Worldwide eLearning·

TTU Worldwide eLearning provides expertise for the design, development and implementation of high quality online courses and programs, training in pedagogical best practices for teaching online, and compliance with federal and state regulations including state authorization. This unit also oversees the currently recognized teaching sites and centers, while identifying additional opportunities for increasing the number of these sites and the course and degree offerings at all sites.

Components of TTU Worldwide eLearning:
- Office of Online Compliance and Regulation
- Office of Instructional Design and Web Technologies
- Regional Sites and Centers

Office of Online Compliance and Regulation

The Office of Online Compliance and Regulation ensures that Texas Tech is authorized to offer programs online and at the regional teaching sites. These authorizations are obtained from several organizations including the Texas Higher Education Coordinating Board, SACSCOC, and other states in compliance with federal regulations. The Office of Online Compliance & Regulation also oversees the marketing activities of TTU Worldwide eLearning.

Office of Instructional Design and Web Technologies

The Office of Instructional Design and Web Technologies, is a new addition starting in the fall of 2014. This office will assist with:
- The design, delivery, and review of online courses (synchronous and asynchronous) to ensure they are of the highest quality
- Provide opportunities for significant interaction within the courses to be compliant with federal definitions
- Ensure compliance with on the *Principles of Good Practice for Online Learning*
- Assist faculty who use Blackboard as a supplemental resource with course design and delivery

The staff of the Office of Instruction Design and Web Technologies is available to assist faculty, staff and students with a wide-range of services, trainings, and pedagogical support. Staff positions include:
- Instructional designers
- Blackboard support personnel
- Media support specialists (e.g., Mediasite, AV)
- Instructional technology support
- ADA compliance

Worldwide eLearning·

Regional Sites and Centers

Currently, Texas Tech has four regional teaching sites (El Paso, Fredericksburg, Highland Lakes/Marble Falls, and Waco), a higher education center (Junction), and a teaching, research and outreach field station (Llano River Field Station – Junction). The teaching sites offer undergraduate and graduate degree and certificate programs. Texas Tech University Center at Junction and the Llano River Field Station, located on the banks of the South Llano River, in Junction, TX, provide academic, research and outreach programs to expand educational, economic, and cultural opportunities throughout the Hill Country region.   TTU Worldwide eLearning is working to increase the number of recognized regional teaching sites, specifically in the Dallas-Fort Worth area.
