FOREWORD

Cotton Counts Its Customers contains annual estimates of the quantities of cotton and competing materials consumed in specified textile products manufactured in the United States. The product list is extensive, but not exhaustive -- a full accounting of fiber consumption is not implied (see Data Limitations later in this text.)

Each annual edition provides end-use data for the most recent three years; special editions present revised data for a series of years along with supplementary information on conversion factors and typical cotton materials consumed. The most recent special edition, published in February 1973, contains data for the years 1965-1971.

The 1995 edition contains revised 1992, revised 1993, and preliminary 1994 end-use consumption data. The report is presented in two sections:

Section I summarizes end-use consumption of cotton and competing materials in 92 major product classifications;

Section II is a detailed tabulation of statistical data for each end-use item within the major product classifications. Included in this section are: (a) domestic production of each item; (b) total woven fabrics, knitting yarns, and other textile materials consumed in each use; (c) cotton's percentage share of total materials; and (d) the quantity of gray and raw cotton consumed in each end use.

Note: This edition utilizes a revised end-use format. These changes have been made to conform with revisions in reports published by the Industry Division, Bureau of the Census, United States Department of Commerce.

Conversion Factors and Methodology

Beginning with the February 1973 Special Edition of *Cotton Counts Its Customers*, a change was effected in the method of calculating the "cotton equivalent" of competing materials. The methodology and the reasons for incorporating it were discussed in the introductions to major sections of that report.

Prior to the change, the "cotton equivalent" of competing materials was calculated on the basis of typical cotton materials in use -- or conventional cotton materials which might be used in competition with other materials -- with allowances for differences in use-life, style, and strength-to-bulk ratios. Effective with the February 1973 Special Edition, total gray material and raw fiber consumption are calculated on the basis of estimated average weight of all materials -- cotton and other -- in each end use.

The result of the change is an estimate of total gray fabric, yarn, and other materials utilized, not in terms of "cotton equivalents" but in terms of actual pounds of all materials consumed. However, there continue to be differences in processing wastes and sizing contents of cotton and its principal natural and man-made competitors. To the extent these differences exist, the measure of raw fiber in bales continues to be expressed in "cotton equivalents" rather than in actual volume of all fibers consumed.

Except in instances where considerable shifts have occurred since 1971 in material requirements per unit and/or average weight of fabrics, conversion factors presented in Section IV of the February 1973 Special Edition of *Cotton Counts Its Customers* also are used in this edition.

Comparability

Individual end-use estimates in this issue are comparable with those reported in the February 1973 Special Edition unless otherwise annotated. It should be noted, however, that lining and pocketing, previously tabulated with appropriate end-use items, now are shown as separate end uses at the end of men's, women's, and children's apparel sections.

Grand totals and sub-totals for apparel, home furnishings, and industrial uses are not comparable with those published in the February 1973 Special Edition because of the addition of some women's and children's apparel linings and pocketings not previously included and the deletion of the following items from end-use coverage:

Men's, Boys', & Women's	Caskets
Leather Coats & Jackets	Flags
Men's, Women's & Children's	Electrical Insulation
Dress Gloves	Laundry & Dry Cleaning Materials
All-leather Work Gloves	Mail Bags
Men's, Women's, & Children's	Meat Stockinettes
Plastic & Rubberized Rainwear	Twisted paper, Jute & Hard
Men's & Boys' Shirt Interlinings	Fiber Rope, Cordage, & Twine
Shower Curtains	Saturated Woven Fabrics
Automobile Replacement Seat Covers	Shoe Laces & Waterproof Footwear
Automobile Laces & Bindings	Miscellaneous Sporting Equipment
Automobile Head Rests	Gummed Tapes
Loose-leaf Binder Materials	Tracing Cloth

Dropping these items reduces *Cotton Counts Its Customers* end-use coverage by approximately 1%.

End-Use Consumption Versus Mill Consumption

As in previous editions, end-use estimates of raw cotton consumption do not agree with total mill consumption of cotton for a specified calendar year because:

- a) Many small uses are not included in the end-use estimates;
- b) Time lags occur between mill consumption of raw cotton and the conversion of yarns and fabrics into end-use products;
- c) Inventories of yarns and fabrics vary from one year to another;
- d) An unknown quantity of spinnable cotton waste included in some end-use products has been calculated as staple cotton; and,
- e) Imported yarns and fabrics used in products manufactured in the United States are included in this report; exported yarns and fabrics are excluded.

Acknowledgement

Statistical data in this report were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many representatives of private companies, trade associations, and government agencies who contributed information are acknowledged with appreciation.

