Access Local Resources Using Remote Desktop on OSX

1.) Log into the App Store and install the app Microsoft Remote Desktop.

2.) Open Microsoft Remote Desktop and Click New
3.) Enter the appropriate information in the highlighted areas and leave everything else with the default selections.

4.) Click Session.

5.) Adjust whatever settings apply to your situation here.

6.) Click Redirection.
7.) Click on the “+” sign.

8.) Click the arrow, then click browse.
9.) Click Choose. This should select /users/<yourusername> if it does not adjust it before clicking ok in the next screen.

10.) Select your connection under my desktops and click start.
11.) This message may appear when connecting if it does, click continue.

12.) Click Start>Computer

13.) Your local Mac drive should appear under the section labeled Other.
