ECE 3332: Project Laboratory II

Credit / Contact hours: 3 / 3

Course coordinator: Brian Nutter

Catalog description: Project Laboratory II. A laboratory course to accompany third-year basic courses in electrical engineering. (Writing Intensive)

Pre-requisite(s) or co-requisites: ECE 3303, 3311, 3331, and 3362. EE and EECS majors only.

Designation: Required

Course learning outcomes: Upon completion of this course, students should be able to do the following:
1. Identify, analyze and solve practical electrical or computer engineering problems by applying knowledge of mathematics, science and engineering with modern engineering tools
2. Design a system, component or process to meet desired needs within realistic constraints
3. Communicate effectively through oral presentations and group discussions
4. Communicate effectively through written reports and other documents
5. Design and conduct scientific and engineering experiments, and to analyze and interpret the resulting data
6. Function and communicate effectively, both individually and within multidisciplinary teams
7. Interact with other students, faculty and practicing professionals on professional and ethical responsibility issues
8. Recognize the need for, and ability to engage in, perpetual learning by working on projects, both individually and within multidisciplinary teams, for which they have no prior experience and developing ways to learn
9. Use basic statistical techniques to analyze data
10. Pass the Engineering Skills test

Student outcomes addressed: a, b, c, d, e, f, g, h, i, j, and k.