SECTION II : ESTIMATED END-USE CONSUMPTION OF COTTON AND COMPETING MATERIALS

Introduction

Estimated domestic production of end-use items and quantities of woven fabrics, knitted fabrics and yarns, and other textile materials utilized in making end products during the calendar years 1991, 1992, and 1993 are presented in this section.

Comparability

Individual end-use estimates in this issue are comparable with those reported in the February 1973 Special Edition unless otherwise annotated. Readers are referred to comparability notes in the Foreword for information relating to additions, deletions, and realignment of end uses, all of which affect comparability of totals and sub-totals in this edition with those previously published.

Format Changes

As compared with the February 1973 Special Edition, this report incorporates a number of changes in style and format of presentation, resulting in a more concise arrangement of data, while providing users with more detail -- especially for knitted fabrics.

Vertical columns have been reduced from 14 to 10, eliminating separate columns for tabulating pounds of "woven fabrics" and pounds of "knitting yarns and other textile materials." Instead, knitted, woven, and other materials are now labeled as such in Column (A), and poundage for all three is tabulated in Column (E).

Material Classifications

Woven -- Includes woven textile fabrics and other materials which are consumed in direct competition with conventional woven fabrics, such as nonwoven textiles, plastic film, leather, and paper. In some uses, however, classification detail in Column (A) notes exclusion of these competing materials. In some cases, figures shown in the woven fabric column still include a small quantity of knitted fabrics, although classification detail has been expanded considerably to minimize such occurrences. Woven fabrics are reported in square yards, pounds, and bale equivalents.

Knit -- Includes (a) knitted fabrics, reported in square yards, pounds, and bale equivalents, and (b) knitting yarns (for such items as hosiery) reported only in pounds and bale equivalents. Despite considerable expansion in classification detail, there remain a few end uses where reliable data are not available for separating knitted items from woven items. In such cases, knitting data are included with woven fabrics.

Other -- Includes tire cord, tufting yarns, thread, rope, cordage, twine, etc. Volume is expressed in pounds and bale equivalents.

Units of Measure and Abbreviations

Production estimates are reported in thousands of units as follows: dozen, dozen pairs, linear yards, square yards, pounds, sets, or units.

The quantity of gray materials required per unit of production is reported

in square yards or pounds. Total materials consumed are reported in square yards and/or pounds and in 480 pound net weight bales.

Abbreviations used are:

Doz. -- Dozen	Syds. - Square Yards
Dz. Pr. - Dozen Pair	Lbs. - Pounds
Lyds. - Linear Yards	

Explanation of Column Headings

- Column (A) -- A list of end uses for textile materials.
- Column (B) -- United States production of end-use items.
- Column (C) -- Gray materials required per unit of production.
- Column (D) -- Square yards of woven and knitted fabric consumed including competing materials such as plastic film, leather, and paper, unless product detail in Column (A) notes exclusion.
- Column (E) -- Pounds of all materials consumed -- including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (F) -- 480 pound net weight bale equivalents of all materials consumed including woven fabrics, knitted fabrics and yarns, and other textile materials.
- Column (G) -- Percentage of total material consumption accounted for by cotton at the raw fiber (bale) level. "Percent Cotton" in this report represents a weighted calculation involving (1) 100% cotton materials plus (2) cotton content of blends and mixtures. Note: Percent cotton for all sub-totals and totals is computed by dividing Column (J) by Column (F).
- Column (H) -- Square yards of gray woven and knitted cotton fabrics consumed. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures expressed in square yards.
- Column (I) -- Pounds of cotton materials consumed including woven fabrics, knitted fabrics and yarns, tufting yarns, thread, rope, cordage, twine, etc. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures.
- Column (J) -- 480 pound net weight bale equivalents of cotton materials consumed including woven fabrics, knitted fabrics and yarns, thread, rope, cordage, twine, etc. Includes (1) 100% cotton materials plus (2) cotton content of blends and mixtures.

FOOTNOTES, Sections I and II

Unless otherwise annotated, estimates are based on statistics published by the Industry Division, Bureau of the Census, United States Department of Commerce, and/or information provided by manufacturers of textiles and textile products.

