

VENUS96C is copyrighted and licensed. There are no fees when this software package is obtained from the Texas Tech University software distribution site.

Conditions for distributing the software:

1. No user or site will redistribute the source code or executable code to a third party in original or modified form without written permission of the principle investigator (William L. Hase) except as explicitly permitted by the paragraph below. The licensee has no ownership rights in the VENUS96C software or in any copyrights for the VENUS96C software or documentation through this license.
2. A user license entitles the licensee (a person) and his/her research group and collaborators to use the program and share the source or executable code within a single research group. An installation license enables the licensee (company, organization, or computing center) to install the program and allow access to the executable code to any number of users at that company, organization, or computing center, respectively.
3. Publications resulting from using VENUS96C will reference the program. The recommended citation is: W.L. Hase, R.J. Duchovic, X. Hu, A. Komornicki, K.F. Lim, D.-h. Lu, G.H. Peslherbe, K.N. Swamy, S.R. Vande, A. Varandas, H. Wang and R.J. Wolf, VENUS96C, Texas Tech University, Lubbock, TX 2005.
4. No guarantee is made that the program is bug-free or suitable for specific applications, and no liability is accepted for any limitation in the mathematical methods and algorithms used within the program.
5. No consulting or maintenance services are guaranteed or implied.
6. For VENUS96C, the same license applies to both non-profit and commercial users, and license fees are waived for both.

Type of license:	User License	Installation License	
Type of institution:	Academic	Government	Industrial
