### Text Responses

#### Comments instructor or course

(Nathan Hall) Dr. Hall is a phenomenal instructor. He makes sure to explain the material in different ways to ensure we understand. His class was interactive, thoughtful, inventive, and overall enjoyable. I appreciate how much effort he put into making sure the class was learning and having a good time doing it. His methods of teaching are commendable and set a high bar for future educators.

(Nathan Hall) had edgar instead of nathan hall. Edgar is great at what he does and an all around good person/professor. A study guide before an exam would be extremely helpful

(Nathan Hall) I really enjoyed this class. It allowed me to see animals' behavior in a different way. I even applied some of the training into my training with my own dog.

(Nathan Hall) the main project of the course was a mystery for most of the class until the absolute very end of class and I wish we had been giving more information about what we were supposed to be doing on it.

(Nathan Hall) Sometimes it is hard to understand things in lecture/online. I'm glad you record but it would be helpful if you would over-explain certain definitions especially the ones that are constantly used.

(Nathan Hall) teachers slides needs to be better... more details less pictures so its easier to study later

(Nathan Hall) This class is very interesting and entertaining. I learned so many new things I did not know before taking this class. It has definitely been one of my favorite classes to take. It is very lecture heavy but if you study, show up to class, and make an effort to do well, you can do great.

(Nathan Hall) Makes class interesting.

(Nathan Hall) jokes and puns made were greatly appreciated

(Nathan Hall) This course was very interesting and easily one of my favorite of my college career so far. It has helped guide me towards the career path I hope to pursue and I enjoyed every class.

(Nathan Hall) always straight forward, understanding, helpful, and the exams went in correlation with the material he taught.

(Nathan Hall) Professor Hall is amazing and very passionate about his teaching.

(Nathan Hall) He is has a great deal of knowledge for this subject. He's helpful and always on top of emails!

(Nathan Hall) Everyday of lecture, he would reel you in without having to just reread a book, his discussions were very engaging.

(Nathan Hall) Instructor kept us engaged and taught material very well

(Nathan Hall) Dr. Hall is always passionate about his teaching and strives to make the classroom an enjoyable learning environment.
(Nathan Hall) This is one of my favorite classes this semester! Dr. Hall is one of my favorite professors, I love his teaching style and how he makes the class interesting!
(Nathan Hall) Dr. Hall is such a fun professor and tries to help with content or software issues whenever he can!
(Nathan Hall) There were some unrealistic expectations of coming to class outside of class and lack of commitment to student success. Seemed like he was more worried about his own school to care about ours
(Nathan Hall) I enjoyed this course a lot. I think it had a lot of real examples. This always makes it easier to apply what we are learning to the real world.
(Nathan Hall) Very accommodating and has taught us an awful lot of important information throughout this course.
(Nathan Hall) Material was well planned out and presented in a manner that made learning interesting and accessible.
(Nathan Hall) Wonderful teacher!
(Nathan Hall) Dr. Hall was a great professor, and went out of his way to make the class fun and informative at the same time. We have gotten to do some cool projects, and he is a very fair professor in terms of grades and timelines. I really liked the format of his class in which we only went to in person lecture one day a week, and were expected to keep up with our own work for the remainder of the week. I learned very well from this hybrid structure, and enjoyed this class a lot!
(Nathan Hall) I would say if he could make the class a bit more interactive and as well grade exams a bit less harsh since sometimes I do not know what he wants us to put on the open-ended responses. I would also say be more specific on open-ended responses and possibly have more multiple choice and matching if fill in the blanks is not working out. Thank you for everything professor Aviles Rosa hope you have a great summer!
(Nathan Hall) Exams were hard, I enjoyed the hands on project. Wish there was a study guide for exams.
(Nathan Hall) Dr. Hall is an amazing professor who worked hard to keep people engaged while also safely following the COVID guidelines. I loved this course!
(Nathan Hall) I really enjoyed every part of this course!
(Nathan Hall) this course is fun to take and you get to work with the dogs! I learned many new things in this class and it's worth it.
(Nathan Hall) I think more videos showing training would help to grasp the different types of conditioning better. Really enjoyed the hands on experience at the end and it helped understand the concepts much better, so maybe if there was a way to show the training in videos or in person throughout the semester, that could be really helpful. Overall really enjoyed the class!
(Nathan Hall) Good teacher could've done a little better on explaining the final project and better test help
(Nathan Hall) Dr. Hall was an interactive professor. I greatly enjoyed taking this class and loved the small size of students. Also conducting our own research experiment was an experience, to say the least. Even if we did not get ideal outcomes, going through the steps and methods of both research data and evaluation was something I had never done prior to class. He encouraged daily class participation which helped me learn better. I did not like watching the online videos but the interactions in the video helped slightly when it was not possible to attend class in person. This class had a lot of material to cover so I feel like I did not understand everything as best I could due to the large quantity of material.
(Nathan Hall) I enjoyed learning more about training dogs and have been able to apply what I learned in class, to use with my own dog. It also helped me realize how I could have trained her better.
(Nathan Hall) Powerpoints were fun, she was very understanding. Her emailing me at the beginning of the semester really made me want to get on top of my classes. Fun class and caught my attention while teaching.

