Text Responses	
Comments instructor or course	
(Ryan Rathmann) Instructor is a cool person, but terrible when it comes to actually teaching...we touch on a subject literally one time and never talk about it again but it'll be on tests. If I flop on the final it'll be the third time he's failed me in this class.	
(Ryan Rathmann) Dr. Rathmann is a great teacher, but I wish that the difficulty of the exams was not such a big surprise.	
(Ryan Rathmann) Possibly one of the hardest classes I have ever taken at Texas Tech, but I think that is because I am not a cow-savvy person. You did a great job make the class fun and enjoyable while teaching at the same time, and I did learn a lot! I was so disappointed when labs were canceled because the hands on experience is where I learn the best. The few labs we did get to do I enjoyed tremendously.	
(Ryan Rathmann) "Shit ain't good" "there are too many big words" Great class Dr. Rathman!	
(Ryan Rathmann) The interpretation questions were extremely helpful!!!	
(Ryan Rathmann) I feel this professor favors students that have AG background. He also uses cattle as the only references in the course, making it hard for those who don't have cattle background to keep up and understand the material. Overall I believe the course is made a lot harder than it needed to be.	
(Ryan Rathmann) Dr. Rathmann genuinely cares about each student and gives his very best each day in providing a second to none education.	
(Ryan Rathmann) Great professor, who really cares about his students!	
(Ryan Rathmann) Hard class and make sure you attend lecture. Ask a lot of questions and take great notes and you'll find yourself in a great spot. Studying last minute is not a great idea. The lecture reviews will be very beneficial.	
(Ryan Rathmann) I believe the content of the course was very well planned out however, the instructor automatically assumed all students had the same level of comprehension in regards to the Animal Science industry when in fact this is not the case. I do appreciate how lenient the instructor was but it would help if he understood that some students do need better explanations of certain topics.	
(Ryan Rathmann) The class overall was good, but there were some things that were not taken seriously with COVID restrictions.	
(Ryan Rathmann) The topic of this class was a little difficult to grasp but I think if it was online I could have understood it better because I wouldn't be focused on all the people not wearing masks and all the microphone issues that occurred.	
(Ryan Rathmann) The class is unusually hard. I would say about 30% of the students I talked to in the class were repeaters in taking the course. I hate this class because 90% of the material is related to beef cows. Noone I know is interested in beef production, I would have liked some variety in animal genetics thought outside of some swine.	
(Ryan Rathmann) I thoroughly enjoyed this class, but it was also very tough for me and others because we had not taken classes such as reproduction, anatomy, and physiology. If there was a simplified version of this class or the classes we never took were required for this class, it would help in our understanding.	
(Ryan Rathmann) Great class! I learned SO much. Dr. Rathmann is a great instructor and gave us useful material.	

(Ryan Rathmann) This course is very challenging and I felt that some of the materials on the exams were not thoroughly covered but overall a very great learning experience
(Ryan Rathmann) This was the most practical class I have taken. I learned a lot of hard skills that I could take straight to the workforce.
(Ryan Rathmann) Easy going guy but he makes the material harder then what it seems. The first lecture was a bit unnecessary because it was a overview of the whole course and it was really complicated to grasp the whole material down when you just got introduced to it. He makes the exam questions harder then the the ones we actually study, he wants to confuse you. He never hands backs our homework or go over it with us so we are unaware if we are even understanding the material correctly. If he posts an answer key, it would be the day before the exam and I feel like that's not enough time to study.
(Ryan Rathmann) Dr. Rathmann is not a good instructor. He assumes everyone has had experience with cattle and uses terms and slang that I do not understand and that has really made me suffer. He needs to go off of the actual terms and not use language he thinks everyone will understand. I do not like this class nor did I like him.
(Ryan Rathmann) one of my favorite professors
(Ryan Rathmann) Great professor overall
(Ryan Rathmann) Dr. Rathmann did a great job teaching this course this semester with all the new rules and regulations for social distancing. He was very helpful and made sure all the students understood the material. I appreciated him letting us come to class face-to-face and I'm glad we weren't forced to go online.
(Ryan Rathmann) I appreciated the use of the microphone in the arena since I am hard of hearing
(Ryan Rathmann) I really appreciate the hands on lab work. The course was given in a way to help us succeed in the cattle industry by teaching us the science behind everything.
(Ryan Rathmann) This course was a good learning experience, but it felt very unorganized at times. Additionally, there was a lack of interest I felt on the professor's part. ALL of our tests were administered by Mr. Cook from the front office in the AFS building. Seeing this made me feel he had a lack of interest in our course, especially if we had questions about specific portions of the exam, we would not be able to seek feedback or guidance.
(Ryan Rathmann) Although this was a challenging course, I have easily learned the most in this class compared to my entire time at TTU.
(Ryan Rathmann) Rathmann is one of my most favorite professors at this University. When asked why I prefer Texas Tech over any University in the state, I always tell people about Ryan Rathmann and how I actually learn from his class. He teaches so well I can confidently say that every time I leave class I have learned something new. He makes sure that we are able to apply his teachings to everyday scenarios rather than having us memorize pages from a book.
(Ryan Rathmann) Learned a lot!
(Ryan Rathmann) sometimes i think he expects a little too much from us.
(Ryan Rathmann) One of my favorite courses. This course takes all the concepts taught in my pervious classes and helps to apply it to real world situations. I enjoyed how hands on the labs were and how tests are challenging to ensure we understood what we are learning. Dr. Rathmann's lectures are interesting.
(Ryan Rathmann) Rathmann is a great teacher plain and simple.
(Ryan Rathmann) This class was one of the biggest challenges I have had in regards to classes, and I'm actually thankful for that. I have had Dr. Rathmann multiple times and you could easily tell this was his favorite class. I LOVED the labs and learned a ton in situations that I had previously never had to deal with, like carcass scanning and palpating. I'm also not one to buy textbooks, but the one for this class I find myself reading often and consulting when I have questions about situations.
(Ryan Rathmann) shoutout for the extra credit, really appreciated it and so does my grade.
(Ryan Rathmann) This course (especially the lab) was the most hands-on animal science class I have taken at Tech. It is also one of the most challenging. This class is definitely beneficial for those wanting to go into the cow/calf business but if you are just a regular student with no prior ranching background knowledge this class is a real challenge.

