First Year Experience (FYE)
Fall 2018 COURSE OFFERINGS
ADMISSION TO HONORS COURSES

Honors courses are designed, first of all, for Honors College members; however, any TTU student with a GPA of 3.0 or better is eligible to enroll in Honors courses as space permits.

For more information, contact: Honors College, McClellan Hall Room 103, (806) 742-1828; honors@ttu.edu

GRADUATION WITH HONORS DESIGNATIONS

Students must complete 24 hours in Honors courses to graduate from Texas Tech University with the transcript designation “with Honors from the Honors College.” See the Honors College Student Handbook on the web for more details.

A student who wishes to graduate with the transcript designation “with Highest Honors from the Honors College” must complete an Honors Thesis and 30 hours of Honors coursework. Permission from the Honors College is required before beginning the Honors Thesis.

Students entering the Honors College in Fall 2017 or later must maintain a TTU GPA of 3.5 to remain in the Honors College and graduate with either of the above Honors designations.

Students intending to graduate with either designation must file an “Intent to Graduate” form with the Honors College about one year prior to the graduation date. Honors College designations are listed on the transcript and the diploma. These are in addition to other distinctions graduates may earn, such as Magna Cum Laude.
Honors First-Year Experience (FYE) courses are specially created and structured to be the perfect beginning courses for Honors students. Enrollments are kept small, excellent faculty are invested in the classroom experience, and students are encouraged to take part in discussion and to explore the new intellectual spaces opened up to them in the university setting. The attached Learning Community Group (LCG) sections (HONS 1101) offer one credit hour and aim to integrate our new students into the close-knit and vibrant Honors community by informing them of opportunities to become involved in the Honors College and by providing them with the personal guidance of knowledgeable and supportive Honors student Mentors. In addition to building community within the Honors College and providing our first year students with the skills and tools they'll need to transition successfully into the university (such as creating professional resumes and exploring opportunities for academic enrichment and leadership), our LCG sections will work toward giving students the vocabulary needed to deal with issues they will face in a diverse and nuanced global society with courage and integrity. Special topics covered in LCG sessions will include mental health, addiction, race, gender and sexuality, sexual assault, and micro aggressions. These special sessions are carefully planned and monitored by FYE faculty and Honors administrators with the help of the extensively-trained student Mentors. We believe that introducing these difficult topics in a safe environment as closely-moderated discussions (not debates) in our students’ first semester will enable them to thoughtfully and respectfully approach related issues and situations they may encounter afterward.

FULL/CLOSED courses are listed in red text.

This course will introduce the concepts of architecture, design, society, and environments, illustrate the value of design as it relates to society and the environment, and demonstrate how design is influenced by environment and societal considerations. Topics we will explore include: architectural, social, and cultural movements in the 20th century and beyond; the relationship between social behaviors and architecture; sustainable design; the information age and design for a networked society; and the understanding of public, social, and personal spaces in non-western culture. This course will study design not as an isolated independent discipline, but as an integrated part of a much larger and complex world. Among the more important components of this world are the societies of people among whom we live and the environment within which we dwell.

This course surveys the myths by which the ancient Greeks and Romans gave sense to the universe around them, including Olympian gods and goddesses (Zeus, Aphrodite, Apollo); heroes (Hercules, Theseus, and Perseus); and pre-Olympian entities such as the Prometheus the Titan and the race of Cyclopes. Topics given special attention will include the full Trojan War cycle (via Homer’s Iliad and Odyssey and plays by Greek dramatists); the House of Labdacus (in Sophocles’ plays about Oedipus and his children); the impact of powerful female figures (Rhea, Medea, Antigone); and stories of metamorphosis and boundary-crossing (such as Orpheus and Tiresias). We will consider how the Greeks explained the creation of the cosmos (in Hesiod’s Theogony) and how the Romans explained their rise to supreme imperial power (in Virgil’s Aeneid).

