How to: Set up TTUnet VPN on your Mac in OS X Yosemite

Details:

1) Access **System Preferences** by choosing it from the Apple menu or by opening it from your Dock.

2) Click **Network**.

3) If you have an existing connection configured for TTUnet VPN you will probably want to remove it before adding the new connection. Click the existing connection once in the left-hand menu to select it, then click the minus sign (-) to remove it. (If you do not have an existing TTUnet VPN connection, skip to Step 5.)
4) Click Apply.
5) Click the plus sign (+) in the bottom left corner to add a new connection.
6) Fill out the following information, and then click **Create**.

- **Interface:** VPN
- **VPN Type:** L2TP over IPSec
- **Service Name:** *any descriptive name you wish, such as TTUnet VPN*
7) Configure the following items. Then, click **Authentication Settings**.

- **Configuration**: Default
- **Server Address**: vpn.ttu.edu
- **Account Name**: your eRaider username (e.g. jdoe)
8) Configure the following items. Then, click OK.

**NOTE:** The "Shared Secret" is case sensitive.

- **Password:** your eRaider password
- **Shared Secret:** TTUnetVPN
9) Check the box next to **Show VPN status in menu bar**. Then, click **Advanced**.
10) In the "Options" tab, ensure that **Send all traffic over VPN connection** is unchecked and **Use verbose logging** is checked. Then, click **OK** at the bottom.

**NOTE:** Leave the box **Send all traffic over VPN connection** checked if you plan to access TTU online library resources, access the Travel system, or access both TTU and TTUHSC resources (such as shared calendars) while connected to VPN.
11) Click Apply to save all of the settings.
OUTCOME

You have now configured your Mac to connect to TTUnet VPN.