(Ryan Rathmann) Its a great class However i feel you forgot that not everyone in class have done any Animal science courses and dont know exactly what you are talking about NRM majors have to take this course
(Ryan Rathmann) Great professor
(Ryan Rathmann) Hard. The number one stressor this semester. It was definitely useful information and a lot of information, but it was hard. As always, Rathmann is extremely smart. I think that there could have been 2+ people with the 90 on the last exam. I was asking so many questions, but yet, he didn't think about anyone except for the most recent question.
(Ryan Rathmann) grades were an issue where most had to guess what they had for most of the semester since a grading scale wasn't included in the syllabus. We were verbally told later how it broke down but for a while most of us were anxious about the lack of information.
(Ryan Rathmann) Although incredible enjoyable to listen to and engages the class, he isnt the best at helping his students understand the material. He is obviously very knowledgeable, and I learned a lot in this class, but I had to teach myself the majority of the information.
(Ryan Rathmann) This class was a great learning experience and I definitely learned a lot, but I think Dr. Rathmann talks a little over everyones head and makes it hard to understand. I did well in the class, but it took a lot of teaching myself to get there.
(Ryan Rathmann) tests could be made in a more understandable way for the students.
(Ryan Rathmann) This is the second time I have taken this course. The material is very difficult to understand and the tests are even worse. Even when talking to Dr. Rathmann about where my struggles lie and hours of studying with other classmates and by myself, I still do not quite understand the information and feel like there is no other help being provided. Grades are not inputted in a timely manner to access how you are doing on assignments and he does not effectively answer emails. The fact that he is mostly never in his office makes it nearly impossible to talk to him about anything class related. I strongly feel like there should be a second professor to teach this class.
(Ryan Rathmann) I struggled to retain information we learned due to switching between topics and teachers so often.
(Ryan Rathmann) The timeline for the group project was too tight.
(Ryan Rathmann) I loved this class even though it was pretty difficult .
(Ryan Rathmann) May be beneficial for students to get a review for tests
(Ryan Rathmann) I loved this class from the beginning and wanted to learn so much! I learned a lot in the first half of the semester.
(Ryan Rathmann) The Grad student that handled most of the Meat side was not the nicest. He did not help very much at all and so I stopped asking him for help because it always seemed like he didn't want to help or cared.
(Ryan Rathmann) This was a very hard class but I know Dr. Rathmann did his best in trying to teach us everything. I wish for the final he would provide the allotted time that we are supposed to get from the university. I also think the first test shouldn't be as hard if he knows the information is hard then try to prepare us more so we can get a better average. Thank you for your effort though i learned a ton in the class and will use it in the future.
(Ryan Rathmann) Grades were not put in until last minute, and most of the exams did not cover the material that was supposed to be covered. Overall the class was very unorganized and scattered and wasnt fair to the students
(Ryan Rathmann) Fairly challenging, but enjoyable. I don't think I learned any useless information for this class.
(Ryan Rathmann) I wish there was a class for those of us that did not grow up in FFA, 4H, or with family in the industry for each production class. Then the students who are uncomfortable this class would just be hands on and allow them to become more relaxed.
(Ryan Rathmann) This was probably my favorite class I have taken at Tech. Rathmann did a great job teaching, I felt adequately challenged, and truly interested in applying the coursework later on.

(Ryan Rathmann) Was this course hard? HELL YES! But did I learn: HELL YES! Not gonna lie I was scared out of my mind to take this course. Overall I thought Ryan did a great job. Unlike some professors he really didn't throw us a curveball when it came to the exam (thank Jesus). Things you do right: -extra credit/ work sheets - extra test reviews - having the exams multiple choice (!!!) Things that could be improved: LAB: Lord Almighty I don't even know where to begin. I FR think lab is 10x harder than lecture. Please, please please make most of the lab exams multiple choice. I understand there are some questions that cannot be, but however most can. Also please make the final optional overall. Most people in this class are just happy they are graduating and totally ok with taking the C.
(Ryan Rathmann) This has been one of the hardest classes I have ever taken at Texas Tech. I think professor Rathmann needs TAs for a class that big and for as difficult as it is. There should also be tutoring offered for this course. Since there is not I, along with another student had to hire a tutor. The only good thing about this course is Rathmann offers extra credit.
(Ryan Rathmann) Dr. Rathmann is an incredibly knowledgeable individual when it comes to anything cattle related. Before taking this class, the closest i had ever been to a cow was petting one over a fence at a buddies ranch. Since taking beef production with Dr. Rathmann, not only did i get to have even more hands on experience with cows...i even got some hands IN experience. Truly a one of a kind class here at Texas Tech
(Ryan Rathmann) Although his lectures can be dense, Dr. Rathmann is definitely one of the best professors I've taken.
(Ryan Rathmann) Rathmann covers a lot of material within a short period of time. It can be difficult to prepare for exams when you are expected to have a full understanding of how every topic works.
(Ryan Rathmann) Great teacher. Does a good job of making sure students learn the material and does so from a practical, real world standpoint.
(Ryan Rathmann) I really enjoyed this class and learned a lot. The lab and field trip were definitely my favorite and I got a lot of good hands on experience.
(Ryan Rathmann) Dr. Rathmann does an excellent job of preparing students for their future beyond the university by employing critical thinking skills and application of subject matter in real-life examples.
(Ryan Rathmann) Fun clasd
(Ryan Rathmann) Great class
(Ryan Rathmann) Great class
(Ryan Rathmann) I enjoyed the class, and learned a lot. However, the class wasn't very organized.
(Ryan Rathmann) Fun course.
(Ryan Rathmann) I learned a lot and was glad I took the course!
(Ryan Rathmann) Dr. Rathmann has been an inspiration for me since my freshman year and this class did not disappoint. It has been challenging and tested my abilities as a student but Dr. Rathmann has made this class enjoyable and ACTUALLY fun to learn about.
(Ryan Rathmann) Great class, great professor. Learned a lot... very valuable and practical class for future cattle producers.
(Ryan Rathmann) I really enjoyed the class and the labs with it being hands-on and really being able to experience how things are done.
(Ryan Rathmann) challenging course, but class is never "boring"
(Ryan Rathmann) I was amazed when I found out that Dr. Rathmann did not have a degree in the field of breeding or genetics. His breadth of knowledge is vast on this subject regardless of this fact. I found this class challenging and required quite a bit of work but I believe it was a valuable learning experience. Some people dislike his teaching style because the class is a very rapid-fire, white-knuckle-typing kind of a class but that is simply because of the large amount of information in advanced breeding and genetics.
(Ryan Rathmann) Dr. Rathmann is such a stud, he is a fantastic teacher sure he is a tough grader and has difficult classes but he is an undeniable expert. I feel extremely prepared for Beef Production in the future this class is a must-take for anyone looking to do production agriculture with cattle. Give this man a raise asap! Also, side note, The King of Dad Jokes, makes the class fun and light and keeps things interesting.

