direct competition with conventional woven fabrics. In some uses, however, product classification detail notes the exclusion of these competing materials.

Knitting Yarns and Other Textile Materials — Includes knitting yarns, tufting yarns, thread, cordage and twine, mattress felts, comforter batting, and a small quantity of non-textile materials which are not directly competitive with conventional woven fabrics. Separate consumption data for "knitting yarns" and "other textile materials" are summarized in table form on page 35. For individual end uses, knitting yarn consumption can be determined by referring to product classification detail shown in Column (a).

Units of Measure and Abbreviations

Production estimates are reported in thousands of units as follows: dozens, dozen pairs, linear yards, pairs, pounds, square yards, or units.

The quantity of equivalent gray cotton materials required per unit of production is reported in square yards or pounds. Materials consumed are reported in square yards and/or pounds, and 500-pound gross weight bales.

Abbreviations used are: (a) Doz. - Dozens; (b) Doz. Pr. - Dozen Pairs; (c) Lyds. - Linear Yards; (d) Lbs. - Pounds; and (e) Syds. - Square Yards.

Explanation of Column Headings

- Column (a) — A list of major end uses of textile materials.
- Column (b) — United States production of textile end-use items.
- Column (c) — Equivalent gray cotton materials required per unit of production.
- Column (d) — Total consumption of woven fabrics—including materials consumed in direct competition with woven fabrics unless otherwise specified—expressed in equivalent square yards of gray cotton fabrics.
- Column (e) — Yardage reported in Column (d) converted into equivalent pounds of gray cotton fabrics.
- Column (f) — Total consumption of (1) knitting yarns, and (2) filling materials, thread, tufting yarn, etc., expressed in equivalent pounds of gray cotton materials. Separate consumption data for "knitting yarns" and "other textile materials" are summarized on page 35.
- Column (g) — Grand total, all materials consumed—Column (e) plus Column (f)—expressed in equivalent pounds of gray cotton materials.
- Column (h) — Grand total, all materials consumed, expressed in equivalent 500-pound gross weight bales of raw cotton. Estimate includes an allowance for bagging and ties.
- Column (i) — Percentage of total material consumption accounted for by cotton, computed at the raw fiber level.
- Column (j) — Cotton yardage consumed, expressed in square yards of gray woven fabrics. Yardage includes (1) 100% cotton fabrics; and (2) cotton content of blended fabrics, expressed in square yards.
- Column (k) — Cotton yardage reported in Column (j) converted into pounds of woven fabrics.
- Column (l) — Total cotton consumed in (1) knitting yarns, and (2) filling materials, thread, tufting yarns, etc., expressed in pounds of gray cotton materials. Separate consumption data for cotton "knitting yarns" and "other textile materials" are summarized on page 35.
- Column (m) — Grand total, cotton materials consumed—Column (k) plus Column (l)—expressed in pounds of gray cotton materials.
- Column (n) — Grand total, cotton materials consumed, expressed in equivalent 500-pound gross weight bales of raw cotton. Estimate includes an allowance for bagging and ties.

SECTION III: ESTIMATED END USE CONSUMPTION OF COTTON AND COMPETING MATERIALS
1964 PRELIMINARY

End Use (a)	Units Produced 1/ (b)	Equivalent Grey Cotton Material Required Per Unit (c)	TOTAL MATERIALS CONSUMED: COTTON EQUIVALENTS 2/ Grey Woven Fabrics, Knitting Yarns, and Other Materials			COTTON MATERIALS CONSUMED Grey Woven Fabrics, Knitting Yarns, and Other Materials			Total Raw Cotton (500-Lb. FOOTNOTES - SECTION II

