Curry Holden: A Landmark Visionary  
TUESDAY, OCTOBER 6, 2015 – SUNDAY, OCTOBER 2, 2016

Curry Holden, the first Director of the West Texas Museum (now the Museum of Texas Tech University), is credited with the discovery of Lubbock Lake in 1936. It all started when the young Kimmel brothers brought him bones of ancient bison and a Folsom point found there. Throughout the decades, Holden’s research championed protection of the Lubbock Lake. He oversaw excavations, worked with community leaders, and raised community awareness with his own guided tours into the late 1960s. His ceaseless efforts are chronicled in celebration of the Landmark’s 80th anniversary of discovery. His vision is the foundation for the Landmark’s current mission and success.