Students will learn how to evaluate competing versions of myths (and how Time is irrelevant in Myth) and to uncover their deep narrative structures (why Mythology = Screenwriting 101) and their psychological meanings (why Myths continue to resonate). They will also learn tools for pronouncing any Greek and Latin name correctly. The class will include discussion of modern versions of classical myths—both standard adaptations (like the BBC’s recent Troy: Fall of a City) and more elaborate re-workings (in film, literature, art and music). One textbook is required for this course: Harris & Platzner’s Classical Mythology.

An abridged course for students not majoring in economics. Covers the most significant portions of ECO 2301 and ECO 2302 (micro- and macro-economics), with emphasis upon monetary and fiscal policy. Credit will not be given for both ECO 2305 and ECO 2302.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE SOCIAL AND BEHAVIORAL SCIENCES REQUIREMENT.**
This section of ENGL 2307 will introduce students to fiction’s generic conventions and to strategies for critical interpretation by exploring one of the most American of fiction genres: hard-boiled crime fiction. Beginning with the foundational Black Mask school of crime writers, we will cover a wide historical range of hard-boiled writers with attention to their influences, artistic innovations, and stylistic departures from the mystery and crime writers who preceded them. As we move forward chronologically, we will also pay attention to significant revisions to the hard-boiled crime genre’s signature characteristics by the more contemporary American practitioners of the form. Students will leave the course with an understanding of fiction’s key characteristics (including plot, narrative voice, setting, and dialogue) through extensive critical writing, which includes three formal papers.

THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.

Join Professor Kurt Caswell on a journey through four genres and four worlds while practicing college writing. Among our greatest scientists, thinkers, and leaders, there is no debate that our climate is changing. There is no debate that a changing climate is driving the engine of species extinction at an alarming rate. And there is no debate about what is causing climate change: human activity, human civilization, you and me. In this course, we will explore our culture’s vision of, and fascination with “the end of the world,” and ask what hope, if any, may reside there. We will examine the way human beings respond to the conditions of choice and chance, as well as to violation and reconciliation. We will investigate how and why human beings are in conflict with themselves, and the potential consequences of that conflict. We’ll move from interior conflicts with exterior consequences (Wordsworth’s poetry, The Sixth Extinction), to a vision of a dire and brutal future (The Sixth Extinction, The Road), and end with a vision of the possibility of reconciliation and justice (Much Ado About Nothing). To do so, we will focus our efforts on practicing college writing. This course is reading and writing intensive.

THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.

Note: This course is open to all Honors Engineering and non-Engineering majors and may be substituted for the following discipline-specific Introduction to Engineering courses: CHE 1305, CE 1305, EE 1304, IE 1305, ME 1315, and PETR 1305. This course should also be of interest to non-engineering majors who have an interest in technology or a desire to learn more about an engineering discipline. 

Prerequisite or corequisite: MATH 1451

This course is designed to introduce engineering and non-engineering freshmen to the opportunities and challenges offered by a career in engineering. Through an exploration of the new and evolving technologies and the national and international issues relating to energy conservation, production, and consumption, students are given a preview of the problems and analyses typical of mechanical, civil, electrical, chemical, industrial, petroleum, and computer science engineering. Students also gain experience in the application of basic computer tools (e.g., Word, PowerPoint, Excel, Mathcad, MATLAB) to analyses, reports, and presentations typical of engineering. Finally, students develop an understanding and appreciation of the design process and the open-ended problems found in the practice of engineering.
This is not a typical geography class where you learn how much it rains in Outer Zambodia, how many bananas are produced in Eastern Tropicalistan, or what the capital of Monitone is. GEOG 2300 is organized around the theme of human well-being. This means that we look at how well-off people are in different places. We do this at different scales—for the local area (Lubbock and West Texas), for the United States, and for the world. We look at where rich and poor people live and at some of the factors that cause differences in human well-being from place to place. Human well-being is more than just what the average family income of a place is. We look at health, education, quality of housing, access to healthy food and water, and a wide variety of other indicators of well-being.

In order for students to experience differences in human well-being first hand, this class will require everyone enrolled to perform at least 20 hours of volunteer service with a local agency that provides services to an economically disadvantaged population (assistance in making connections with these agencies is provided). Part of the coursework will involve writing reflection papers based on your volunteer experience.

