## FOREWORD

"Cotton Counts Its Customers" is a statistical report containing measurements of the quantities of cotton and competing materials consumed in major textile products manufactured in the United States. All data in this report are presented on a calendar-year basis. Annual editions provide end-use data for the most recent three years; special editions are published at periodic intervals to revise data for a series of years and to present supplementary information on conversion factors and typical cotton materials consumed. The most recent special edition, published in February 1973, contains data for the years 1965-1971.

This annual edition contains revised 1978, revised 1979, and preliminary 1980 end-use consumption data. The report is presented in two sections:

Section I summarizes end-use consumption of cotton and competing materials in 91 major product classifications;

Section II is a detailed tabulation of statistical data for each end-use item within the major product classifications. Included in this section are: (a) domestic production of each item; (b) total woven fabrics, knitting yarns, and other textile materials consumed in each use; (c) cotton's percentage share of total materials; and (d) the quantity of gray and raw cotton consumed in each end use.

Note that this edition utilizes a revised end-use format. These changes have been made to conform with revisions in reports published by the Industry Division, Bureau of the Census, United States Department of Commerce.

### Conversion Factors and Methodology

Beginning with the February 1973 Special Edition of "Cotton Counts Its Customers," a change was effected in the method of calculating the "cotton equivalent" of competing materials. The new methodology and the reasons for incorporating it were discussed in the introductions to major sections of that report.

Prior to the change, the "cotton equivalent" of competing materials was calculated on the basis of typical cotton materials in use -- or conventional cotton materials which might be used in competition with other materials -- with allowances for differences in use-life, style, and strength-to-bulk ratios. Effective with the February 1973 Special Edition, total gray material and raw fiber consumption are calculated on the basis of estimated average weight of all materials -- cotton and other -- in each end use.

The result of the change is an estimate of total gray fabric, yarn, and other materials utilized, not in terms of "cotton equivalents," but in terms of actual pounds of all materials consumed. However, there continue to be differences in processing wastes and sizing contents of cotton and its principal natural and man-made competitors. To the extent these differences exist, the measure of raw fiber in bales continues to be expressed in "cotton equivalents" rather than in actual volume of all fibers consumed.

Except in instances where considerable shifts have occurred since 1971 in material requirements per unit and/or average weight of fabrics, conversion factors presented in Section IV of the February 1973 Special Edition of "Cotton Counts Its Customers" also are used in this edition.

### Comparability

Individual end-use estimates in this issue are comparable with those reported in the February 1973 Special Edition unless otherwise annotated. It should be noted, however, that lining and pocketing, previously tabulated with appropriate end-use items, now are shown as separate end uses at the end of men's, women's, and children's apparel sections.

Grand totals and sub-totals for apparel, home furnishings, and industrial end uses are not comparable with those published in the February 1973 Special Edition because of the addition of some women's and children's apparel linings and pocketings not previously included and the deletion of the following items from end-use coverage\*:

Men's, Boys', & Women's Leather Coats & Jackets	Caskets
Men's, Women's & Children's Dress Gloves	Flags
All-leather Work Gloves	Electrical Insulation
Men's, Women's, & Children's Plastic & Rubberized Rainwear	Laundry & Dry Cleaning Materials
Men's & Boys' Shirt Interlinings	Mail Bags
Shower Curtains	Meat Stockinettes
Automobile Replacement Seat Covers	Twisted Paper, Jute, & Hard Fiber Rope, Cordage, & Twine
Automobile Laces & Bindings	Saturated Woven Fabrics
Automobile Head Rests	Shoe Laces & Waterproof Footwear
Loose-Leaf Binder Materials	Miscellaneous Sporting Equipment
	Gummed Tapes
	Tracing Cloth

### End-Use Consumption versus Mill Consumption

As in previous editions, end-use estimates of raw cotton consumption do not necessarily agree with total mill consumption of cotton for a specified calendar year because:

- a) Many small uses are not included in the end-use estimates;
- b) Time lags occur between mill consumption of raw cotton and the conversion of yarns and fabrics into end-use products;
- c) Inventories of yarns and fabrics vary from one year to another;

\* Dropping these items reduces "Cotton Counts Its Customers" end-use coverage by approximately 1%.

