**Brent Chittenden**

**Trent Wickwire**

Austin . . . Texas grape production for 2005 is expected to total 8,500 tons, down from the August forecast of 10,000 tons. The production was harvested from 2,900 producing acres and yielded an average of 2.93 tons per acre. The total estimated value of the 2005 crop totaled \$10.6 million dollars with an average value per ton of \$1,250. Estimates of 400 nonproducing acres were not mature enough to produce during 2005.

Other information asked of grape growers determined the major varieties in production. The breakdown by varieties is as follows: Cabernet Sauvignon, the leading variety, accounted for 690 producing acres and 2,200 tons harvested for an average price per ton at \$1,360. Chardonnay variety totaled 470 producing acres, with 1,100 tons harvested for an average price per ton at \$1,450. Sauvignon Blanc variety totaled 300 producing acres with 600 tons harvested for an average price per ton at \$990. Chenin Blanc with 310 producing acres produced 1,400 tons for an average price per ton at \$860. Merlot variety with 330 acres in production, yielded a total of 900 tons for an average price per ton at \$1,480.
