

ASTRONOMY MINOR DEGREE PLAN

Name: ______ R#: _____

TTU Email: _____ Catalog: 2017-2018 or later

Courses for the Astronomy Minor (21 credit hours total)

- 9 credit hours must be at the 3000 or higher level
- Recommended Sequence
 - PHYS 1408 Principles of Physics I
 - PHYS 2401 Principles of Physics II
 - PHYS 3301 Principles of Physics IV -AND COREQUISITE-PHYS 3201 Modern Physics Lab and Data Analysis

• Electives

- o in addition to the recommended sequence, at least 8 hours selected from the following with at least 4 at the 3000 level or higher:
 - ASTR 2401, ASTR 3300, ASTR 4301, ASTR 4302, ASTR 4305, PHYS 3000 in Astronomy, PHYS 4350
 - ▶ under some circumstances and with approval from the undergraduate advisor, courses in engineering, geosciences, or mathematics with significant astronomy content may be taken

Students must receive a grade of C or better in all courses applied towards the minor.

Please pay attention to prerequisites when choosing and registering for physics courses.

Credit Hour Requirements for the Astronomy Minor:

- > 21 credit hours total
- ➢ 9 credit hours at the 3000 level or above

Recommended Sequence

PHYS 1408 - Principles of Physics I. 4 Credit Hours. Prerequisite: MATH 1451. Calculusbased introductory physics covering mechanics, kinematics, energy, momentum, and thermodynamics. (Honors section offered) Partially fulfills core Life and Physical Sciences requirement. [all]

PHYS 2401 - Principles of Physics II. 4 Credit Hours. Prerequisites: PHYS 1408 and MATH 1452. Calculus-based introductory physics covering electric and magnetic fields, electromagnetic waves, and optics. (Honors section offered) Partially fulfills core Life and Physical Sciences requirement. [all]

PHYS 3301 - Principles of Physics IV: Introduction to Quantum Physics. 3 Credit Hours. Prerequisites: PHYS 1408 and MATH 2450. Corequisite: PHYS 3201. Failure of classical physics in the microscopic realm, development and fundamentals of quantum theory, applications to atoms, molecules, solids, nuclei, and particles. [Fall & Spring]

PHYS 3201 - Modern Physics Lab and Data Analysis. 2 Credit Hours. Corequisite: PHYS 3301. Laboratory experiments and accompanying lectures designed to illustrate the basis of quantum physics and proper techniques for data acquisition, analysis, and determination of uncertainties. [Fall & Spring]

Electives

In addition to the recommended sequence, choose 8 credit hours with at least 4 hours at the 3000 level or above from the following.

ASTR 2401 - Observational Astronomy. 4 Credit Hours. Prerequisite: ASTR 1400 or ASTR 1401 or instructor consent. Designed for anyone interested in learning the use of an optical telescope, both visually and for imaging. [Fall]

ASTR 3300. Special Topics in Astrophysics. 3 Credit Hours. C- or better in ASTR 2401, PHYS 2302, PHYS 3301, and PHYS 4325 or MATH 3350 or MATH 3354. (*Some prerequisites may be waived by instructor on a case by case basis.*) Topics in radio astronomy, X-ray astronomy, gravitational wave astronomy, compact objects, accretion, stellar explosions and others. May be repeated in different areas. [Spring]

ASTR 4301 - Astrophysics I. 3 Credit Hours. Prerequisite: PHYS 3301. Introduction to the tools of astronomy, stellar properties, stellar structure, and stellar evolution. [Spring]

ASTR 4302 - Astrophysics II. 3 Credit Hours. Prerequisite: PHYS 3301. Structure, formation and evolution of galaxies; cosmology. [Fall]

ASTR 4305 - Radiative Processes in Astrophysics. 3 Credit Hours. Prerequisites: C or better in PHYS 3305 and PHYS 4307 (the latter may be taken concurrently). A survey of the physical processes related to the production and propagation of radiation in astrophysical phenomena, including thermal and non-thermal radiation, and atomic transitions. [Fall]

PHYS 3000 - Undergraduate Research. 1-6 Credit Hours. Prerequisite: Permission of the instructor. Individual and/or group research projects in basic or applied physics, under the guidance of a faculty member. [all] (Student must work on an astrophysics project.)

PHYS 4350 – **Relativity.** 3 Credit Hours. Prerequisites: C- or better in PHYS 3305 and PHYS 4304 (the latter may be taken concurrently). Introduction to spacetime, differential geometry, special and general relativity; with applications to black holes, cosmology, and gravitational waves. [Spring]

Under some circumstances and with approval from the undergraduate advisor, courses in engineering, geosciences, or mathematics with significant astronomy content may be taken as electives for the Astronomy minor.

Revised 1/14/2020.