(Ryan Rathmann) The class itself was okay. I felt the professor does not understand that this is just one of many of our classes, not our ONLY class. He chose to meet outside of lecture or lab scheduled times for certain events and he kept us late past lecture almost every day and lab occasionally. He should try to understand that we are college students with multiple classes, not just his, and a whole life outside of that.
(Ryan Rathmann) Very hands-on and engaging course
(Ryan Rathmann) To be honest Rathmann made this class super hard, yet even though my grade doesn't reflect how much I study for this class, i still learned a whole lot. It was hard, but learned a lot.
(Ryan Rathmann) This has been my favorite class at Texas Tech by far. I learned so much in every lecture and lab, and Dr. Rathmann genuinely cares about the students grasping the material which is refreshing.
(Ryan Rathmann) It would be helpful for the course to be taught and explained on the undergrad level rather than as if I were getting a PhD in genetics.
(Ryan Rathmann) This was a class that I was really looking forward to considering my main focus after I graduate will be livestock breeding. At times I did not feel that I was being taught the information at the undergraduate level and more so on the side of that I had been in the industry for years. It was also difficult to envision myself doing well in this class when we were expected to do horrible on the exams. All in all, I enjoyed the labs and everything that I learned.
(Ryan Rathmann) This class is very hard to understand and I feel like it is taught very broadly. It is difficult to know what to study in order to pass.
(Ryan Rathmann) There's no doubt this class is extremely difficult compared to a lot of others, but in the end Dr. Rathmann did good given the pace required to fit all of this info into one semester.
(Ryan Rathmann) Great professor and great class. Loved learning and going through the class.
(Ryan Rathmann) This class is probably the most beneficial class I've taken at TTU. The things I learned will be useful to me for many years to come.
(Ryan Rathmann) This course is very challenging. The sudden changes in quizzes and tests is extremely difficult to cope with especially with other classes. I felt that the teacher was very passionate but it was difficult to get a hold of him. He responded to one email all semester when I sent him a minimum of 5 throughout the semester. This class was very interesting and a great experience. Definitely continue to offer and use extra credit. This class would have also been very beneficial to have the grades put in as we go. It was hard to not know what I had in the class and plan accordingly as I desire an A.
(Ryan Rathmann) Dr. Rathmann gave us a lot of insider knowledge on all species of livestock judging. The class was very informative and I learned a lot.
(Ryan Rathmann) I really loved all the hands-on things we did.
(Ryan Rathmann) rathmann is such a smart professor but isn't the best at relaying the hard information to us. his tests are extremely hard, and overall the class is extremely hard.
(Ryan Rathmann) Ryan Rathmann is the best professor!! love his classes!!
(Ryan Rathmann) It was a lot of information on the first exam.
(Ryan Rathmann) Wish we had more PowerPoints or notes to copy to keep us organized between each species.
(Ryan Rathmann) This was and is the hardest class I have ever taken but I run a cattle operation so it was neat to learn all of the science behind it, but defiantly a very challenging class.
(Ryan Rathmann) Very good and making sure the class understands the material.
(Ryan Rathmann) He challenges us in a good way. We are better students because of his high expectations.
(Ryan Rathmann) Challenging class but taught very well
(Ryan Rathmann) I enjoyed the class but the class was taught like everyone had previous experience with genetics and breeding. I knew very little coming in and had to go to a lot of different resources to learn some of our objectives.

(Ryan Rathmann) This course could be very hard for students who doesn't have any experiences in ranch or managing the cattle with family something. But it was nice to learn about it.
(Ryan Rathmann) Solid
(Ryan Rathmann) Professor Rathmann should not teach this course. While it is clear he is very knowledgeable in the field, he is not suited to be a professor. He does not teach well and that is obvious in his class/exam average(s). When a professor states that no student ever has an "A" in his course and he has to give massive curves at the end of every semester is very telling and ridiculous. He picks favorites (aka all of his livestock judging and showing students) and you can tell he is not very fond with others whom do not fall into that category. He never responds to emails which is incredibly frustrating and unprofessional for a professor. Instead of us focusing on our ending course grade, he makes it a competition between peers. He tells us to "worry about our ending rank" in the course and not what our ending grade is. That is completely absurd and not fair in any way.
(Ryan Rathmann) Hardest class I have taken. Also the worst class I have had as far as letting student know where they stand in the class.
(Ryan Rathmann) Super thankful this class was able to be taught face to face because I don't think I would have been able to pass this class without asking questions.
(Ryan Rathmann) Beef production taught me many valuable lessons about the industry that I will apply later on in my career!
(Ryan Rathmann) Difficult class but loved the material
(Ryan Rathmann) I really enjoyed this course. It has truly been one of my favorite production classes at Tech. We have learned so much and Rathman did a great job covering a ton of material but also making it applicable to what we will need to know in the real world. My only complaint about this class was at times it felt as though our time was not respected. Whether that be all of us showing up to class and then finding out we didn't have class or being told we have an assignment due so you stay up and put the time aside to complete it and then not turn it in or have readings assigned for quizzes and you do it and then there is not a quiz in class.
(Ryan Rathmann) Ryan just likes to ramble, which is fine but he ends up keeping you late in class. And to meet the deadlines and cover all the material for tests, he has to rush through some sections.
(Ryan Rathmann) Dr. Rathmann has a way of teaching that I understand very easily. I found this class to be the perfect level of difficult and I enjoyed the content I learned in this class. 9/10
(Ryan Rathmann) great course had a lot of fun and learned a lot
(Ryan Rathmann) Great professor
(Ryan Rathmann) great teacher
(Ryan Rathmann) A difficult course that needs updated review material as its from previous years.
(Ryan Rathmann) With more visual Aids for the visual learner, this could be a much more effective course. Dr.Miller has a meat judging book, and if Dr.Rathmann could do something similar the concepts would be much easier understood.
(Ryan Rathmann) This class was very fun as well as educational.
(Ryan Rathmann) The teachers were very good. They knew there material very well.
(Ryan Rathmann) This course was unorganized and there was a lack of communication throughout the semester.
(Ryan Rathmann) I really enjoyed this class, I think that Dr. Rathmann does a great job of presenting the information and making sure we understand it.
(Ryan Rathmann) I enjoyed the class but i feel that the professor tended to get off-topic and seemed to overcomplicate topics in the lectures.
(Ryan Rathmann) The hands on experience was very helpful.
(Ryan Rathmann) This class was extremely helpful in preparing me for the possibility of being on the Meat Judging Team. Dr. Rathmann and Dr Miller were very informative and effective teachers.

(Ryan Rathmann) This class genuinely scares me every time I walk in it. That being said it has been the hardest class I've taken and the one I have enjoyed the most. Professor is great at relaying and teaching the information while being a very nice and understanding man. Thoroughly have enjoyed both professor and class.

(Ryan Rathmann) I feel like he went too fast for me. Either that or he talked way over my head. Overall useful class that I will use in the future.

