General description

DuPont Pioneer’s Plainview, TX research center is looking for a research worker. The position will include both field and office-related activities but will be heavily field based. Field activities will include supervising crews, data collection, and assisting with yield trial and nursery activities and maintenance.

Qualifications

Previous research experience is preferred but not required. Strong leadership, communication and interpersonal skills are necessary. Candidates should be able to work independently or with a team. Candidates must be willing to work outside in tough working conditions and in the office. The candidate should feel comfortable working with Microsoft Office applications (Excel, PowerPoint, Word).

The successful candidate must undergo a drug screening and background check.
