Sung-Won Lee, physics professor and chair of the Department of Physics & Astronomy, welcomed some 250 K-12 students to the 2022 South Plains Regional Science and Engineering Fair. The students came to present their projects in agricultural, biological, engineering, mathematical, and physical sciences. This year's fair, was held in-person at the United Supermarkets Arena on Feb. 25, 2022, with limited capacity due to the influence of COVID-19. “We brought the fair to our campus 26 years ago,” Lee said. “Many offices at Texas Tech, including College of Arts & Sciences, have generously provided support; and hundreds of students, teachers, family, and friends have visited the campus this year.”
