FOREWORD

"Cotton Counts Its Customers" is a statistical report containing measurements of the quantities of cotton and competing materials consumed in major textile products manufactured in the United States. All data in this report are presented on a calendar-year basis. Annual editions provide end-use data for the most recent three years; special editions are published at periodic intervals to revise data for a series of years and to present supplementary information on conversion factors and typical cotton materials consumed. The most recent special edition, published in February 1973 contains data for the years 1965-71.

This annual edition contains revised 1973, revised 1974, and preliminary 1975 end-use consumption data. The report is presented in two sections:

Section I summarizes end-use consumption of cotton and competing materials in 91 major product classifications;

Section II is a detailed tabulation of statistical data for each end-use item within the major product classifications. Included in this section are: (a) domestic production of each item; (b) total woven fabrics, knitting yarns, and other textile materials consumed in each use; (c) cotton's percentage share of total materials; and (d) the quantity of gray and raw cotton consumed in each end use.

Conversion Factors and Methodology

Beginning with the February 1973 Special Edition of "Cotton Counts Its Customers," a change was effected in the method of calculating the "cotton equivalent" of competing materials. The new methodology and the reasons for incorporating it were discussed in the introductions to major sections of that report.

Prior to the change, the "cotton equivalent" of competing materials was calculated on the basis of typical cotton materials in use -- or conventional cotton materials which might be used in competition with other materials -- with allowances for differences in use-life, style, and strength-to-bulk ratios. Effective with the February 1973 Special Edition, total gray material and raw fiber consumption are calculated on the basis of estimated average weight of all materials -- cotton and other -- in each end use.

The result of the change is an estimate of total gray fabric, yarn, and other materials utilized, not in terms of "cotton equivalents," but in terms of actual pounds of all materials consumed. However, there continue to be differences in processing wastes and sizing contents of cotton and its principal natural and man-made competitors. To the extent these differences exist, the measure of raw fiber in bales continues to be expressed in "cotton equivalents" rather than in actual volume of all fibers consumed.

Except in instances where considerable shifts have occurred since 1971 in material requirements per unit and/or average weight of fabrics, conversion factors presented in Section IV of the February 1973 Special Edition of "Cotton Counts Its Customers" also are used in this edition.

Comparability

Individual end-use estimates in this issue are comparable with those reported in the February 1973 Special Edition unless otherwise annotated. It should be noted, however, that lining and pocketing, previously tabulated with appropriate end-use items, now are shown as separate end uses at the end of men's, women's, and children's apparel sections.

Grand totals and sub-totals for apparel, home furnishings, and industrial end uses are not comparable with those published in the February 1973 Special Edition because of the addition of some women's and children's apparel linings and pocketings not previously included in the deletion of the following items from end-use coverage*:

Men's, Boys', & Women's Leather Coats & Jackets	Caskets
Men's, Women's, & Children's Dress Gloves	Flags
All-leather Work Gloves	Electrical Insulation
Men's, Women's & Children's Plastic & Rubberized Rainwear	Laundry & Dry Cleaning
Men's & Boys' Shirt Interlinings	Mail Bags
Shower Curtains	Meat Stockinettes
Automobile Replacement Seat Covers	Twisted Paper, Jute, & Hard
Automobile Laces & Bindings	Fiber Rope, Cordage, & Twine
Automobile Head Rests	Saturated Woven Fabrics
Loose-Leaf Binder Materials	Shoe Laces & Waterproof Footwear
	Miscellaneous Sporting Equipment
	Gummed Tapes
	Tracing Cloth

End-Use Consumption versus Mill Consumption

As in previous editions, end-use estimates of raw cotton consumption do not necessarily agree with total mill consumption of cotton for a specified calendar year because:

- a) Many small uses are not included in the end-use estimates;
- b) Time lags occur between mill consumption of raw cotton and the conversion of yarns and fabrics into end-use products;
- c) Inventories of yarns and fabrics vary from one year to another;

* Dropping these items reduces "Cotton Counts Its Customers" end-use coverage by approximately 1%.