GEOG 2300-HS1
Introduction to Human Geography: Service Learning Section
(CRN# 24618)
Prof. G. Elbow

THIS COURSE FULFILLS 3 HOURS OF THE CORE MULTICULTURAL REQUIREMENT.

HONS 1101-H11
Partnering: The Development of Intimate Relationships
(CRN# 30114)
Prof. D. Weiser
MWF 12:00-12:50 PM

Intimate relationships are a part of every person’s life. These relationships come in many shapes and sizes (parents, siblings, friends, romantic partners, etc). All relationships are developed, are sustained or come to an end. Would you like to better understand intimate relationships, how relationships develop, how they can be maintained, difficulties that arise in relationships and how to overcome conflict? Then this course is for you. This course is designed to provide an overview of intimate relationships from adolescence through adulthood, with an emphasis on relationship processes, diversity in types of partnering, and developmental/contextual variations in relationships. The course will review the various phases of relationship development (e.g., attraction, maintenance, dissolution, reconfiguration), and address the ways in which relationships are affected by individual (e.g., cognition, personality), couple (e.g., love, sexuality, conflict, communication), and contextual (e.g., social network) factors.

THIS COURSE FULFILLS 3 HOURS OF THE CORE SOCIAL AND BEHAVIORAL SCIENCES REQUIREMENT.

HIST 2300-H02
History of the U.S. to 1877
(CRN# 14855)
Prof. E. Skidmore
MWF 9:00-9:50 AM

HONS 1101-H13
LCG Group (Co-requisite)
(CRN# 35859)
Student Mentors
T 4:00-5:20 PM

Note: HIST 2300 is not required before HIST 2301.
This course lets you answer for yourself some of the thorniest questions in American history: how did this disparate set of British colonies become one nation? Why did the national structure break apart into Civil War less than a century later? Readings, writing assignments, and discussions all provide access to the methods historians use to answer such questions and investigate the human condition. Primary source readings will inform your analysis of debates concerning historical events and processes, while the textbook and secondary sources provide both the necessary narrative spine and many alternative explanations that historians have considered for these claims. This hands-on examination of historical issues requires your active engagement and participation, so come prepared to think!

CATALOG YEAR PRIOR TO 2014: THIS COURSE FULFILLS 3 HOURS OF THE CORE CURRICULUM UNITED STATES HISTORY REQUIREMENT.

HIST 2301-H02
History of the U.S. Since 1877
(CRN# 28390)
Prof. R. Verrone
TR 9:30-10:50 AM

HONS 1101-H10
LCG Group (Co-requisite)
(CRN# 35856)
Student Mentors
T 4:00-5:20 PM

Note: HIST 2300 is not required before HIST 2301.
This course will discuss, in an overview format, all of the main currents—political, economic, and social, etc.—of American history since 1877. Of special interest will be such American turning points as the second industrial revolution, imperialism, the two World Wars, the Great Depression, Viet Nam and the current political scene. The course focuses on broad patterns and interpretations rather than a collection of independent facts. Two elements especially distinguish this particular class: an emphasis on discussion over sometimes controversial issues and an awareness of current events, which are nothing more than a continuation of the American story through the present.

CATALOG YEAR PRIOR TO 2014: THIS COURSE FULFILLS 3 HOURS OF THE CORE CURRICULUM UNITED STATES HISTORY REQUIREMENT.
Science fiction has a long history in literature, film, television, and sequential art. The idea is that somewhere in our fictional storytelling there can be a scientific and technological basis for what occurs in the story. This course explores stories, films, sequential art, and writers in the science fiction genre through a scientific context. What do the stories and films of the past predict about the future? Were these creators correct about their visions of the future? How did they use science in their storytelling? How do the inventions of fiction have basis in the scientific method? We will discuss these questions and also show how popular fiction in its various formats can be a form of social history which tells us just as much about the time it was created as it does about the future. This course is reading intensive.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.**

