

# MEET YOUR ADVISOR

## Jenni Dean

### ABOUT ME:

I am originally from Dallas but have lived several other places in Texas as well. I attended Asbury College in KY to earn my BA in Psychology. After college, I worked for a counseling facility where I was the Academic Coordinator for the teenagers in our program. I moved to Lubbock in July of 2007 to start a Masters at Texas Tech in Higher Education. I found the Human Sciences Advising office at that time and have loved the opportunity to work here with college students ever since! I advise for the Teaching majors of Human Sciences: Early Childhood, Family Consumer Sciences, and Nutrition, HDFS, and RHIM with teaching certifications.

### FAVORITE CLASS IN COLLEGE:

I LOVED majoring in Psychology because of the fascinating classes I got to take. My favorite class in college was probably Abnormal Psychology where we learned about all the different disorders and diagnoses.

### INTERESTS & HOBBIES:

I love to travel, especially to Guatemala. I'm very involved in my church here in Lubbock. I love

ethnic foods, Zumba, Facebook, LOST, reading, and craft/home improvement projects.

### LOOKING BACK:

When I think back to my college experience, I realize that a majority of the skills that I learned in college that have been helpful in my different job settings were not only from the classes I took, but also from the extra-curricular involvement I had on campus. For this reason, I highly encourage students to participate in clubs and organizations to build their résumés, have fun, and learn valuable skills.

### MY 5 STRENGTHSQUEST THEMES:

Harmony, Includer, Input, Responsibility, Empathy

## How can I assist you?

- ◆ Course selection and academic program planning
- ◆ Registration procedures
- ◆ Progress towards your degree
- ◆ Information on campus resources