- d) An unknown quantity of spinnable cotton waste included in some end-use products has been calculated as staple cotton; and,
- e) Imported yarns and fabrics used in products manufactured in the United States are included in this report; exported yarns and fabrics are excluded.

Acknowledgment

Statistical data in this report were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many representatives of private companies, trade associations, and government agencies who contributed information are acknowledged with appreciation.

- 1/ Data in this section are summarized from more detailed calculations in Section II. Bale figures for individual end uses and sub-totals may not add exactly to totals shown because of independent rounding.
- 2/ Total material consumption expressed in 480 pound cotton bale equivalents. Refer to Conversion Factor and Methodology section of Foreword for explanation of the term "cotton equivalent."
- 3/ Percentages are calculated from consumption estimates rounded to nearest ten bales (Section II).
- 4/ Refer to Foreword for notes on comparability of totals and subtotals with those published previously.
- 5/ See footnote on this item in Section II for information relating to comparability with previously published estimates.
- * Less than five hundred bales.

SECTION II: ESTIMATED END-USE CONSUMPTION OF COTTON AND COMPETING MATERIALS

Introduction

Estimated domestic production of end-use items and quantities of woven fabrics, knitted fabrics and yarns, and other textile materials utilized in making end products during the calendar years 1973, 1974, and 1975 are presented in this section.

Comparability

Individual end-use estimates in this issue are comparable with those reported in the February 1973 Special Edition unless otherwise annotated. Readers are referred to comparability notes in the Foreword for information relating to additions, deletions, and realignment of end uses, all of which affect comparability of totals and sub-totals in this edition with those previously published.

Format Changes

As compared with the February 1973 Special Edition, this report incorporates a number of changes in style and format of presentation, resulting in a more concise arrangement of data, while providing users with more detail - especially for knitted fabrics.

Vertical columns have been reduced from 14 to 10, eliminating separate columns for tabulating pounds of "woven fabrics" and pounds of "knitting yarns and other textile materials." Instead, knitted, woven, and other materials are now labeled as such in Column (A) and poundage for all three is tabulated in Column (E).

Material Classifications

Woven -- Includes woven textile fabrics and other materials which are consumed in direct competition with conventional woven fabrics, such as nonwoven textiles, plastic film, leather, and paper. In some uses, however, classification detail in Column (A) notes exclusion of these competing materials. In some cases, figures shown in the woven fabric column still include a small quantity of knitted fabrics, although classification detail has been expanded considerably to minimize such occurrences. Woven fabrics are reported in square yards, pounds, and bale equivalents.

Knit -- Includes (a) knitted fabrics, reported in square yards, pounds, and bale equivalents, and (b) knitting yarns (for such items as hosiery) reported only in pounds and bale equivalents. Despite considerable expansion in classification detail, there remain a few end uses where reliable data are not available for separating knitted items from woven items. In such cases, knitting data are included with woven fabrics.

Other -- Includes tire cord, tufting yarns, thread, rope, cordage, twine, etc. Volume is expressed in pounds and bale equivalents.

Units of Measure and Abbreviations

Production estimates are reported in thousands of units as follows: dozen, dozen pairs, linear yards, square yards, pounds, sets, or units.

The quantity of gray materials required per unit of production is reported in square yards or pounds. Total materials consumed are reported in square yards and/or pounds and in 480 pound net weight bales.

Abbreviations used are:

Doz. - Dozen	Syds. - Square Yards
Doz. Pr. - Dozen Pair	Lbs. - Pounds
Lyds. - Linear Yards	

Explanation of Column Headings

- Column (A) -- A list of end uses for textile materials.
- Column (B) -- United States production of end-use items.
- Column (C) -- Gray materials required per unit of production.
- Column (D) -- Square yards of woven and knitted fabrics consumed -- including competing materials such as plastic film, leather, and paper, unless product detail in Column (A) notes exclusion.
- Column (E) -- Pounds of all materials consumed -- including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (F) -- 480 pound net weight bale equivalents of all materials consumed -- including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (G) -- Percentage of total material consumption accounted for by cotton at the raw fiber (bale) level. "Percent Cotton" in this report represents a weighted calculation involving (1) 100% cotton materials plus (2) cotton content of blends and mixtures. Note: Percent cotton for all sub-totals and totals is computed by dividing Column (J) by Column (F).
- Column (H) -- Square yards of gray woven and knitted cotton fabrics consumed. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures expressed in square yards.

