Participate in related student organizations and seek leadership positions.
Work on the student newspaper to gain experience for agricultural communication positions.
Develop physical stamina, resourcefulness, and outdoor skills for some informal education positions.
Be willing to relocate.

GENERAL INFORMATION
• Agricultural Science provides a broad background for working in the agricultural and natural resources industry.
• For entry-level positions, a bachelor’s degree is sufficient. A master’s or doctoral degree is often necessary for advancement. Some federal and private agency work, consulting positions, and especially research positions require a graduate degree.
• Teacher certification is required for public school teaching and varies by state.
• Observe volunteer, part-time, summer, internship, or co-op experience in field of study.
• Develop excellent computer skills.
• Join a student club or student professional association to network and cultivate related academic interests.
• Conduct informational interviews or shadow professionals who have jobs that interest you.

Prepared by the Career Planning staff of Career Services at The University of Tennessee, Knoxville. (2006)