- (1) Data in this section are summarized from more detailed calculations in Section II. Bale figures for individual end uses and sub-totals may not add exactly to totals shown because of independent rounding.
- (2) Total material consumption expressed in 480 pound cotton bale equivalents. Refer to Conversion Factor and Methodology section of Foreword for explanation of term "cotton equivalent".
- (3) Percentages are calculated from consumption estimates rounded to nearest ten bales (Section II).
- (4) Refer to Foreword for (a) notes on comparability of totals and sub-totals with those published previously, and (b) remarks about knit, woven and other tabulations.
- (5) Refer to Foreword and Introduction to Section II for notes on comparability with previously published data and for explanation of vertical column headings.
- (6) Includes jogging and tennis shorts (Item 1).
- (7) For data on lining and pocketing materials, refer to:
Item 17 - Men's & Boys'
Item 36 - Women's, Misses' & Juniors'
Item 52 - Girls', Children's & Infants'
- (8) Coverage of casual sport coats (item 2) and suits (item 11) has been dropped; items, if any, are reported in tailored sport coats (2) and dress suits (11).
- (9) Includes ski jackets.
- (10) Includes light weight uniform jackets.
- (11) Production estimates are based on data reported in the final 1982 Census of Manufactures (men's - data not available in the 1987 final) and the 1987 final Census of Manufactures (women's).
- (12) Boys' hosiery reported in Item 41.
- (13) Includes boys' work pants.
- (14) Excludes interlining materials.
- (15) Includes outerwear T-shirts.
- (16) Includes sweater vests.
- (17) Includes uniform.
- (18) Includes jeans made of fabric other than denim.
- (19) Denim only.
- (20) Principally knit, but includes small quantity of woven pile liners.
- (21) Estimates of percent cotton in the February 1973 Special Edition of *Cotton Counts Its Customers* were overstated and, hence, not comparable to

subsequent estimates, including those in this report.

- (22) Foundation garments may be 100% woven fabrics, 100% knit fabrics, or a combination thereof; material requirements in Column (C) are weighted averages reflecting usage of knitting yarns and woven fabrics.
- (23) See Item 41 for women's socks.
- (24) Excludes knit diapers, diapers and diaper liners made from paper and/or nonwoven fabrics.
- (25) Includes slips, petticoats, half-slips, vests, undershirts, thermal underwear, etc.
- (26) Includes slumber bags and/or zippered comforters made by comforter and quilt manufacturers.
- (27) Excludes materials consumed in the manufacture of ready-made slip covers, reported in Item 65.
- (28) Coated substrate materials consist of knits, wovens and nonwovens.
- (29) Excludes pillow ticking, reported in Item 61. Includes knit fabrics consumed as mattress ticking.
- (30) Includes flange, dust cover and backing.
- (31) Nonwoven and knitted fabrics consumed in crib and mattress pads are reported with woven fabrics.
- (32) Excludes drapery, upholstery, and slip cover fabrics sold at retail as yard goods. The figure "1.07 syd." reported in Column (C) reflects area change from gray to finished fabric.
- (33) Excludes automotive and other transportation carpeting, reported in Item 71.
- (34) Includes small quantity of knit bed sheets and pillowcases.
- (35) Excludes paper and other non-textile substrates.
- (36) Includes ABS, unsupported vinyl, and carpeting used in sidewall areas.
- (37) Knit and woven substrate fabrics.
- (38) Includes cotton tire cord and tire cord fabric as well as cotton filling yarns in synthetic tire fabrics.
- (39) Includes original equipment and replacement tops.
- (40) Principally solid woven and stitched belting.
- (41) Production estimates for years 1965-1971, as reported in February 1973 Special Edition of *Cotton Counts Its Customers* were overstated by approximately 25%. Cotton volume for same years is believed correct as reported.
- (42) Estimates include cloth, paper, and nonwoven covers for case bound books. Covers for paper and bound news-stand books, work books, pamphlets, and related items are excluded. Loose-leaf binders have been dropped from coverage.
- (43) Excludes (a) filling materials and (b) absorbent cotton and rayon balls.

- (44) Small quantity of staple cotton believed used.
- (45) Estimates of unit production and cotton's share prior to 1977 may be overstated. Subsequent estimates are based on revised information.
- (46) Includes fish nets, lines, and seine twine.
- (47) Data exclude shoe laces and materials consumed in heels and soles.
- (48) Principally leather, but includes a small volume of woven fabrics.
- (49) Production estimates for 1968-1970, as reported in the February 1973 Special Edition, may be slightly understated. Subsequent estimates are based on revised information.

* -- Less than 0.5 percent.
+ -- Less than 500 bales.

The National Cotton Council

The National Cotton Council (NCC) is the central organization representing all seven sectors of the U.S. cotton industry; producers, ginner, warehousemen, merchants, cottonseed crushers, cooperatives, and textile manufacturers.

It is a representative body composed of approximately 300 delegates elected through certified state, regional, and national organizations. A majority of elected delegates from each sector must approve all NCC policies, thus assuring unity of purpose and action.

The central goal of NCC is increased consumption and profitability of U.S. cotton, cottonseed, and their products. It seeks that goal through (a) industry representation on matters involving government and (b) diverse programs of domestic and foreign market development, research support, economic analysis, public relations, and technical services.

The cover stock used in this publication was made from recycled denim cuttings. Also, the white pages are recycled and recyclable paper, and printing is in soy inks. The binding adhesive has EPA approval.
