

2020 O.W.L. Award Winner

Dr. Celine Godard-Coddling, Associate Chair, Professor of Biochemical and Mechanistic Toxicology & Endangered Species Toxicology
celine.godard@ttu.edu

Biography

Dr. Godard-Coddling's research interests focus on mechanistic toxicology, endangered wildlife ecotoxicology and conservation, endocrinology and biomarkers. received her Master's in Microbiology from Clemson University, South Carolina in 1994 and her Diplome D'Ingénieurs from ENITA-Dijon in France also in 1994. She received her Ph.D. in Environmental Toxicology in 2000 from Texas Tech University. Her Ph.D. research focused on the identification and characterization of novel cytochrome P450 1 genes in marine vertebrates (fish and cetaceans) and was conducted at the Woods Hole Oceanographic Institution (WHOI) from 1995 until 2000. During her post-doctoral appointments and from 2000 to 2005, Dr. Godard-Coddling served as Chief Scientist for the toxicology program of a worldwide sperm whale research cruise sponsored by Ocean Alliance. Her involvement in this program was featured in the news section of Science (2004, 2005) and on the Discovery Channel (2004).
