

Hazardous Chemical Waste Shipment Process

Large Quantity Generator

Shipments occur every 90 days.

- STEPS**
- **Segregation (30+ hrs)** Identify all hazards*
 - 5,000+ containers are collected during the 90 day cycle.
 - 4,000+ lbs of hazardous waste is collected per week.
 - **Consolidation (20+ hrs)**
 - Some liquid chemicals can be consolidated into larger 55 gal drums, once identified. (40 (55gal) drums avg)
 - **Lab Pack (10+ hrs)**
 - Highly hazardous chemicals are placed into 5 gal containers once identified. (15 (5gal) containers avg)
 - **Shipping Label Code (6+ hours)**
 - All containers to be shipped must be identified with a DOT shipping code and labeled individually.
 - **Hazardous Waste Shipment (6+ hours)**
 - All containers must have all proper labels before shipment and weighed individually.

Large Quantity Generator- generates 2,200 lbs of hazardous waste per month or 2.2 lbs of acutely hazardous waste.
