FAVORITE ARTICLE

Dhakai, C., Lange, K., Parajulee, M.N., & Segarra, E. (2019). Dynamic optimization of nitrogen in plateau cotton yield functions with nitrogen carryover considerations. *Journal of Agricultural and Applied Economics* 51(2), 1-17. <https://doi:10.1017/aae.2019.6>

My very first graduate student at TTU, Chandra Dhakai, is the first author, and this paper was produced out of his master's thesis. He has since gone on to receive his Ph.D. in Agricultural Economics from the University of Georgia. The article was awarded the JAAE Outstanding Journal Article award for 2019, awarded by the Southern Agricultural Economics Association.

WHAT MAKES THE DAVIS COLLEGE GREAT?

The Davis College is great because it is truly a family. The camaraderie and support at all levels throughout the college is amazing, and I love being able to work with such wonderful colleagues every day!
