

The following guidelines have been established for individuals working with Amphibians:

- You should have a current Tetanus/diphtheria (Td) vaccination: (one that can be documented within last 10 years).
 - It is highly recommended that you receive a Td booster if you experience a significant injury and your vaccination was administered more than 5 years previous.
 - It is highly recommended that you receive a Td booster if you have not been vaccinated within the last 10 years.
- All employees and students should be properly trained in handling techniques specific to the particular species with which they will be working.
- All employees and students should be aware of potential zoonoses associated with the particular species with which they will be working (species-specific zoonosis information is provided in the next module of this risk evaluation and is also available on the TTU IACUC web page).