Column (I) -- Pounds of cotton materials consumed -- including woven fabrics, knitted fabrics and yarns, tufting yarns, thread, rope, cordage, twine, etc. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures.

Column (J) -- 480 pound net weight bale equivalents of cotton materials consumed -- including woven fabrics, knitted fabrics and yarns, thread, rope, cordage, twine, etc. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures.

FOOTNOTES, SECTION II

- 1/ Unless otherwise annotated, estimates are based on statistics published by the Industry Division, Bureau of the Census, United States Department of Commerce, and/or information provided by manufacturers of textiles and textile products. During Spring 1976, when estimates were made, Final 1972 Census of Manufactures data were reviewed and taken into consideration, along with other available information, in making end-use estimates.
- 2/ Refer to Foreword and Introduction to Section II for notes on comparability with previously published data and for explanation of vertical column headings.
- 3/ Refer to Foreword for (a) notes on comparability of totals and sub-totals with those published previously, and (b) remarks about knit, woven, and other tabulations.
- 4/ Includes a small volume of tufting yarns consumed in the manufacture of women's robes.
- 5/ For total data on lining and pocketing materials, previously tabulated as components of appropriate end uses, refer to:
Item 17 - Men's & Boys'
Item 35 - Women's, Misses', & Juniors'
Item 51 - Girls', Children's, & Infants'
- 6/ Men's, women's, and children's dress and semi-dress gloves and mittens, previously a part of this end use, have been dropped from coverage.
- 7/ Includes basic fabric and wrist and cuff, perviously reported separately.
- 8/ Includes backing, lining, palm, and safety cuff previously reported separately. Leather content is tabulated as "woven" fabric.
- 9/ Estimates are based on data reported in the Final 1972 Census of Manufactures and on trade information. These estimates are believed comparable to previous series.
- 10/ Boys' hosiery reported in Item 40.
- 11/ Boys' bib overalls are reported with boys' dungarees, Item 14. See Item 17 for pocketing materials.

