# GEOGRAPHY

## What can I do with this degree?

### AREAS

**ENVIRONMENTAL GEOGRAPHY**

*Environmental geographers are concerned with how human beings use the earth and impact the environment.*

- Environmental Management
- Conservation
- Waste Management
- Environmental Regulation
- Emergency Management
- Outdoor Recreation Management

**CULTURAL & HUMAN GEOGRAPHY**

*Cultural and human geographers study the aspects of geography that relate to different cultures. They especially focus on cultural origins and movement and the cultural characteristics of regions.*

- Cultural Resources
- Historic Preservation
- Historical Consultation
- Community Development/Redevelopment
- Education
- Research

### EMPLOYERS

**ENVIRONMENTAL GEOGRAPHY**

- Federal and state government: Environmental Protection Agency, Departments of Agriculture, National Forest Service, National Park Service
- Real estate developers
- Scientific and research groups
- Waste management companies
- Chemical companies
- Firms specializing in forestry, mining, environmental issues, or surveying
- Law firms

**CULTURAL & HUMAN GEOGRAPHY**

- State, regional, and local government
- Peace Corps
- Real estate developers
- Companies dealing with insurance, transportation, communications, and international trade
- Scientific and research groups
- Museums

### STRATEGIES

**ENVIRONMENTAL GEOGRAPHY**

- Become skilled in related computer technology.
- Take biology and chemistry courses for environmental management positions.
- Take electives in plant science, forestry and wildlife management for careers in recreation and forestry management.
- Join environmental organizations on campus and in your community.
- Seek environmental-related experience through internships, summer or part-time jobs.
- Learn federal government job application process.
- Earn a law degree for work areas such as environmental law and policy.

**CULTURAL & HUMAN GEOGRAPHY**

- Develop an open mind towards the language, history, customs, and culture of other countries.
- Learn how to conduct library research, make field observations, and interpret artifacts.
- Learn a foreign language for field observations in other countries.
- Participate in cross-cultural groups and organizations.
- Develop excellent communication and teamwork skills in order to work with historians and archivists in recreating the geography of the past.
- Obtain related experience in your area of interest through volunteer or paid positions including internships.
- Become skilled in related computer technology.
- Learn federal, state, and local government job application process.
**GEOGRAPHIC TECHNOLOGY**

*Geographers utilize a variety of technologies to generate maps, store, analyze and interpret map information.*

- Cartography
- Geographic Information Systems
- Remote Sensing

**STRAATEGIES**

Federal government agencies: Departments of Defense, Interior, Commerce, Agriculture, and State, Defense Mapping, National Aeronautics and Space Administration, Central Intelligence Agency

State and regional government agencies: Departments of Transportation or Agriculture

Private industry including telephone, utilities, construction, engineering, energy, environmental planning, and consulting firms

Map publishers

Mapping software companies

Colleges and universities

Take courses in surveying and measurements, photogrammetry, computer systems, database management, technical mathematics, drafting, statistics, optics, remote sensing, art, graphics.

Learn to be detail-oriented.

Gain experience reading maps and interpreting data sources including geological surveys and satellite images.

Seek related experience, such as a part-time job or internship, to develop technical skills.

Investigate federal, state, and local government job application process.

**PLANNING**

*Planners ensure that communities develop in an orderly way and that they have the services necessary to support them.*

- City/Regional Planning
- Housing Development
- Convention/Tourism
- Community Development
- Demography
- Transportation
- Waste Management
- Conservation

City, county, and regional planning agencies

Local and state government

Federal government agencies including: Agency for International Development, World Bank, Department of Housing and Urban Development

Research organizations

Private business

Banks

Industrial firms

Public utilities

Architecture firms

Real estate developers

Develop team work and communication skills.

Participate in student government.

Take courses in public administration or public finance.

Observe city/county advisory meetings.

Seek internship or work experience in a local government office, as they are a large employer in this area.

Learn federal, state, and local government job application process.

Obtain master's degree in planning.

Earn a dual degree in planning and law.

Research the certified planning credential obtained through the American Institute of Certified Planners.

GEOGRAPHIC EDUCATION CONTINUED

• Bachelor's degree qualifies you for entry-level positions in government and industry.
• Master's degree qualifies you for community college teaching and advancement in industry and government.
• Ph.D. is required for research and teaching positions in colleges and universities and senior positions in government and industry.
• Geography provides a broad foundation for future career endeavors.
• Obtain volunteer, part-time, summer, internship, or co-op experience in your area of interest.
• Join professional organizations such as the American Geography Society or the National Council for Geographic Education.
• Become a member of groups directed toward improvement of natural resources or environment and pollution control.
• Maintain knowledge of current environmental issues including policy, conservation, and industry trends.
• Computer knowledge is extremely important in geography. Obtain experience with geographic information systems.
• Develop strong mathematical and statistical skills.
• Develop skills and interest in mapping, graphics, and charts. An interest in photography may prove beneficial.
• Develop good communication skills.

GENERAL INFORMATION

- Specialize in an area such as quantitative research techniques, computer mapping, or natural resource management.
- Join National Council for Geographic Education.
- Complete a master's degree for community college teaching or a Ph.D. for college/university teaching and research.
- Maintain a high grade point average and build strong faculty recommendations to prepare for graduate school.
