FALL SEMESTER IN SEVILLE

Sevilla is located on the Guadalquivir River in southern Spain in the heart of the region known as Andalusia. A city of roughly 700,000 inhabitants, Sevilla offers all of the advantages of a big city while still maintaining a small-town feel. In Sevilla, students can still appreciate the splendor of Golden Age Spain as they meander through the nooks and crannies of the medieval city center, whose cathedral holds the tomb of Christopher Columbus, and at the same time take advantage of the modern cultural and leisure activities that this vibrant city has to offer.

Lonely Planet has released its prestigious list of top travel destinations for 2018 and Sevilla is #1! Find Seville Video here!