(Ryan Rathmann) Great Teacher

(Ryan Rathmann) Professor is overwhelmed with teaching doesn't have time for students. Notorious for never answering emails or communicating instructions effectively. He would lose track of papers turned in frequently and never update grades. Nobody in the class ever knew if they were failing, close to it, because it would take weeks to see any grades. Good person that shouldn't be teaching.

(Ryan Rathmann) need to be more updated on blackboard

(Ryan Rathmann) I learned a lot of new and unexpected things and even tho I wasn't quite excited about it I ended up really enjoying it and I wish we could've finished out the year. I had great professor and TA's

(Ryan Rathmann) It would have been really useful if powerpoints were provided. Since the lessons changed week to week, a refresher would have been nice.

(Ryan Rathmann) This course was extremely rigorous (as stated by Dr. Rathmann on the first day of class). Genetics is definitely a hard concept to grasp for most, but Dr. Rathmann laid out the class in a way that flowed well and provided a nice learning environment that gave students the opportunity to thrive. The exam reviews given were helpful whether they were in person or on paper, and that is an aspect that I really appreciated about the course. Additionally, I liked how the lab and lecture remained separate for the most part. They definitely corresponded and the lab helped with the lecture material, but I feel like the lab section was best learned when separate from lecture exams.

(Ryan Rathmann) Any class I have taken with Dr. Rathmann has been useful in the sense that I actually retained a lot of information, and this one was no different. Exams can be challenging, so studying in advance is absolutely imperative. The field trip to RA Brown was a highlight of the semester and something I will always remember. Along those lines, the labs were extremely hands on to prepare students for life in the livestock field. Dr. Rathmann often gave us examples of test questions during lecture which was super helpful. Like I mentioned previously, this has been one of (if not the) best class I have taken in my college career in terms of the knowledge and experience gained.

(Ryan Rathmann) Dr. Rathmann expects too much from his students. Animal Science majors are required to take 3 production courses, and he assumes that if you are in his production course, you already have a vast background in the beef industry. He gives no general beef production background explanation at the beginning of the course and just jumps in using terms he assumes everybody knows. He also randomly assigns fairly long documents to read and then gives difficult quizzes over them. He gives opportunities for extra credit, but it's only enough to where you will pass the class.

(Ryan Rathmann) Dr. Rathmann is a very good professor and helped me through any problems or questions that I had without hesitation. His class was enjoyable while some of the material was difficult, he made sure to explain the material in different ways so everyone could understand. I enjoyed this class.

(Ryan Rathmann) This course is fun, educational, and informative. Dr. Rathman is a great professor who lives what he teaches. I love the way this course is set up and how real life the information is. Rathman does an amazing job of preparing you for real life situations and immerses you in the beef production industry. My favorite part of the course is learning about the reproductive techniques that are used in the beef cattle industry to produce more for the producer in most efficient way possible. I am taking the AI course that he teaches this summer and I am looking forward to being able to learn from him once again.

(Ryan Rathmann) I really enjoyed the personal teaching habits that Dr. Rathman has. He makes sure to give you just as much, if not more, effort than you are giving him. Great professor.

(Ryan Rathmann) I personally like Ryan's teaching style. Everything was very conversational which felt more engaging than other lecturers. Very knowledgeable instructor.

(Ryan Rathmann) I was looking forward to class even while knowing it was going to be difficult. I felt as if I could have retained the knowledge better if the tests were easier to understand. I was concerned about passing exams, which I barely did, rather than learning. Rathman is an excellent teacher.

(Ryan Rathmann) This course is a lot of material and exam-heavy. Portions of exam material are not lectured on but posted online, as well as the exams are content-heavy. Dr. Rathmann was absent frequently throughout the semester and lectures move around frequently. The trip was a great experience, but overall the course is time-consuming and difficult. Grades took forever to be posted, nothing in the grade book till mid-April.

(Ryan Rathmann) Very difficult course but Rathmann teaches it well and gives the chance to learn if you would like.

(Ryan Rathmann) The professor and course was very intriguing especially since it's in an area that I want to pursue personally in the future.

(Ryan Rathmann) I wish the professor would have stuck closer to their syllabus and some of the online homework/tests during the quarantine were very challenging.

(Ryan Rathmann) Dr Rathmann worked hard to make sure that people with little/no background of judging could still keep pace with the course. I think it would have been beneficial to have a brief lesson about cattle/sheep/pig breeds at the beginning of the semester because there were a lot of times that Dr Rathmann would refer to an animal by its breed and some of us didn't know which one he was referring to. Overall, I really enjoyed having him as an instructor.

(Ryan Rathmann) This class was very useful and everything we learned was directly applicable to real life. I really enjoyed the review for Exam 3 and think that implementing reviews for all exams would be very beneficial to students taking this class. I really enjoyed the labs as well and was able to apply what i learned in real life at the vet clinic that I work at.

(Ryan Rathmann) It was an interesting course, the subject itself is just difficult. Rathmann is very intelligent and a great professor, but the exams and homework definitely require lots of time, knowledge, and effort.

(Ryan Rathmann) I thoroughly enjoyed Dr. Rathmann's class, and I have learned a lot this semester. He is a great instructor, and I loved getting to go on the field trip at the end of the semester. Something I wish Dr. Rathmann had done is at the beginning of the semester stress the rigor of the quizzes and tests, especially the quizzes. The tests I studied many hours for and felt decently prepared; however, "short quizzes" were something my classmates and I typically performed poorly on because of the detail in the questions for a paper we received typically only 24 hours before being questioned on. I know if I were to be in this class again I would want to be given more time to study for these quizzes. Maybe he could assign reading assignments each week so we had ample time to prepare before the highly specific quiz questions.

(Ryan Rathmann) I feel like I learned a lot about Meat and Livestock evaluation, and I found everything I was being taught to be very valuable in the field my classmates and I are pursuing. I miss going to this class twice a week and wish the semester had not been cut short.

(Ryan Rathmann) I have never dreaded a class more. I wish most of the labs did not involve palpations. The field trip was great, and humor in lectures was appreciated. Fill in the blank questions were awful, but do not remove them as previous classes have had to suffer through them now so future classes should have to as well. This is the type of class that may cause you to fail, but at least it teaches a lot. I am glad this class is over.

(Ryan Rathmann) I appreciate how practical and real this course was. I am so glad I took it and wish there was more time to learn more!

(Ryan Rathmann) This class was very eye-opening and I appreciated it a lot. Although some days the class block felt very long, I am so grateful to have the experience of taking this course. Instructors were excellent and I always looked forward to the days they were teaching as opposed to the TA's.

(Ryan Rathmann) The exams and testing materials do not always reflect what is taught in class and there are a lot of outside of class requirements. Prior knowledge of cattle rearing is a requirement, or else you will do poorly in class.

