Graduating Soon?

Computer Science Seniors <u>a year or less</u> away from their planned graduation date need to see their CS advisor as early as possible regarding graduation.

Items graduating seniors can take charge of are:

1) Making sure your graduation date in degreeworks is up-to-date.
   a. If not, ask your advisor for an Intent to Graduate form, or fill the information out under your MyTech tab - 'Current Term' - 'Apply to Graduate, Change Graduation Date', or visit the EOC to make that change.
2) Double checking completion, and/or planned completion, of your Degree Checklist. Any discrepancies need to be reported to the CS advisor immediately.
3) Looking for emails and information from both the CS department and College of Engineering regarding various graduation materials (exit surveys, exit meetings, robes, etc.)
