10-year growth: 41%

Current total employment: 20,000

The personal financial advisor profession has exploded as baby boomers reach retirement age and seek advice on making their nest eggs last. Meanwhile, younger folks are seeking guidance on managing savings and retirement accounts in lieu of a company pension plan.

"People know they have to manage their own financial futures, and they're turning to financial advisors to help," says Richard Salman, president of the Financial Planning Association.
