DR. JOHN ORGAN

U.S. Geological Survey

“Integrating Science and Politics: A Quest for Durable Decisions”

Dr. John Organ is Chief of the Cooperative Research Units Program, U.S. Geological Survey. His office oversees the operations of 40 cooperative units at universities around the country conducting research on natural resources management. His lecture will be followed by graduate student poster displays. All interested faculty, staff, and students are welcome to attend Dr. Organ’s lecture and to discuss with students their poster presentations.