- d) An unknown quantity of spinnable cotton waste included in some end-use products has been calculated as staple cotton; and,
- e) Imported yarns and fabrics used in products manufactured in the United States are included in this report; exported yarns and fabrics are excluded.

#### Acknowledgment

Statistical data in this report were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many representatives of private companies, trade associations, and government agencies who contributed information are acknowledged with appreciation.

1/ Data in this section are summarized from more detailed calculations in Section II. Bale figures for individual end uses and sub-totals may not add exactly to totals shown because of independent rounding.

2/ Total material consumption expressed in 480 pound cotton bale equivalents. Refer to Conversion Factor and Methodology section of Foreword for explanation of term "cotton equivalent."

3/ Percentages are calculated from consumption estimates rounded to nearest ten bales (Section II).

4/ Refer to Foreword for notes on comparability of totals and sub-totals with those published previously.

5/ See footnote on this item in Section II for information relating to comparability with previously published estimates.

\* Less than .5%.

+ Less than 500 bales.

## SECTION II: ESTIMATED END-USE CONSUMPTION OF COTTON AND COMPETING MATERIALS

### Introduction

Estimated domestic production of end-use items and quantities of woven fabrics, knitted fabrics and yarns, and other textile materials utilized in making end products during the calendar years 1978, 1979, and 1980 are presented in this section.

### Comparability

Individual end-use estimates in this issue are comparable with those reported in the February 1973 Special Edition unless otherwise annotated. Readers are referred to comparability notes in the Foreword for information relating to additions, deletions, and realignment of end uses, all of which affect comparability of totals and sub-totals in this edition with those previously published.

### Format Changes

As compared with the February 1973 Special Edition, this report incorporates a number of changes in style and format of presentation, resulting in a more concise arrangement of data, while providing users with more detail -- especially for knitted fabrics.

Vertical columns have been reduced from 14 to 10, eliminating separate columns for tabulating pounds of "woven fabrics" and pounds of "knitting yarns and other textile materials." Instead, knitted, woven, and other materials are now labeled as such in Column (A), and poundage for all three is tabulated in Column (E).

### Material Classifications

Woven -- Includes woven textile fabrics and other materials which are consumed in direct competition with conventional woven fabrics, such as nonwoven textiles, plastic film, leather, and paper. In some uses, however, classification detail in Column (A) notes exclusion of these competing materials. In some cases, figures shown in the woven fabric column still include a small quantity of knitted fabrics, although classification detail has been expanded considerably to minimize such occurrences. Woven fabrics are reported in square yards, pounds, and bale equivalents.

Knit -- Includes (a) knitted fabrics, reported in square yards, pounds, and bale equivalents, and (b) knitting yarns (for such items as hosiery) reported only in pounds and bale equivalents. Despite considerable expansion in classification detail, there remain a few end uses where reliable data are not available for separating knitted items from woven items. In such cases, knitting data are included with woven fabrics.

Other -- Includes tire cord, tufting yarns, thread, rope, cordage, twine, etc. Volume is expressed in pounds and bale equivalents.

#### Units of Measure and Abbreviations

Production estimates are reported in thousands of units as follows: dozen, dozen pairs, linear yards, square yards, pounds, sets, or units.

The quantity of gray materials required per unit of production is reported in square yards or pounds. Total materials consumed are reported in square yards and/or pounds and in 480 pound net weight bales.

