Syllabus Statement if AI use is allowed with permission or for specific assignments:

Generally speaking, you are not allowed to use artificial intelligence (AI) engines, software, or artwork generating programs (such as ChatGPT or DALL-E) to produce work for this class EXCEPT on assignments specified in class or elsewhere on the syllabus. I will provide more information when the time is appropriate in the course. You may not, however, construe this limited use as permission to use these technologies in any other facet of this course.
