

Minor in Agribusiness Management

Business

Economics

Agriculture

Minor in Agribusiness Management

Offered by the Agricultural and Applied Economics Department for non-departmental students to provide training in economics and business with an agriculture perspective. The minor requires 18 hours of Agricultural and Applied Economics (AAEC) courses including:

- Fundamentals of Agricultural and Applied Economics (AAEC 2305)
- Nine (9) hours from junior (3000) level AAEC courses
- Six (6) hours from senior (4000) level AAEC courses

A student must satisfy all course prerequisites before they will be allowed to register for a course. For more information, go to <http://www.aaec.ttu.edu>, click on "AAEC" at top right, and then select "Minors (for non-majors)."

Career opportunities are enhanced when an **Agribusiness Management minor** is combined with a degree in either **Animal Science** or **Plant and Soil Science**. The managerial decision making skills taught in the economics/business courses comprising the Agribusiness Management minor curriculum compliment the science and agricultural science training provided by an Animal Science or Plant and Soil Science degree and enhance career options. The combined science and economics training will broaden career opportunities in agricultural sales, commodity purchasing and trading, and management of farms, ranches, and agribusiness firms.

Opportunities for Animal Science and Plant and Soil Science majors earning an Agribusiness Management minor	
Animal Science Majors	Plant and Soil Science Majors
Meat production management	Chemical and fertilizer sales
Meat sales	Seed sales and management
Feedlot management	Equipment sales
Livestock purchasing	Elevator or gin management
Animal health product sales	Commodity trading
Feed and feed supplement sales	Farm management

Business majors can use the Agribusiness Management minor to incorporate additional economics training in their business curriculum by taking courses that apply business/economics principles to farm, ranch, and agribusiness firm management.

Popular courses in the Agribusiness Management minor include: **Agribusiness Marketing** (AAEC 3301), **Agribusiness Finance** (AAEC 3302), **Cooperatives** (AAEC 3303), **Farm and Ranch Business Management** (AAEC 3304), **Introduction to Sales** (AAEC 3305), **Economics of the American West** (AAEC 3306), **Property Appraisal** (AAEC 4303), **Sustaining Global Ecology, Nat. Res., & Economy** (AAEC 4309), **Ag. Financial Analysis** (AAEC 4316), **Commodity Futures Trading and Analysis** (AAEC 4317), **Agribusiness Law** (AAEC 4320), and **Natural Resource Law** (AAEC 4330) For more specific information about these courses, go to <http://www.depts.ttu.edu/officialpublications/catalog/>
