

Upcoming Thesis/Dissertation Defenses

Friday, March 2nd:

8:30am, BPS 117, **Cody Vavra**: "Characterization of Agronomic, Biochemical, and Physical Traits of Hi-A Corn Hybrids of the Texas High Plains."

Friday, March 9th:

8:30am, BPS 117, **Joseph Burke**: "Soil Health Management in Cotton Monocultures on the Texas High Plains."

Tuesday, March 20th:

11:00am, BPS 108, **Samuel Discua**: "Scale Dependent Bee Diversity Patterns (Hymenoptera: Anthophila) and Plant Attractiveness to Pollinators in The Texas High Plains."

Friday, March 23rd:

9:00am, BPS 117, **Amee Bumguardner**: "Soil Potassium Effects on Cotton (*Gossypium hirsutum*) Growth, Yield and Quality in the Texas High Plains."

Tuesday, March 27th:

3:00pm, Fish & Wildlife 101, **Brian 'Scott' Baker**: "Within-Plant Variability of Upland Cotton Varieties in Multiple Environments".

Wednesday, March 28th:

10:00am, BPS 117, **Tanner Drake**: "Effects of Fruit Placement in Upland Cotton by Water Regimes."

Friday, March 30th:

8:00am, BPS 117, **Christopher Cobos**: "Comparative Biochemical Analysis of *Aspergillus* Resistant and Susceptible Peanut (*Arachis hypogaea*) Testa and Testa Development Biology Update".
