

**Texas Tech University
College of Arts and Sciences Committee on Academic Programs
(ASCAP)**

**Agenda
Meeting of January 10, 2005**

The seventh scheduled meeting of the Arts and Sciences Committee on Academic Programs convened at 3:00 pm. On Monday, January 10, 2005 in Holden Hall 129. Members present were Geryk, Holaday, von Ende, Troyansky, Weinberg, and Stewart (Chair). Presenters in attendance were Drs. Ruth Maki, Richard McGlynn, and Gregory Mumma (Psychology).

ASCAP voted to recommend approval of the following two proposals:

| | |
|--|--|
| <i>Change Prerequisite and Description</i> | PSY 4336 Research in Personality and Social Psychology Minor corrections/revisions were made to the course approval form at the meeting, necessitating no further action. |
| <i>Add New Course</i> | PSY 5367 Analysis of Single-Subject and Time Ordered Designs Minor corrections/revisions were made to the course approval form at the meeting, but ASCAP requests that the proposed shortened title be reconsidered, to provide one with more clarity and usability. The proposal will be held pending a response from the department. |

In other business, committee briefly discussed its upcoming visit (January 31) with the *Phi Beta Kappa* site visit team. A couple of members will be unable to participate in that visit due to schedule conflicts, but it appears a quorum will be present.

The meeting adjourned at 3:35 pm.

The next scheduled meeting of ASCAP is January 24, 2005, for proposals reaching committee by January 17.

NOTE: Course and curriculum proposals targeted for appearance in the print version of the 2005-2006 University Catalog will need to be heard and cleared through ASCAP no later than the February 14 meeting for graduate proposals, and the March 7 meeting for undergraduate proposals. Items from proposals approved thereafter may still appear in the electronic (HTML) version of the catalog.
