

Spring 2024

Cumulative Exam Schedule

Date	Room	Time
February 17th	CHEM 107	9am-12pm
March 23rd	CHEM 107	9am-12pm
April 20th	CHEM 107	9am-12pm

Cumulative Examinations will not be given at any times or dates other than these. Please mark your calendars now!

Doctoral graduate students beginning graduate work are advised to begin taking cumulative exams in their first year in graduate school. Exams passed are counted towards the total required number of passed cumulative exams. Students must pass one exam by the end of their second long semester and an additional three exams by the end of their fourth long semester to be permitted to continue in the Ph.D. program in the Department of Chemistry and Biochemistry. A student is allowed to take no more than 12 cumulative exams. Each examination turned in by a student at the end of an examination period is counted toward this total. Exams marked with "Do Not Grade" will not count towards this total. Cumulative exams will be offered three times each long semester.

Graduate students admitted to a Master's degree program may take cumulative exams during their first and second years in graduate school. They are not required to do so to earn an M.S. degree, however, such students are encouraged to take the exams. Complete records of the results will be maintained and retroactive credit for all exams passed will be given toward the Ph.D. program in the Department of Chemistry and Biochemistry.