Abbreviations used are:

Doz. - Dozen	Syds. - Square Yards
Doz. Pr. - Dozen Pair	Lbs. - Pounds
Lyds. - Linear Yards	

#### Explanation of Column Headings

- Column (A) -- A list of end uses for textile materials.
- Column (B) -- United States production of end-use items.
- Column (C) -- Gray materials required per unit of production.
- Column (D) -- Square yards of woven and knitted fabrics consumed -- including competing materials such as plastic film, leather, and paper, unless product detail in Column (A) notes exclusion.
- Column (E) -- Pounds of all materials consumed -- including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (F) -- 480 pound net weight bale equivalents of all materials consumed -- including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (G) -- Percentage of total material consumption accounted for by cotton at the raw fiber (bale) level. "Percent Cotton" in this report represents a weighted calculation involving (1) 100% cotton materials plus (2) cotton content of blends and mixtures. Note: Percent cotton for all sub-totals and totals is computed by dividing Column (J) by Column (F).
- Column (H) -- Square yards of gray woven and knitted cotton fabrics consumed. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures expressed in square yards.

Column (I) -- Pounds of cotton materials consumed -- including woven fabrics, knitted fabrics and yarns, tufting yarns, thread, rope, cordage, twine, etc. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures.

Column (J) -- 480 pound net weight bale equivalents of cotton materials consumed -- including woven fabrics, knitted fabrics and yarns, thread, rope, cordage, twine, etc. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures.

- (1) Unless otherwise annotated, estimates are based on statistics published by the Industry Division, Bureau of the Census, United States Department of Commerce, and/or information provided by manufacturers of textiles and textile products.
- (2) Refer to Foreword and Introduction to Section II for notes on comparability with previously published data and for explanation of vertical column headings.
- (3) Refer to Foreword for (a) notes on comparability of totals and subtotals with those published previously, and (b) remarks about knit, woven and other tabulations.
- (4) Includes a small volume of tufting yarns consumed in the manufacture of women's robes.
- (5) Includes jogging and tennis shorts (Item 1). Women's, misses', and juniors' shorts (Item 18) also includes tennis skirts.
- (6) For data on lining and pocketing materials, refer to:-  
 Item 17 - Men's & Boys'  
 Item 36 - Women's, Misses' & Juniors'  
 Item 52 - Girls', Children's & Infants'
- (7) Production estimates herein are based on the 1980 edition of Current Industrial Reports, Series MA-23A, "Apparel Survey." Data prior to 1975 may not be comparable due to lack of full coverage of leisure coats (Item 2) and suits (Item 11).
- (8) Includes ski jackets.
- (9) Includes light weight uniform jackets.
- (10) Production estimates are based on data reported in the final 1972 Census of Manufactures and on trade information. These estimates are believed comparable to previous series.
- (11) Boys' hosiery reported in Item 41.
- (12) Includes boys' work pants.
- (13) Excludes interlining materials.
- (14) Includes outerwear T-shirts.
- (15) Includes sweater vests.
- (16) Includes uniform.
- (17) Includes jeans made of fabric other than denim.
- (18) Denim only.
- (19) Principally knit, but includes small quantity of woven pile liners.
- (20) Estimates of percent cotton in the February 1973 Special Edition of "Cotton Counts Its Customers" were overstated and, hence, not comparable to subsequent estimates, including those in this report.
- (21) Production estimates reflect knit/woven relationship reported in the "Apparel Survey." Estimates prior to 1975 were adjusted to show a larger quantity of fake fur (knitted) basic fabrics which were believed to have been misreported as woven fabric garments in "Apparel Survey" reports.
- (22) The 1980 edition of Current Industrial Reports, Series MA-23A, "Apparel Survey", contains a sizeable revision in the 1978 knit/woven production relationship for dresses. Census did not revise earlier estimates. Knit/woven relationships in prior years may not be comparable with 1978-1980 data herein.
- (23) Foundation garments may be 100% woven fabrics, 100% knit fabrics, or a combination thereof; material requirements in Column (C) are weighted averages reflecting usage of knitting yarns and woven fabrics rather than square yards or pounds of materials required per dozen "knit" or "woven" garments.
- (24) See Item 41 for women's anklets and knee length hosiery.
- (25) Separately priced coordinates are reported in their respective end-use.
- (26) Totals are substantially above cumulative totals for individual items reported in "Cotton Counts Its Customers" prior to the July 1973 edition.
- (27) Excludes (a) flannel diapers, (b) knit diapers, and (c) diapers and diaper liners made from paper and/or nonwoven fabrics.
- (28) Includes slips, petticoats, half-slips, vests, undershirts, thermal underwear, etc.
- (29) Includes quilted bedspreads.
- (30) Production estimates have been revised on basis of final 1977 Census of Manufactures, MC77-1-23E, received October 1980.
- (31) Includes slumber bags and/or zippered comforters made by comforter and quilt manufacturers.
- (32) Excludes materials consumed in the manufacture of ready-made slip covers, reported in Item 65.
- (33) Coated substrate materials consist of knits, wovens and nonwovens.
- (34) Excludes pillow ticking, reported in Item 61.
- (35) Includes flange, dust cover and backing.