Education has always been a crucial commodity in America; and higher education in particular has been a reflection of the desires, philosophies, beliefs, needs and thoughts of the American people. Its evolution parallels that of the nation’s development including many inspirational periods as well as those that were difficult and contentious. Many times college campuses were the crucibles of social thought and social movements; and events occurred on them that spurned significant social change. This course explores some of the major events that transpired on American college campuses, since the inception of Harvard in 1636 to today, which transformed and shaped who we are as a nation. The course combines the history of higher education with societal evolution all while examining them through the lenses of various critical theories.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.**

The Second World War in Europe pushed human beings to their ultimate extremes, from their most courageous and hopeful to their most destructive and hateful. How do we negotiate progress, technological advancement, scientific knowledge, and the rhetoric of propaganda with ethical questions of compassion, tolerance, courage, and integrity? How do we, in this war of extremes, begin to understand who we are as human beings, what our responsibilities are to one another, how connected and disconnected we are from one another? This interdisciplinary course explores how very human questions during the Second World War drove and informed the framing and development of scientific, technological, and engineering concepts.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.**
How can we ensure freedoms and be a “free people”? Can education ensure we are less likely to be controlled by “smooth-talkers” or those who would take our freedoms? From the time of the ancient Greeks until the early 20th Century, the basis for education was rooted in the study of rhetoric that was designed to ensure a free, rather than servile, people. Rhetoric asks, “What is the true, the good, the just, and the beautiful?” It fuses virtue and cultural memory with dialectical discovery and leads us to understand how we think, why we disagree with each other, and what common ground is present for ensuring we remain a free people.

Students in this course read ancient documents, ask questions about the texts, answer questions in class, and write short response papers. We begin with writings from the pre-Socratics (Parmenides, Heraclitus, Protagoras), proceed to the sophists, Greek and Roman philosophers (Plato, Aristotle, Cicero, and Quintilian), and on to Augustine. We then examine modern rhetoricians (Burke & Weaver) and explore the ideas of the postmodern authors (Lyotard, Foucault, and Derrida). The class is a combination of short lectures and class discussion about the texts. Students are assessed based on response papers written about the class readings. My desire is to have students be actively engaged rather than passive recipients in the classroom.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.**

**HONS 1304-H01 Intersection of Film and Dance**
(CRN# 14920) Prof. A. Duffy
**TR 9:30-10:50 AM**

This course is an overview of the ways in which dance and film influence each other and work in tandem to create complex meaning and understanding, beginning with examples from the 1960s and progressing to current trends. In examining these concepts, this course will expand the student’s knowledge of the human condition and human cultures as expressed and evidenced through the art form of concert dance, performance art, multimedia art works, and film. Students will engage in observing dance in video format, critically reading and writing about performance, discussing the various art forms, and exploring performance criticism.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE CREATIVE ARTS REQUIREMENT.**

**HONS 1304-H04 Soundscapes: Exploring the World Through Music**
(CRN# 35968) Prof. S. Hughes-Brinker
**MWF 1:00-1:50 PM**

This course is designed to introduce students to musical traditions from a variety of cultures and to give students understanding and insight into how globalization has shaped and continues to shape our sonic landscapes. Students will study Palestinian protest music, global hip hop, reggae, flamenco, and other musical traditions that are a reflection of cultural exchanges (cultural, political, and religious). Students will examine the role of geography, technology, and transportation in the evolution of music across time and culture. By the end of the semester, participants will be able to identify and discern music representative of distinctive subcultures of music, and will better understand the ways in which the human condition is expressed through music.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE CREATIVE ARTS REQUIREMENT.**