(Ryan Rathmann) It was very hands on, which allowed for me to better understand the material that we were presented with.

(Ryan Rathmann) Dr Rathmann is a great professor.

(Ryan Rathmann) Although this class is difficult, Dr. Rathmann is a great professor and is clearly very knowledgeable on the topic.

(Ryan Rathmann) Favorite class I have taken here at Tech. Dr. Rathmann has been fantastic.

(Ryan Rathmann) Loved every second of this class! Would take it again in a heartbeat.

(Ryan Rathmann) Very Informative, I'm glad that there was so much hands on experience that I have not been able to experience.

(Ryan Rathmann) I thought that this class was good in all aspects and Dr. Rathman does a great job teaching it.

(Ryan Rathmann) This class was extremely difficult, and studying for his exams is almost impossible. His objectives were clear but the way he instructed the material was not the best.
(Ryan Rathmann) I really enjoyed this class because it was out of my comfort zone. It open my eyes to a whole new world that I would have never known if I didn't take this class. I have a new respect and admiration for farmers.
(Ryan Rathmann) I really enjoyed this class. I have a new respect for cattle but in overall for all animals.
(Ryan Rathmann) I emailed various times throughout the semester with important course questions, and they were seldom answered or acknowledged.
(Ryan Rathmann) Dr. Rathmann is the smartest man alive when it comes to any form of livestock evaluation. He is the best at what he does therefore making him the best to learn from. He is an excellent teacher; I learned so much from him this semester.
(Ryan Rathmann) I loved this class, It was my favorite class I have taken at this university. I taught me so much that I can take and apply in my future career as a veterinarian. Dr. Rathmann was the most amazing professor.
(Ryan Rathmann) Dr. Rathmann did a great job at teaching us how to grade livestock.
(Ryan Rathmann) Overall this class was challenging however it was rewarding. I do believe there needs to greater emphasis on buying the textbook as it greatly aided me in learning the material to a greater degree as Rathmann was tied up with being gone for livestock judging during the thrid unit. Additionally, during this thrid unit Dr. Jackson came and taught on crossbreeding i feel there needs to be more supplemental teaching on this topic or utilization of the textbook. Other than this I believe it was a good challenging class that if you put in the time to engage and learn all you can it is a very doable class. Thank you for all you taught me and that will help assist me in my family and personal operations .
(Ryan Rathmann) Class was very informative
(Ryan Rathmann) Great fun professor, cares about his students. make learning engaging and interesting. very understanding
(Ryan Rathmann) This professor makes this class unnecessarily difficult and wants students to fail. He has said things like "I would automatically fail the bottom 50% of the class if I could" and "Only a few people get above 70s on the exams." He doesn't respond to emails. He goes through the material so quickly that it is nearly impossible to comprehend or learn anything. He's a nice person outside of class but as a professor, I think he could teach better and want to help his students learn instead of hoping the majority fails.
(Ryan Rathmann) I really appreciated the extra time that Dr. Rathmann gave when I asked for extra help on a subject or the content provided.
(Ryan Rathmann) This was my favorite part of the course. I have wanted to learn under Dr. Rathmann since I came to Texas Tech. I have learned so much more regarding the livestock industry and pricing and I never felt intimated when asking questions.
(Ryan Rathmann) Class was taught well and was very informative.
(Ryan Rathmann) You learn a ton in this course. The exams are challenging, but beneficial for education
(Ryan Rathmann) Best class I have ever taken at Texas Tech. I learned more in this week than the entire semester in some of my other classes. I'm a big fan of the professor and the course material.
(Ryan Rathmann) Cocky and that really reflects in the way in teaches and handles his class. He's funny but that's the only redeemable quality. Expects you to know information from previous classes, which is fair, but he fails to realize that many of us haven't taken the same class or not required to
(Ryan Rathmann) Loved this class!
(Ryan Rathmann) Maybe if there were a couple more homework assignments, aka a few give me points, I would have had more encouragement in this course and feel stronger about the material I learned.
(Ryan Rathmann) I loved learning how to evaluate livestock.

(Ryan Rathmann) Explain group project earlier to allow students the chance to complete it before the projects from all other classes start.
(Ryan Rathmann) Great teacher!
(Ryan Rathmann) Liked Dr. Rathmann as a person, but he assumes his students have taken several classes that are not required, and teaches as so. He and his class seem to favor students that have grown up on a ranch, and the allotment of extra credit shows it.
(Ryan Rathmann) Dr. Rathman is the best thing about going to school at Texas Tech.
(Ryan Rathmann) This course was greatly influential in my learning experience, especially since I want to go into livestock production as a future career. Rathmann was an effective teacher that allowed many extra credit opportunities to make sure we succeed.
(Ryan Rathmann) Absolutely loved loved this class!! I learned so much more than just AI! I am so happy I took this class and Rathmann is an amazing teacher and understands that a lot of us have no experience with cattle! Amazing class and was my favorite
(Ryan Rathmann) I enjoyed this section of the class greatly. I liked looking at livestock with a more industry perspective as opposed to a show perspective.
(Ryan Rathmann) Course was very hard. Grades are a disaster. Only hope is to pass.
(Ryan Rathmann) Expectation versus reality is often extremely disappointing. It's no secret amongst students enrolled in an Animal Science degree plan at Texas Tech University that the semester they must take "ANSC 3402- Animal Breeding and Genetics" will be a challenging one; almost any student here will tell you that. ANSC 3402 has long been noted as one of the most challenging courses in Animal Science. After finishing the course for myself, I won't disagree with that sentiment; however, it is not the course material that makes this class challenging. This was the single most disorganized, outdated, and unthoughtful class I have taken to date at TTU. It was taught by a professor who shows so little care about course curriculum and student success that little updates to course assignments and materials have been made since a decade ago in 2013. Dr. Rathmann's blithe attitude towards class has an equal effect on student success. I have watched a significant decline in my peers and my own personal academic drive to care, just as equally as we have seen our instructor incompletely teach lecture content, consistently push assignment/exam dates forward, and have a blasé attitude towards turning in assignments. Why should students care about completing coursework accurately when the fate of this work is a student assistant plugging in 100s in the grade book as a mere participation grade? Despite the lack of seriousness and chaos of the course framework, it is perhaps the greatest irony that midterm exams show no mercy. These 100-question exams are rigorous and, as claimed by Dr. Rathmann's "exam philosophy", are supposed to challenge the student to "analytical think and apply concepts." I respect this, I have had many courses where simply memorizing course content was not enough to score well on an examination, yet where was this expectation asked of us students in class on a weekly basis? Surely, it wasn't students being able to copy the previous work of TTU Alumni dating back to 2014 and receiving 100s on course assignments. Surely, it wasn't working out a singular math problem on the board once a week in lab and expecting students to execute this again two months later on an exam. But perhaps what seems to be most telling is that a few days ago, we received the news that our final examination in ANSC 3402 will be a 50-question fill-in-the-blank vocabulary test. Ask yourself if that follows Dr. Rathmann's claimed philosophy on examinations. Students need consistency, expectations, and, at the very least, organization in the courses that they pay thousands of dollars to take. If applied analytically thinking about animal breeding and genetics is what this course intends to do, then someone needs to be held accountable for driving this objective because it is far from what is happening.
(Ryan Rathmann) I really enjoyed the class and I thought you did an excellent job communicating livestock judging/terminology in a way that students could easily understand.
(Ryan Rathmann) Dr. Rathmann is an amazing professor, and I learned so much through his artificial insemination of bovine class!!
(Ryan Rathmann) Very knowledgeable professor and taught very well.
(Ryan Rathmann) Great instructor.
(Ryan Rathmann) I learned so much in this class. The syllabus was well outlined and followed. The class was MEGA hard, but I learned a lot.
(Ryan Rathmann) Really enjoyed this class! Dr. Rathmann is a great professor!
(Ryan Rathmann) One of the hardest professors I've had, but I have learned so much from the classes that I have taken with him.
(Ryan Rathmann) This class was very challenging, however, I believe that I benefited from the challenge of the course.