(Nathan Hall) This was by far my favorite class of the semester and perhaps my favorite college class I've had. The subject is very interesting and Professor Hall does an amazing job teaching it. He is very passionate about the subject and always thorough with explanations. He is also very understanding of each student and was always willing to answer questions and make accommodations. This class also greatly benefited from being small in size which allowed for more one-on-one. If all my classes could have only 8 people, I would be grateful. The extra labs we had also helped exemplify what we had learned but were not meticulous or boring. The skills learned from this class were also very helpful as knowing statistical methods and tests, as well as the programs such as R-studio, are useful and necessary for the field I plan to enter. This class has even made me reconsider what I want to do with my major and makes me want to get more involved with sensory analysis. The only minor complaint I had with this class was that it started at 8 AM.

(Nathan Hall) I really loved the times at the olfaction lab though. The hands on experience was very helpful!

(Nathan Hall) Dr. Hall was very informative and I like it when we where able to work with the dogs.

(Nathan Hall) Exam questions were worded confusingly which resulted in further confusion for which answer to choose. Lecture slides had very little information on them which made studying difficult. Took notes on my own but it is always helpful to have a second set of notes from professor to compare my notes with for effective studying. Overall, I really enjoyed this course and Dr. Hall's humor. I think the material was made interesting with his expertise and side stories that helped me to imagine and apply the information to real life.

(Nathan Hall) Due dates for the written assignments would have been better. It would have been helpful to go over some of the codes before starting to use Rstudio.

(Nathan Hall) Well organized and followed the course outline according to plan with thought to student success.

(Nathan Hall) I enjoyed the hands on portion of this class the best. I liked that our participation in the weekly activities was graded. It seemed as though the questions on the exam were more complex than those presented in the review.

(Nathan Hall) I think groups projects can affect a person's grade, I think the final project should be done individually. If not an infographic, a different type of final project. I liked the learning checks a lot, I think it helped me understand the material. The readings that were required did not help me as much, but it was interesting to see other viewpoints.

(Nathan Hall) Dr. Hall is very engaging, with his content going beyond the basics and applicable to real world training and research scenarios.

(Nathan Hall) This evaluation is for Professor Edgar Aviles-Rosa, not for Dr. Hall. I think this course was taught well enough. The assignments and grading were not the best because there were several instances in which I had written something that was the correct answer but had been counted wrong and my grade had not been changed to match what I had earned.

(Nathan Hall) I really enjoyed the hands on activites!

(Nathan Hall) The instructor is no longer Nathan Hall, the new professor is Edgar Aviles Rosa. He often teaches things in lecture and thing changes the content of what he taught on tests and quizzes. He makes all of his quizzes and tests himself and they have all been very confusing and hard to understand the way he words the questions. I feel as if the content taught in this course did not help me train a dog overall and do not have a clear understanding of animal behavior. Again, he says things in lecture that does not follow through when taking quizzes and tests, and especially the hands-on-experience project that we did at the end of the semester. Overall there was a lot of misunderstandings within this course and was very hard to follow.

(Nathan Hall) Good professor with a great lecture style.

(Nathan Hall) Dr. Hall wasn't there very often and Dr. Stellato seemed to facilitate most of the session. I think it is a nice alternative to have two professors leading one seminar.

(Nathan Hall) I loved having Edgar as a teacher and think he did a great job for his first time as a professor. With that being said, I do think there are a few improvements that could be made. Personally, I became very stressed when he would guilt us for not answering his questions fast enough by saying that he wasted 3 months of his life or would have pop quizzes purely based on our response times to his questions. I attended every lecture, but personally, I needed time to be able to process and answer the questions. I also thought it was strange that we went from having a week to take our tests and having the ability to work together to having only the class time and closed book to take our last test. I am currently doing pretty well in the class, but this does make me nervous since the first two tests had really low averages. Overall, I loved learning in this class and felt like the information was useful.
(Nathan Hall) I really enjoyed the format of a few lectures on the front end of the course before moving into student seminars.
(Nathan Hall) good
(Nathan Hall) Very interesting class enjoyed the project
(Nathan Hall) I enjoyed what Dr. Avilles taught, for the most part, I just believe the class was kind of strung together.
(Nathan Hall) Showed a lot of examples so it was easier for us to learn and understand what we are learning.
(Nathan Hall) He is very helpful and makes sure we understand the material.
(Nathan Hall) This has been my favorite professor so far. His class was very engaging.
(Nathan Hall) I really loved this class and I'm glad I was able to take it. I feel like I learned so much and I'm excited to take advanced behavior and training next semester.
(Nathan Hall) I enjoyed the topics covered in this class, and especially the lab work which helped me understand the topics we covered in class. The end of semester assignments were a bit too stacked together which makes it difficult to complete them in the manner I would like.
(Nathan Hall) The only complaint I would have about this class is that the slides sometimes were poorly translated into a pdf and parts of the notes would be missing. Other than that his enthusiastic teaching style, jokes, and relating the material to real world example made this class very enjoyable!
(Nathan Hall) Course was fun and informative.
(Nathan Hall) He is funny and clearly knows a lot about the material and how to explain it.
(Nathan Hall) I thoroughly enjoyed this course. Professor Hall is a very good professor and very well-informed on the subject he teaches. He was easy to get in touch with when I had any questions about the course or course material. I really liked how he gave us an opportunity to apply the information learned this semester to train actual dogs. Great class all around
(Nathan Hall) Very intelligent and interesting Professor.
(Nathan Hall) I loved this class so much! I found myself looking forward to attending every week.
(Nathan Hall) I enjoyed taking this class and learning about the different types in HAI and learning about the different cultures and their views on the HAI. One thing I would change about this course is instead of having to make LAS an infographic I would have liked to go out to the equestrian center or LAS and actually interact with animals and get hands on experience, maybe do both the infographic and hands on learning.
(Nathan Hall) Very nice instructor, his presentation was rich on information
(Nathan Hall) The class was fun and enjoyable. My favorite day was with the clickers and we had to try and get our group members to do certain behaviors. I also enjoyed the jokes, despite the teacher's belief that we didn't want them.
(Nathan Hall) It was a great class!
(Nathan Hall) This course was great for practicing public speaking. Also, I was glad to hear from the many guest speakers about their advice and experiences regarding conference talks and job talks. Before taking this course, I did not know about the importance of a job talk or how to properly structure one. I am thankful for the learning opportunity!

