The Department of Horticulture and L.A. at Oklahoma State University is seeking applications for two MS students to start in January 2019. A GRA is available to conduct research related to stress tolerance of turfgrasses as part of the nationally-renowned OSU bermudagrass breeding program. Students interested in plant breeding, plant physiology, turfgrass management, and soil science are encouraged to apply. Other assistantships may also be available and are offered on a competitive basis. Assistantships include a competitive stipend and tuition waiver. Applications are submitted to the Graduate College (http://gradcollege.okstate.edu/) and include a letter of interest, a CV, academic transcripts, GRE and TOEFL (if applicable), and email addresses for three professional references.

Further information: visit (www.hortla.okstate.edu/graduate) or submit an email to Dr. Charles Fontanier (charles.fontanier@okstate.edu) or the Graduate Coordinator (niels.maness@okstate.edu).