(Ryan Rathmann) Dr. Rathmann is an amazing professor, who has always been very engaging in class. His class is hard, that has nothing to do with him but just mainly the material is difficult to understand at times. I did feel on occasion that he would talk to us like we also had our phd in genetics, so sometimes I was not catching on to what he was saying, but once again this was mostly just the material and my personal preference.
(Ryan Rathmann) This class was by far my favorite class this semester. I enjoyed learning about judging livestock.
(Ryan Rathmann) I really enjoyed Dr. Rathman as a professor. He is very kind, funny, and always willing to help those who need it. Overall, he is a wonderful person, but his class was challenging for me. I struggled in the course a lot, and I tried so hard to get a good grade. It seemed no matter how much I studied, I never got the grade I was hoping for. That being said, anybody who is anticipating being involved in this field or has a background working with cattle should definitely take his class. Dr. Rathman has a passion and is thoroughly knowledgeable in this subject making him an incredible mentor.
(Ryan Rathmann) I really enjoy the effort that Dr. Rathmann puts forth in class. I understand that genetics is extremely hard and takes a lot of time to study for but he really tries to make it easy on us. I do believe that attendance is essential to do well in this course but if you attend, he will make sure you do well.
(Ryan Rathmann) Dr. Rathmann's portion was a little bit confusing and we didn't have a chance to really practice our formulas or judge livestock before our live examination. But it was an interesting class.
(Ryan Rathmann) great time strong lecturer kept you involved in information.
(Ryan Rathmann) Had a good time this semester
(Ryan Rathmann) Hardest class I've ever taken, teacher kind of rambled sometimes and it was hard to follow.
(Ryan Rathmann) Great instructor, I learned a lot!
(Ryan Rathmann) I appreciate his enthusiasm about the course materials and the practical application he gives us
(Ryan Rathmann) I appreciate his enthusiasm about the course materials and the practical application he gives us
(Ryan Rathmann) He is a super-advanced professor however not everyone can learn the way he teaches. I think he can improve by doing different teaching strategies, and making lectures more interesting as well as understandable. Furthermore, his exams are way harder than what he teaches and needs to offer a better review if the exam will be a certain way.
(Ryan Rathmann) Extremely smart guy and very personable
(Ryan Rathmann) Ryans the OG he's the man! Ol Dr. Logic is the all-knowing beef man cows might not know what feeds they need to eat but he does!
(Ryan Rathmann) The ideas learned in class where often not what the test was.
(Ryan Rathmann) Dr. Rathmann is such a smart man and really knows everything about the cattle industry. Although the class is very difficult I am glad I took it and have learned so much.
(Ryan Rathmann) Have learned so much!
(Ryan Rathmann) Professor are very smart and were effective.
(Ryan Rathmann) Class is very hard, Rathmann is very knowledgeable and explains things well.
(Ryan Rathmann) I loved the class! I learned so much!
(Ryan Rathmann) Before taking this course, I had heard quite a few horror stories about its difficulty. Although I found it challenging, I really enjoyed this class. If you work hard and stay caught up with the course material, you can be successful. I thought the content was fascinating and Dr. Rathmann is very knowledgeable on the subject. My only complaint would be that Dr. Rathmann does not communicate via email with the students as much as I think he should. Otherwise, I greatly enjoyed taking this class.
(Ryan Rathmann) My only complaint is that he waited so long to assign the group projects. Other than that I greatly enjoyed the class and the things I learned.

(Ryan Rathmann) Hard class but good professor
(Ryan Rathmann) A very challenging course.
(Ryan Rathmann) Rathman did a great job teaching this course! I learned a lot of new information.
(Ryan Rathmann) Rathmann is too smart for his own good, and he ends up being really confusing sometimes. overall he did alot to help us do good.
(Ryan Rathmann) Dr. Rathmann is one of the most devoted professors I have ever had. I have worked on several ranches and yet he has still provided some of the most beneficial information I have ever received in terms of raising cattle. I wish the best for him and I have enjoyed every second of class.
(Ryan Rathmann) Very good
(Ryan Rathmann) Dr. Rathmann does a good job in making sure all his students are successful in his class. But this class is hard, there is a lot of information and if you don't know beef cattle already get ready. This class is challenging and a lot of work, but enjoyable. I found Dr. Rathmann to be fun in class and really engaging with students. His labs are some of my favorite labs to attend to. He is also a good person and I have enjoyed getting to know him and taking his class!
(Ryan Rathmann) I was able to learn more about genetics and will use this knowledge when breeding cattle
(Ryan Rathmann) N/A
(Ryan Rathmann) Very little instruction given on assignments. Wish there wasn't a big focus on cattle as most of us do not have a background in cattle breeding and genetics.
(Ryan Rathmann) While at times it felt like certain topics were made out to be a bit more complicated than they were I found this to be one of my favorite courses I have taken even though it required more effort than some. This course may have been challenging, but I believe we were given all the tools necessary to accomplish a good grade if thats what one wishes to achieve you just had to be willing to show up and apply yourself. You can tell there is a true passions for Ryan to teach this course as it shows when he is in the classroom and that alone makes it that much more enjoyable as a student to want to learn more. I would absolutely recommend this course to any peer if they are willingly to want to learn and become a more successful student because of that challenge they are being given.
(Ryan Rathmann) This class is incredibly difficult. Dr. Rathmann does not do a good job of breaking down information into digestible pieces for those without a background in cattle. Because he supposedly gives a curve at the end of the semester based on your performance in class, it is impossible to tell how you are actually doing. He has obvious favorites in the class, the class test averages are consistently below a passing grade, and he has offered extra credit to only people with backgrounds with cattle. The material is difficult, but the way it is taught makes it incomprehensible. I, unfortunately, will leave this class not really understanding anything about genetics.
(Ryan Rathmann) Very frequently absent. Doesn't respond to emails. Doesn't answer questions. Expects students to learn complex math in an unrealistic amount of time. Easily annoyed if students don't understand. Shows favoritism to students he knows personally.
(Ryan Rathmann) I wish he would answer is emails and let us know when a final would happen and to put grades in blackboard so we dont have a 0 all year
(Ryan Rathmann) Good course and fun lab.
(Ryan Rathmann) Did a great job with the class. I learned a lot and want to continue learning about this subject.
(Ryan Rathmann) I've never been in FFA before, but I learned a lot in this course! I wish there was more practice with Rathmann rather than Miller. More than half of the semester was meats and a quarter is livestock. I wish there were more opportunities to practice for the livestock final.
(Ryan Rathmann) I wish they did a better job at communicating with the students about assignments.
(Ryan Rathmann) He is very easy on grading, and he is very willing to help you if you aren't comprehending something in class.
(Ryan Rathmann) By far one of the most enjoyable classes I have taken in my time here at Texas Tech. I learned more than I can probably even remember learning as well as getting extreme insight into main stream beef production. I will use the tools I have learned in this class for the rest of my life. Dr. Rathman taught this course very effectively and made the course work as interactive as possible.

