#### **Information on the External Reviewers**

A sample of the letter or email that was sent out to solicit external reviewers and provides them instruction on what to review should precede the "Information on the External Reviewers" page.

Each dossier should include 8 external letters. (Be sure and include in the dossier all solicited external letters).

A majority of letters should be from peer or peer-aspirant institutions.

Every candidate up for tenure and promotion will provide the chair (or the department's tenure and promotion committee) with a list of possible external reviewers. Up to 3 individuals from that list can serve as an external reviewer. Those external reviewers **can** have a conflict of interest.\*

Five of the eight external reviewers will be selected from a list of potential external reviewers provided by the chair (or the department's tenure and promotion committee). These external reviewers **cannot** have a conflict of interest.\*

\*A <u>conflict of interest</u> exists if it has been 4 years or less since the external reviewer and the individual up for tenure and/or promotion collaborated on a publication, a grant, or worked together as co-editors. A dissertation advisor cannot serve as an external reviewer.

#### For each external reviewer, include a brief biosketch that explains:

- 1. Relationship to candidate, if any (e.g. collaborator, coauthor, former supervisor, student).
- 2. The individual's qualifications to judge the candidate's work.
- 3. When there is a preponderance of letters from either women or men, consider stating whether the candidate's field is gendered in order to clarify that the distribution is representative or not.
- 4. And consider how to clarify when the candidate's area of study or performance is so new or recently emerging that most letter writers claim a lack of expertise.

#### **Example:**

Maggie Smith, Professor, Ohio State University (No Relationship to the Candidate—if there is a relationship be sure and explain it). Dr. Smith is an expert in the field of U.S. social history with a particular emphasis on workplace interactions and gender. She has published widely on the postwar period and has edited an important series of books for UNC Press.
