

RAIDER ROOMS

March 2021 Edition

e-newsletter of the Raider Room Project

TECHNOLOGY VIDEO MUTE

The Video Mute feature, found in many Raider Rooms, allows you to project a blank screen without shutting off the audiovisual system completely. Video Mute is a useful feature when you would prefer that your audience doesn't see what's on your screen - for example, when logging into a PC or Blackboard.

Video Mute is a quick, effective way to pause your presentation and resume it when you're ready - simply press the button corresponding to the input you wish to use to project your presentation content again.

If you have any additional questions about video mute or Raider Room technology in general, contact CTS for more details! They can be reached at ctsstaff.ithelpcentral@ttu.edu or (806) 742-5381.

RAIDER ROOM SURVEY

Tell us how we're doing!

Please fill out of our survey, starting March 1st, if you have not already.

Your opinion of these spaces is valuable to us and will be used to help us improve on current and future Raider Rooms.

The survey closes on March 12th please get your responses in before then!