(Ryan Rathmann) The structure of this class was slightly chaotic. I found it difficult to learn and retain information due to the lack of consistency in teaching.
(Ryan Rathmann) The level of genetics covered in this class is fairly easy to understand if properly explained and the math required is not overly complex, but it is made exponentially more difficult by the poor instruction. Much of his material is geared towards students with a background in certain livestock species while neglecting other species and students without an AG background. He also admits to not working through his own tests, sometimes resulting in questions that are not possible to answer. Overall, he takes what should be moderately difficult course material and makes it unnecessarily convoluted. Additionally, his class management is disrespectful of his students' and other professors' time, and I have also found him to be disrespectful to his students on a personal level.
(Ryan Rathmann) loved this class
(Ryan Rathmann) At the beginning of the semester I was very doubtful about my abilities in this subject but after the teachings I feel much more confident.
(Ryan Rathmann) This class was very interesting but also very difficult! One of the main things I would recommend is to add more quizzes to help "boost" our averages, and also allow us a study aide for our exams. The teacher always made learning fun and kept us listening
(Ryan Rathmann) This class was a bit all over the place, but I enjoyed the learning experience and loved the hands on activities. I would have liked it to be better organized but I enjoyed this class
(Ryan Rathmann) This was my third class with Dr. Rathmann as my professor, and I am still impressed with his wealth of knowledge in the subjects he teaches. I very much enjoy Dr. Rathmann as a person and teacher, but there are times when what he said, and what was on the test were not aligned, or there was a miscommunication. I hope to have more classes with him, and I thoroughly enjoyed this class and found everything essential to the beef industry.
(Ryan Rathmann) I thoroughly enjoyed this class and the professor. It was a little unorganized at times, but still a great class
(Ryan Rathmann) Dr. Rathmann is a really cool guy to get along with outside of the classroom. Inside the classroom I was constantly confused and felt like I was behind the entire time because of he lack to communicate.
(Ryan Rathmann) Great Professor! Does not have a big ego like most people in his position.
(Ryan Rathmann) Lots to learn in this class.
(Ryan Rathmann) None
(Ryan Rathmann) I have learned so much from Dr. Rathmann. I did truly enjoy his class. He is there to make us learn something and help us when needed. He can be a difficult person to work with at times if you do not suck up but I think he means well. I did not enjoy how one of his Grad students was always up his rear and trying to teach us but was not helpful at all. Both of them can also be smart asses too often when it is not necessary.
(Ryan Rathmann) This course was taught in the least effective way. Everyone I talk to including myself is either borderline failing or is failing. The tests make up a majority of our grade which is understandable, but when the tests are unnecessarily hard and unnecessarily long it makes it extremely hard to do well. The amount of assignments we had to turn in was ridiculous considering they are only worth 10% of our grade. He also does not respond to e-mails which makes it hard to get help. I have never struggled so much with a class, it makes me wish I had just taken o-chem.
(Ryan Rathmann) good class
(Ryan Rathmann) Was kind of rushed on some parts
(Ryan Rathmann) Livestock Judging Team 2021-2022
(Ryan Rathmann) Dr. Rathmann certainly knows his stuff, he is extremely knowledgeable and I was able to learn a ton of new information just by listening to him talk in lecture. I really enjoyed this class and I loved learning everything that was taught.
(Ryan Rathmann) Really great at what he does, I wouldn't change a thing, overall great class, I never thought I could ever learn what I did not know before taking the class. It makes you really appreciate Ag more. Thank you Dr. Rathmann.

