FOREWORD

This edition of "Cotton Counts Its Customers" contains revised estimates of cotton consumption by end uses for the calendar year 1957 and preliminary estimates for the year 1958. End use classifications are comparable to those reported in the Special Edition of "Cotton Counts Its Customers", except for a few changes which are indicated by footnotes.

Section I of this edition summarizes by major uses: (A) cotton consumption, and (B) cotton's share of the total market in terms of raw cotton equivalents. Summary data for the years 1955 and 1956 are also included in Section I for comparison with estimates for 1957 and 1958. Estimates for years prior to 1955 are reported in the Special Edition of "Cotton Counts Its Customers".

Section II lists the specific end uses within each major use. For each end use it contains detailed information on unit production, percent of the market held by cotton, estimated quantity of raw cotton consumed, and the approximate number of pounds of raw cotton required to produce one end use unit.

Estimates in this edition are based on data compiled by the staff of the market research section of the National Cotton Council from published statistics and information from government agencies, trade associations and private companies — supplemented by information and estimates from many private companies and individuals. All estimates of cotton consumption relate to the volume of raw cotton required to produce that quantity of a given article which was manufactured in its final form in the United States during the calendar year.

Domestic consumption of cotton in some of the smaller end uses and United States exports of fabric and yarn are not included in this publication. Domestic production of consumer products for export, covered by the end use classifications in this report, are included in the consumption estimates.

The interest and cooperation of the many individuals in private companies, trade associations, and government agencies who contributed information for use in this publication is acknowledged with appreciation.

FOOTNOTES, SECTION I

- 1/ Estimated ratio of cotton fiber to total fibers and materials consumed, in terms of cotton equivalents.
- 2/ Revised from data published in "Cotton Counts Its Customers", Special Edition, because of correction in conversion factors used for men's and boys' undershirts, 1955 and 1956. NOTE: Cotton's percentage share for men's and boys' apparel total lowered from 73% to 72% for 1956.
- 3/ Omitted because of insufficient data on consumption of competing materials in certain industrial uses. For percent of market held by cotton in most industrial uses, see detailed breakdown on industrial uses, Section II.
- * Represents only cotton's share of the market. Sufficient data not available to estimate total market, 1955 and 1956.

SECTION II: UNIT PRODUCTION, PERCENT OF MARKET HELD BY COTTON, COTTON CONSUMPTION BY USES,
AND EQUIVALENT RAW COTTON REQUIRED PER UNIT, 1957 Revised and 1958 Preliminary

Statistics on unit production, percent of the market held by cotton, estimated quantity of cotton consumed in each market, and the number of pounds of raw cotton required to produce one unit are presented below. As a result of space limitations, the complete statistical tabulations for each use and sub-use have not been presented. If the reader is interested in the tabulations, they may be reproduced by the following steps:

- a. Unit production multiplied by number of pounds of raw cotton required to produce one unit equals total market for all materials in terms of raw cotton equivalent pounds;
- b. Total market in terms of raw cotton equivalent pounds divided by 500 equals total market for all materials in terms of raw cotton equivalent bales;
- c. Total market for all materials in terms of raw cotton equivalent (pounds or bales) multiplied by percent of the market held by cotton equals estimated quantity of cotton consumed (pounds or bales). **NOTE:** To facilitate tabulating, all bale estimates have been rounded to the nearest ten bales.

Insofar as possible, production data were obtained from Facts For Industry reports of the Bureau of the Census, United States Department of Commerce; and from information published by trade or industry organizations. Where such information was inadequate, supplementary data were obtained from industry representatives and private companies.

Conversion factors are based on data reported in Cotton Counts Its Customers, Special Edition, with revisions where necessary to adjust for changes in fabric and/or yarn requirements per unit, and changes in fabric widths and weights. Revised conversion factors were based on information obtained from trade sources and from data reported in Bureau of the Census, Facts For Industry, Series M22T, "Cotton Broad Woven Fabric, Average Width and Weight, 1939 - First Quarter 1958".

It is not the purpose of this report to show the consumption of materials other than cotton; however, the quantity of competing materials consumed in terms of cotton equivalents, can be determined from the percentage of the market held by cotton.

Comments, additional data, and suggestions for improving future editions of this publication will be appreciated.

FOOTNOTES, SECTION II

- 1/ Sources of production estimates are United States Bureau of the Census, "Census of Manufactures", 1954; and "Facts For Industry", 1957-1958; United States Department of Commerce, "Survey of Current Business", 1957-1958; Board of Governors of the Federal Reserve System, "Federal Reserve Bulletin", 1956-1958; and trade information unless otherwise indicated.
- 2/ Estimated ratio of cotton fiber to total fibers and materials consumed in terms of cotton equivalents.
- 3/ Estimated equivalent raw cotton consumption in terms of 500-pound gross weight bales.
- 4/ Based on data reported in National Association of Hosiery Manufacturers, "Condensed Hosiery Statistics", 1957-1958. Classifications by type of hosiery are not strictly comparable to those in "Cotton Counts Its Customers", Special Edition, due to classification changes in "Condensed Hosiery Statistics".
- 5/ Includes men's walk shorts.
- 6/ Includes girls' and teenage girls', and children's tufted robes.
- 7/ To compensate for shorter lengths in coats, dresses, and skirts, raw cotton equivalents for 1958 are revised as follows:

	Lbs. Per Doz.
Women's, Misses', & Juniors'	
Coats	49.15
Unit-price dresses	11.27
Dozen-price dresses	16.00
Knit - dresses, suits, & skirts	15.23
Woven skirts	10.41
Woven suits	29.18
Girls' & Teenage Girls'	
Coats	31.18
Dresses	8.31
Skirts	6.83

- 8/ Girls' and teenage girls', and children's tufted robes are included with women's, misses', and juniors' tufted robes in item 17.
- 9/ Excludes diapers and diaper liners made from paper and/or non-woven fabrics.
- 10/ Classifications revised from those appearing in "Cotton Counts Its Customers", Special Edition, to conform with product classifications as reported by Bureau of the Census in "Facts For Industry".
- 11/ Raw cotton equivalent for 1958 is .55 pounds per linear yard.
- 12/ Based on Bureau of the Census, "Census of Manufactures", 1954, and data published by the American Carpet Institute.
- 13/ Based on data from the Thread Institute.
- 14/ Excludes synthetic fiber used to reinforce selvage and decorative metallic thread.
- 15/ Based on data from Buff and Polishing Wheel Manufacturers Association, Inc.
- 16/ Estimated total equivalent linear yardage, cotton, burlap, and multi-wall paper. NOTE: Cotton and burlap yardage based on data reported by the Textile Bag Manufacturers Association; paper estimated in terms of equivalent cotton yardage on the basis of trade information.
- 17/ Estimate for "leather transmission" based on data from National Industrial Leather Association.
- 18/ Based on data from Casket Manufacturers Association of America.
- 19/ Based on procurement of mail bags by the United States Post Office Department.
- 20/ Based on data from the Bureau of the Census, "Facts For Industry", M68A; and data from National Shoe Manufacturers Association, Inc.
- 21/ Based on data from the Athletic Goods Manufacturers Association.