(Nathan Hall) Dr. Nathan was a very effective teacher overall. He enjoys using personal examples and teachings from his perspective which is what I enjoy in a teacher because it helps me engage and understand more from the lecture slides.
(Nathan Hall) This professor did well teaching during the lectures, he always tried to make a fun time so that it wasn't boring. The one thing I would change or improve is the way he formats his lecture slides. The notes on the slides aren't the best in my opinion, very short and too many with just pictures and not enough explanation. To me it's like he put a little bit on the slide and then would explain more in words during the lecture. But I am the kind of person who likes to look at the slides to study and feel I can't always do that with the way his slides are formatted. I think students would find it a lot more helpful if the slides were formatted how Whitney Crossland does hers. Also, I do like how exam reviews with TA were provided but I do wish we had an exam review check list that would let us know exactly what to focus on ahead of time to start studying because the exam review wouldn't happen until the week of.
(Nathan Hall) Mayer is amazing! He teaches at a steady pace that fully covers the material. It wasn't as overwhelming as long as I attended class and did my assignments. This is my second time taking Ochem and I had a much better understanding of the material with Mayer as my professor.
(Nathan Hall) his explanation and presentation skills were too good
(Nathan Hall) I enjoyed this class. You can tell that Dr. Nathan Hall is passionate about his field of study.
(Nathan Hall) Instructor new a lot about the content and it made it easier to understand
(Nathan Hall) I appreciated that this seminar included guest lectures on important topics related to being successful as a graduate student and research professional. Would like more presentation topics (vs students presenting). I think it would also be useful to develop a checklist for students that consists of items that make for an effective presentation (e.g., readable/appropriate fonts, clean slides, elements to include in graphs), and we can use this to evaluate our peers more objectively. Similar to STROBE checklists for research papers. Guidance for effective presentations is provided by the professors, but I notice that it's not being integrated well by many students in their seminar presentations. Just food for thought!
(Nathan Hall) I appreciated the ability to practice presentations. However, I wish we went over content and examples of how to develop an effective presentation and present data effectively. I didn't feel like I learned anything new, with regards to presentation skills or animal welfare. I thin seminar would be more useful if it was more skills building focused.
(Nathan Hall) I liked the course. The talks related to job preparation were quite valuable.
(Nathan Hall) I love this course, and the way Dr. Hall makes an effort to make sure that everyone understands that's the best part I like about his teaching
(Nathan Hall) topics were hard to follow
(Nathan Hall) I think there might need to be a pre requisite or something for STEM students regarding data analysis with technology. This class was very difficult to grasp with this aspect because I had never used these programs before.
(Nathan Hall) The course was really interesting. The instructor taught us in a fun and engaging manner. He was really responsive and put in a lot of effort to assist me understand the things that were difficult for me.
(Nathan Hall) I think with the research project, there could have been better communication about what to do. Maybe even limit student ideas with the research and how to go about it, I feel like everyone measured something different.
(Nathan Hall) Really enjoyed the class and the professor's teaching style and willingness to talk and engage with the students!
(Nathan Hall) Very engaged with students and encouraged discussions
(Nathan Hall) Both the professor and the TA were kind and fun people to be around. Although not everyone laughed at the jokes they were funny to me.
(Nathan Hall) I liked how he had the class outlined, and how the class was run!! The project is a nice way to add to our grade, and experience and a nice way to end the semester.

(Nathan Hall) Overall, this I learned a lot in this class regarding best practices for conference presentations and job talks. I think the class could be improved by putting the example presentations throughout the semester on Blackboard.