(Ryan Rathmann) The class and instructor was as expected
(Ryan Rathmann) Dr. Rathmann is a very knowledgeable teacher that is personable with his students. I would recommend his classes to anyone.
(Ryan Rathmann) Dr. Rathmann is very passionate about the materials he covered in this class. However, I noticed that he does not respond to emails very frequently, even when the matter is important.
(Ryan Rathmann) great class
(Ryan Rathmann) great class
(Ryan Rathmann) Great learning experience!
(Ryan Rathmann) Dr. Rathmann is a very charismatic and fun teacher, he makes lectures more enjoyable with his jokes and he makes an effort to talk with students during lecture and asking them questions. I have had him before for several classes and he was just as good this semester as then, I enjoyed having him teach me and the labs were very interesting.
(Ryan Rathmann) The instructor is funny and efficient at talking about cows and making all their statistics make sense.
(Ryan Rathmann) he funny
(Ryan Rathmann) I thought that they did a great job in this class.
(Ryan Rathmann) Love this class
(Ryan Rathmann) Enjoyed this course and the professor made the course enjoyable through the labs
(Ryan Rathmann) Very interactive and engaging with students, maintains class attention throughout lectures w/ his funny dad jokes, detailed and thorough review sessions, and a very exciting and interactive lab. I had an absolute blast getting to know Dr. Rathmann (along with his wife and kids) and loved learning from him. I can honestly say he is my favorite professor thus far in my college career and it will probably remain that way. He truly cares about each and every one of his students and wants to see them succeed in every way possible. Give this man a raise.
(Ryan Rathmann) I appreciate that this class was content filled as we actually got to a deeper level where I was able to gain valuable new knowledge.
(Ryan Rathmann) Dr. Rathmann is a good professor. He can be difficult to follow during lectures and is sometimes disorganized in his delivery of information. The book associated with this course is a great tool and helps prepare for exams. Labs are very interactive and that is where I learned the most.
(Ryan Rathmann) Although I learned a lot from this course, the majority of it was taught by our TAs. I also never got responses when I emailed either professor.
(Ryan Rathmann) I enjoyed the class, but there were times when it felt like some topics were not explained super well or were made more complicated than they needed to be.
(Ryan Rathmann) Professor made it a very fun learning environment.
(Ryan Rathmann) I thought I knew some things about livestock and judging livestock but this class showed me that I knew nothing compared to what we have learned!
(Ryan Rathmann) Great course, learned a lot
(Ryan Rathmann) I have never had a professor that I enjoy to listen give a lecture until talking a course with Dr. Rathmann a year ago. Since then, if I'm signing up for a course and I see his name as an option, that will always be my first choice. I always feel like I'm actually learning something when I attend one of his labs or lectures. His instruction is essential to the development of the next generation, whose decisions will directly affect the future of agriculture.
(Ryan Rathmann) Dr. Rathmann is the OG. Always dropping logic on us. His expertise in livestock has well prepped me for future careers with animals.
(Ryan Rathmann) Dr. Rathmann teaches in a very fun way that makes you want to come to class and learn.
(Ryan Rathmann) My major is complete different from livestock not sure why I need to take this class but it was extremely difficult

(Ryan Rathmann) He was very helpful and helped me learn efficiently
(Ryan Rathmann) I really enjoyed taking this class!
(Ryan Rathmann) I appreciated that he helped when he could and explained something if you didn't get it the first time
(Ryan Rathmann) I enjoyed learning about livestock in this class. I do wish we had more time to focus on livestock instead of just a couple weeks.
(Ryan Rathmann) Very confusing, not structured very well.
(Ryan Rathmann) Dr. Rathman and Dr. Miller did not teach the class their TAs taught the majority of the class. Neither of them responded to their emails and Dr. Rathman gave the final on a class day with no warning of when the final was going to be. I was not there and could not be there due to a doctor's appointment that day. However, if I had known that the final was going to be that day I would have scheduled it for a different day. I have not been able to get ahold of Dr. Rathman to reschedule it or figure out what to do instead because he does not respond to his emails.
(Ryan Rathmann) Professor Rathmann did an excellent job of making the learning experience fun and engaging. He encouraged hands on learning and made sure we knew what we should be looking for.
(Ryan Rathmann) I enjoyed learning about livestock and meat judging.
(Ryan Rathmann) Na
(Ryan Rathmann) The class was very informative, enjoyable, and engaging.
(Ryan Rathmann) Great class great professor
(Ryan Rathmann) I really enjoyed Ryan's class this semester.
(Ryan Rathmann) na
(Ryan Rathmann) NA
(Ryan Rathmann) He is very knowledgeable and the course is well developed.
(Ryan Rathmann) Dr. Rathmann is the best there is. He does an excellent job explaining things so students understand them even if they don't have a livestock background.
(Ryan Rathmann) Judging as a whole is subjective and it is often difficult to figure out what Dr. Rathmann is looking for. The livestock and meat industries are constantly changing but the TAs and Dr. Rathmann will give you updated notes and information but this course is overall a fun and unique experience.
(Ryan Rathmann) Loved this course! Great teacher
(Ryan Rathmann) Labs were very hands on. helpful for the real world.
(Ryan Rathmann) Absolutely incredible class!
(Ryan Rathmann) Very fun class. Lots of hand on opportunities as well as outside of class opportunities.
(Ryan Rathmann) I learned a lot
(Ryan Rathmann) Doesn't post powerpoint slides to study.
(Ryan Rathmann) Did a good job explaining new concepts. Wish the class was more consistent on pace of learning.
(Ryan Rathmann) This class allowed me to learn really hands on and the professor was ready to help us in any way.
(Ryan Rathmann) Life skills, great teacher.

(Ryan Rathmann) Course was great! Overall I felt I learned a ton, however, extremely unorganized and lacked communication
(Ryan Rathmann) While other things were harder for me to remember than other, this was a valuable class to me.
(Ryan Rathmann) Livestock is great
(Ryan Rathmann) We never knew what we were going to learn, or who was going to be our instructor that day. I wish we would have had an outlined schedule of the topics and instructors. Overall good professors and I am content with their performance.
(Ryan Rathmann) I appreciate him working with me and does very good with helping out people in lab and allows us to ask as many questions as possible.
(Ryan Rathmann) Dr. Rathman was extremely helpful and engaging and I cannot wait to take another one of his courses. He gave students an in-depth knowledge of livestock judging in a fun and exciting manner. He genuinely made sure that everyone understood what was expected of them and that they fully understood the ideas and concepts he wanted them to grasp.
(Ryan Rathmann) He made genetics entertaining and exciting. Genetics is a hard class to teach and concepts to grasp, Rathmann kept us engaged and always made sure to go back to concepts and reexplain them if students were having trouble understanding them. Rathmann is by far my favorite professor at Texas Tech and he does a great job of taking complex and sometimes boring topics and making them exciting and engaging.
(Ryan Rathmann) Very enjoyable
(Ryan Rathmann) Was more concerned about us actually learning which was good, I liked being hands on most of the time that helped too
(Ryan Rathmann) n/a
(Ryan Rathmann) I really enjoyed taking the course and learned quite a few new things. Having the hands on experience really helped with the learning experience.
(Ryan Rathmann) Loved everything that I learned from this class.
(Ryan Rathmann) I enjoyed the discussion classes and getting to research and discuss with other people.
(Ryan Rathmann) I didn't really understand.
(Ryan Rathmann) very passionate teachers
(Ryan Rathmann) he was a great professor.
(Ryan Rathmann) The teachers were never actually teaching the class, it was always just a TA or his graduate students teaching
(Ryan Rathmann) well done
(Ryan Rathmann) Mr. Rathmann was very fun to listen to and very thorough in his lectures, he also had great communication through emails.
(Ryan Rathmann) Background information required but not taught. A little all over the place, expected to know information that we had no way of knowing, but a good learning experience overall.
(Ryan Rathmann) Great professor!
(Ryan Rathmann) Professor Rathmann was a great teacher and I look forward to having him next fall in Genetics!
(Ryan Rathmann) The instructor did very well.
(Ryan Rathmann) Very good instructor
(Ryan Rathmann) This course is a great way to get out of the classroom and get involved with livestock.