**HONS 1304-H06 Creative Processes**
(CRN# 33972) Prof. A. Wilkinson
**M 2:00-4:50 PM**

No one can teach you to be creative. No one needs to. We are—each and every one of us—creative by virtue of being human. But we can learn to be better at creative work by understanding the creative process. Through readings, group and individual projects, and seminar discussion, you will develop a vision of the creative process, learn to identify blocks to that process, and acquire techniques for getting you unblocked. The course is not just about art but about creative thinking and habits that are applicable to all human endeavors.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE CREATIVE ARTS REQUIREMENT.**
Did you know that some of the most dangerous exploration in history was in search of plants? Nineteenth century plant hunters and illustrators braved sea voyages, rides on pack mules, inclement weather, regional wars, bandits, sickness, and even death to bring you that *Schlumbergera* you gave your mother for Christmas. Take a walk on the wild side and learn the surprising stories behind some familiar plants as we practice the art of botanical illustration. This course is for artists and non-artists alike, and is excellent training for pre-med and engineering majors because of its focus on scientific accuracy and detailed observation.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE CREATIVE ARTS REQUIREMENT.**

**HONS 2406-H01 Honors Integrated Science II: Examination of an Integrated Planet: Comparing Alaska to the Galapagos** (CRN# 14928) Prof. M. San Francisco Prof. S. LaLonde TR 4:00-5:20 PM

**HONS 2406-H51 No-Credit Lab** (CRN# 20199) Prof. M. San Francisco Prof. S. LaLonde T 5:30-7:20 PM

**HONS 1101-H08 LCG Group (Co-requisite)** (CRN# 35854) Prof. M. San Francisco Prof. S. LaLonde Student Mentors W 4:00-5:20 PM

*Students will complete lab coursework outside of class, on their own time, so attendance for the lab portion of the class is not mandatory.*

**THIS COURSE FULFILLS 4 HOURS OF THE CORE LIFE AND PHYSICAL SCIENCES REQUIREMENT.**

**HONS 2406-H02 Honors Integrated Science II: Why Chemistry Matters** (CRN# 34410) Prof. D. Pappas MWF 11:00-11:50 AM

**HONS 2406-H52 No-Credit Lab** (CRN# 34411) Prof. D. Pappas W 5:30-7:20 PM

**MATH 2300-H01 Statistical Methods** (CRN# 32628) Prof. L. Ellingson MWF 11:00-11:50 AM

**HONS 1101-H22 LCG Group (Co-requisite)** (CRN# 35868) Prof. L. Ellingson MWF 11:00-11:50 AM

*Prerequisite:* Score of at least 500 on the SATM and composite score of at least 1070; or score of at least 19 on the ACTM and composite score of at least 23; or grade of B- or better in MATH 0302 or TSI 0302.

Methods of analyzing data, statistical concepts and models, estimation, tests of significance, introduction to analysis of variance, linear regression, and correlation.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE MATHEMATICS REQUIREMENT.**
Within the last several centuries, scientific knowledge, and the technology it has made possible, have drastically altered our world. Yet many unresolved questions remain about how scientific knowledge is produced, what makes science different from other ways of learning about things (if there are any), and exactly what science says about what the world is really like. In this class, we will reflect on the nature of science and how it does and should affect our lives. During the course we will examine such questions as whether there is a sharp dividing line between science and non-science (a “demarcation criterion”) and we will carefully consider the relationships between science and religion, between science and ethics, between science and the humanities, and between science, business, and politics. Finally, we will examine the role that science plays in a democratic society such as ours and how we as citizens should think about funding and directing scientific research.

**THIS COURSE FULFILLS 3 HOURS OF THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT.**

**THIS COURSE FULFILLS 3 HOURS OF THE CORE SOCIAL AND BEHAVIORAL SCIENCES REQUIREMENT.**

All people are performers. Every day we “present” a different side of ourselves to the various persons with whom we come in contact. We are all skilled at a kind of “deception” which allows us to transform our voices and our bodies as needed to get what we want. As children, we learn what works and what doesn’t work in our interactions with adults. These become ingrained in us. In this course, we remind ourselves what our different sides consist of, we learn strategies for acquiring our needs, we learn to relate to each other, to sympathize and even empathize with people different from ourselves. We become better citizens in a global society. In the study of acting we learn to be better sociologists, psychologists, public speakers, athletes, managers, anthropologists, parents, children, and friends. In short, we learn much more about the human condition in order to reflect it to others.