- 1/ Sources of production estimates are "1958 Census of Manufactures," "1963 Census of Manufactures - preliminary reports," "Annual Survey of Manufactures," 1958-1962, and "Current Industrial Reports," 1963-1964, Industry Division, United States Bureau of the Census; "Federal Reserve Bulletin," Board of Governors of the Federal Reserve System; and trade information.
- 2/ End use estimates include non-textile materials unless otherwise indicated. For further explanation refer to discussion of materials consumed in the introduction to Section II.
- 3/ See explanation of column (f) and column (1) in the introduction to Section II; also see table following footnotes on this page.
- 4/ An unknown quantity of leather coats are included with leather jackets.
- 5/ Knitting yarn data include leather on a cotton equivalent basis.
- 6/ Based on data from "Hosiery Statistics," 1964, National Association of Hosiery Manufacturers; and trade information. Women's, misses' and juniors' anklets and crew socks are reported with girls', children's, and infants' hosiery.
- 7/ Classification detail conforms with detail reported in United States Department of Commerce, Current Industrial Reports, Series M2M, "Apparel Survey Supplement - 1962, Raincoats and Raincoats."
- 8/ Conversion factors are based on estimated production ratios of: (a) long-sleeve to short-sleeve, and (b) regular to wash-wear finished shirts. Note: Conversion factors for knit dress shirts are based on equivalent woven cotton fabric requirements.
- 9/ Yarnage requirements are based on one-trouser suits without vests.
- 10/ Includes rental supply and individually purchased garments. Women's uniforms include an unknown quantity of knit garments.
- 11/ Excludes lining material. "Suit-price dresses" include an unknown quantity of knit dresses made in suit-and-sweat shops. "Knit dresses, suits, and skirts" represents garments made in knitting mills only.
- 12/ Includes an unknown quantity of knit garments. Excludes lining material unless shown separately in product classification detail.
- 13/ It is estimated that 4 percent of women's and 20 percent of children's plastic raincoats are fully lined with textile materials.
- 14/ Children's turtled robes included with women's.
- 15/ Excludes (a) knit diapers and (b) diapers and diaper liners made from paper and/or non-woven fabrics.
- 16/ Includes an unknown quantity of thermal blankets produced in blanket mills.
- 17/ Principally Hottingsham lace and lace products; excludes apparel-type lace.
- 18/ Yarnage reported in column (b) represents finished fabric.
- 19/ Excludes automobile and other transportation carpeting which is reported separately in Item 7.
- 20/ Based on data reported by The Thread Institute.
- 21/ Cotton materials consumed in automobile seatcovers and lining and upholstery are primarily coated fabrics. Materials shown as woven fabrics also include non-textiles.
- 22/ Includes an unknown quantity of woven tire cord fabric.
- 23/ Aving, tent, and tarpaulin classifications include an unknown quantity of "other canvas products."
- 24/ Based on data from Textile Bag Manufacturers Association. Multi-wall paper bags expressed in terms of equivalent cotton yardage.
- 25/ Based on data from National Industrial Leather Association.
- 26/ Materials consumed in book bindings include (a) cloth bound books and (b) paper bound books except news-stand types, workbooks, pamphlets, and related items.
- 27/ Based on data from Carpet Manufacturers Association of America.
- 28/ Hose classification is under investigation for possible overstatement of textile content.
- 29/ Based on data from "1963 Census of Manufactures" and thread sales reported by The Thread Institute.
- 30/ Includes a small quantity of woven fabric.
- 31/ Materials 12 inches or less in width (principally narrow fabrics) converted to square yards.
- 32/ Production estimates relate to annual requirements for all materials in terms of cotton equivalents.
- 33/ Includes an unknown quantity of knit fabric.
- 34/ Based on mail bag procurement by the United States Post Office Department.
- 35/ Based on data from National Shoe Manufacturers Association, Inc.; "1963 Census of Manufactures"; "Manufacturers' Opinions of Cotton and Leather in Shoes," Agricultural Marketing Service, United States Department of Agriculture; and trade information.
- 36/ Includes correct laces.
- 37/ Classification includes athletic uniforms, inflated balls, striking bags, golf bags, body protectors, and bases. Estimate based on data from Athletic Goods Manufacturers Association and trade information.
- 38/ Production reported by Census Bureau as "36/37 inch soft filled osaburgs for industrial wiping fabrics;" figures are believed to include a quantity of fabric consumed in uses other than wiping cloths.
- 39/ Not completely comparable with estimates reported in previous editions of this publication. A revised series of comparable data for the years 1957-1964 will be shown in a special edition of "Cotton Counts Its Customers" scheduled for distribution in January, 1966.

Separate Consumption Data for "Knitting Yarns" and "Other Textile Materials"

	Total Materials (1,000 lbs.)		Cotton Materials (1,000 lbs.)
