

Information Technology Division Bulletin

vol. 15 no. 5 | January 2019

Message from the CIO

As is our tradition, we dedicate the January bulletin to sharing some of our annual performance metrics in support of institutional priorities and strategic goals. In this issue, we highlight a sampling of the TTU IT divisional metrics presented at our annual Year in Review event in December 2018. In addition, we also showcase the winners of our “Excellence in IT Innovation” award. Thank you to all who attended our December event, and we look forward to another productive and successful year of partnerships. Happy New Year!

—Sam Segran, Chief Information Officer and Vice President for IT
