

BS/MS Chemical Engineering (thesis/non-thesis options) [153 hrs]

The following plan contains all the general education, foundational engineering and core chemical engineering requirements for your BS Chemical Engineering degree (129 credit hours), and the additional requirements for the MS Chemical Engineering degree (30 hrs). Up to 6 hours of graduate classes (taken in the 4th year) will count to fulfill your CHE undergraduate elective requirements. See additional general education requirements (POLS, HIST) below the table, which have more flexibility in terms of which semester you can take them in. Always be sure to consult with the academic advisor about completion of all degree plan requirements.

NOTES:

- General education requirements (15hrs) include: POLS-1301, POLS 2306, HIST-2300, HIST-3xxx, Creative Arts Elective (3hrs)
- The courses in bold are all the core Chemical Engineering courses that are only guaranteed to be offered in the semesters shown.
- The description for each course can be found by typing the course code into the search box on the main TTU catalog here: <https://catalog.ttu.edu/>
- 3 hours of seminar (CHE-7121) are required.
- Students should speak to the academic advisor for graduate programs for elective choices, and seek approval for taking electives from another department.
- *Graduate core classes may be taken in a different sequence than indicated above; however, CHE-5310 and CHE-5321 are offered in fall only, CHE-5312 and CHE 5343 are offered in spring only.
- ** Students taking the thesis option have the option to take CHE-5000 (research) in lieu of a lecture-based elective. It is recommended to take that course in the spring semester of fourth year.
- *** Students taking the non-thesis option will take 6 credit hours of research (CHE-5000) in place of CHE-6000.
