

## Master of Science in Agricultural Education

The master's degree is designed to prepare graduates for teaching, research, extension, leadership, and administrative positions in the public and private sectors. Students in the master's program focus on a core of agricultural education courses along with an emphasis in designing educational/ training programs, professional presentation enhancement, leadership development, teaching/training methods, and interpersonal communication. The Master of Science in Agricultural Education requires a minimum of 30 semester hours of graduate course work for the thesis option and 36 semester hours for the non-thesis option.