- (36) Furniture pads, previously reported, have been dropped from coverage.
- (37) Nonwoven and knitted fabrics consumed in crib and mattress pads are reported with woven fabrics.
- (38) Production estimates revised on basis of Final 1972 & 1977 Census figures. Previously reported estimates for 1968-1972 are not comparable.
- (39) Excludes drapery, upholstery, and slip cover fabrics sold at retail as yard goods. The figure "1.16 syd." reported in Column (C) reflects area change from gray to finished fabric.
- (40) Excludes automotive and other transportation carpeting, reported in Item 71.
- (41) Includes small quantity of knit bed sheets and pillow-cases.
- (42) Estimates of unit production and cotton's share prior to 1977 may be overstated.
- (43) Excludes paper and other non-textile substrates.
- (44) Includes ABS, unsupported vinyl, and carpeting used in sidewall areas.
- (45) Knit and woven substrate fabrics.
- (46) Includes cotton tire cord and tire cord fabric as well as cotton filling yarns in synthetic tire fabrics.
- (47) Includes original equipment and replacement tops.
- (48) Principally solid woven and stitched belting.
- (49) Production estimates for years 1965-1970, as reported in February 1973 Special Edition of "Cotton Counts Its Customers," were overstated by approximately 25%. Cotton volume for same years is believed correct as reported.
- (50) Estimates include cloth, paper, and nonwoven covers for case bound books. Covers for paper bound news-stand books, work books, pamphlets, and related items are excluded. Loose-leaf binders have been dropped from coverage.
- (51) Excludes (a) filling materials and (b) absorbent cotton and rayon balls.
- (52) May include a small but undetermined quantity of staple cotton.
- (53) Estimates of unit production and cotton's share prior to 1977 may be overstated. Revised estimates are available on request. Subsequent estimates are based on revised information.
- (54) Includes fish nets, lines, and seine twine.
- (55) Production estimates are based on data from American Footwear Industries Association and trade information. Data exclude shoe laces and materials consumed in heels and soles.
- (56) Principally leather, but includes a small volume of woven fabrics.
- (57) Production estimates for 1968-70, as reported in the February 1973 Special Edition, may be slightly understated. Subsequent estimates are based on revised information.

\* Less than .5 percent.

## **THE NATIONAL COTTON COUNCIL**

The National Cotton Council is the central organization of the American cotton industry.

It is a representative body composed of some 290 delegates selected by the nation's cotton farmers, ginners, warehousemen, merchants, cottonseed crushers, cotton cooperatives, and textile manufacturers through their own state, regional, or national organizations.

Each branch of the cotton industry has an equal voice in the National Cotton Council. Each of the seven branches, voting separately, must approve every recommendation by a majority, thus assuring unity of purpose and action.

The central goal of the National Cotton Council is to improve the economic and social wellbeing of the people of the U. S. cotton industry. It seeks that goal through programs of economic and market research, export promotion, public relations, and industry representation on matters involving government.
