NATURAL FIBERS ECONOMIC RESEARCH 1/<br>The University of Texas<br>P.O. Box 8180, University Station<br>Austin, Texas 78712<br>Cost of Merchandising Cotton in Texas<br>1975-76 Season<br>Summary Report 2/

The average merchandising cost for Texas shippers selling cotton to domestic and foreign outlets combined was $\$ 37.59$ per bale for the 1975-76 season. When examined with comparable data for the 1969-70 season, this represented an increase of $\$ 13.87$ per bale during this interval.

All cost items except tare increased during the period, but transportation costs (especially ocean freight) had the largest average increase, amounting to $\$ 4.80$ per bale. Interest and exchange increased the next largest amount, averaging $\$ 2.59$ per bale more. Other warehouse services had the third largest average increase for the period, coming to $\$ 1.37$ per bale.

When broken down into domestic and foreign outlets, the average cost to merchandise a bale of cotton to the two domestic outlets combined was $\$ 26.38$ for the $1975-76$ season. This was an increase of $\$ 10.46$ per bale over the 1969-70 season for cotton shipped to the same areas. Transportation, with an increase of $\$ 2.13$ per bale, accounted for the largest share, followed closely by interest and exchange with an increase of $\$ 2.08$ per bale. The item having the third largest increase was other warehouse services at $\$ 1.64$ per bale.

The average cost to merchandise a bale of cotton to the two foreign outlets combined was $\$ 48.80$ per bale for the 1975-76 season. This represented an increase of $\$ 17.28$ per bale over the 1969-70 season for cotton going to the same markets. On foreign shipments, transportation had by far the largest increase, a jump of $\$ 12.26$ per bale over the 1969-70 season. Of this \$12.26 increase, ocean freight accounted for most of it at \$ll. 36 per bale, while domestic freight increased only $\$ .90$ per bale. Interest and exchange again had the second largest increase, coming to $\$ 3.10$ per bale. Selling expenses at $\$ 1.36$ per bale had the third largest increase. Tare, on the other hand, decreased during the period by $\$ 4.49$ per bale, which resulted primarily from the shift to net weight trading.
