Justification of Non-CS Courses
In the case of the master's thesis option or Ph.D., a student may apply a minor or non-CS course towards their degree only if the minor or non-CS course supports their research. In the case of the master's non-thesis option, non-CS courses are not typically approved since they are not needed for research, however, certain engineering or math courses that are related to computing may enhance the student's degree and be eligible for approval. No courses that are similar to or the same as a course in the CS Department are eligible for approval. Warning: if you switch from thesis to non-thesis, then the non-CS courses approved for your thesis degree plan may not apply towards your non-thesis degree plan.

Attach a syllabus for each course requested.