- 12/ Excludes interlining materials.
- 13/ Production estimates herein are based on October 1975 edition of Current Industrial Reports, Series MA-23A, "Apparel Survey" and monthly cutting data from Current Industrial Report, Series M23B. As compared with experience reported to Council staff by selected cutters, these data reflect disproportionate share of market in dress trousers as opposed to jeans and jean-cut trousers.
- 14/ Information from Bureau of Census indicates that production data reported in 1974 "Apparel Survey" is incorrect. Further, correct data will not be available until the 1975 "Apparel Survey" is released, probably later this year. Reported data are used pending Census revisions.
- 15/ Principally knit, but includes small quantity of woven pile liners.
- 16/ Estimates of percent cotton in the February 1973 Special Edition of "Cotton Counts Its Customers" were overstated and, hence, not comparable to subsequent estimates, including those in this report.
- 17/ Foundation garments may be 100% woven fabrics, 100% knit fabrics, or a combination thereof; material requirements in Column (C) are weighted averages reflecting usage of knitting yarns and woven fabrics rather than square yards of pounds of materials required per dozen "knit" or "woven" garments.
- 18/ Beginning with the 1975 edition of "Cotton Counts Its Customers," girls' and children's sheer anklets, knee and full length hosiery and panty-hose were included in Item 23. Previously these items and women's sheer anklets and knee length hose were reported in Item 40.
- 19/ Estimates are based on data reported in the Final 1972 Census of Manufactures and trade information. Previous estimates, beginning with the 1974 edition of "Cotton Counts Its Customers," may not be comparable.
- 20/ Includes estimated volume of all lining and pocketing materials consumed in Women's, Misses', & Juniors' Apparel. Consequently new totals are substantially above cumulative totals previously reported for coats, jackets, rainwear, and suits only.
- 21/ Excludes (a) flannel diapers, (b) knit diapers, and (c) diapers and diaper liners made from paper and/or nonwoven fabrics.
- 22/ Includes estimated volume of all lining and pocketing materials consumed in Girls', Children's, & Infants' Apparel. Consequently, new totals are substantially above cumulative totals reported in editions of "Cotton Counts Its Customers" prior to the July 1973 edition.
- 23/ Nonwovens and a small volume of knits used as backing fabrics for quilted bedspreads are tabulated as woven fabrics.
- 24/ Includes slumber bags and/or zippered comforters made by comforter and quilt manufacturers.
- 25/ Excludes materials consumed in the manufacture of ready-made slip covers, reported in Item 64.
- 26/ Excludes pillow ticking, reported in Item 60.
- 27/ Nonwoven and knitted fabrics consumed in crib and mattress pads are reported with woven fabrics.
- 28/ Estimate revised on basis of Final 1972 Census figures. Previously reported estimates for 1968-1972 are not comparable.
- 29/ Excludes drapery, upholstery, and slip cover fabrics sold at retail as yard goods. The figure "1.16 Syd." reported in Column (C) reflects area change from gray to finished fabric.
- 30/ Excludes automotive and other transportation carpeting, reported in Item 70.
- 31/ Excludes paper and other non-textile substrates.
- 32/ Includes ABS, unsupported vinyl, and carpeting used in sidewall areas.
- 33/ Includes cotton tire cord and tire cord fabric as well as cotton filling yarns in synthetic tire fabrics.
- 34/ Includes original equipment and replacement tops.
- 35/ Estimates for 1971, as reported in June 1974 and February 1973 editions of this publication, were overstated by approximately 10%.
- 36/ Based on data from Textile Bag Manufacturers Association and trade information.
- 37/ Principally solid woven and stitched belting.
- 38/ Production estimates for years 1965-70, as reported in February 1973 Special Edition of "Cotton Counts Its Customers," were overstated by approximately 25%. Cotton volume for same years is believed correct as reported.
- 39/ Estimate includes cloth, paper, and nonwoven covers for case bound books. Covers for paper bound news-stand books, work books, pamphlets, and related items are excluded. Loose-leaf binders have been dropped from coverage.
- 40/ Excludes (a) filling materials and (b) absorbent cotton and rayon balls.
- 41/ Includes fish nets, lines, and seine twine.
- 42/ Based on data from American Footwear Industries Association and trade information. Data exclude shoe laces and materials consumed in heels and soles.
- 43/ Principally leather, but includes a small volume of woven fabrics.
- 44/ Production estimates for 1971-1975 are revised. Estimates for 1968-1970, as reported in the February 1973 Special Edition, may be slightly understated.
- 45/ Gummed tape, previously included in this classification, has been dropped from coverage. Classification includes woven paper, plastic, and nonwoven substrates.
- 46/ Production estimates for 1972-1975 are revised on basis of trade data and are not comparable with previously reported data.
- 47/ Production estimates for 1972-1975 are revised on the basis of trade data. Previously reported estimates are understated.

THE NATIONAL COTTON COUNCIL

The National Cotton Council is the central organization representing the millions of people who make up the American cotton industry.

It is a representative body composed of some 282 delegates selected by the nation's cotton farmers, ginners, warehousemen, merchants, cottonseed crushers, cotton cooperatives, and textile manufacturers through their own state, regional, or national organizations.

Each branch of the cotton industry has an equal voice in the National Cotton Council. Each of the seven branches, voting separately, must approve every recommendation by a majority, thus assuring unity of purpose and action.

The central goal of the National Cotton Council is to increase the consumption of American cotton, cottonseed, and their products, both at home and abroad. It seeks that goal through programs of research, public relations, and industry representation on matters involving government.
