CareerShift

What is CareerShift?

CareerShift is an online job search website that allows job seekers to navigate the job market to find career opportunities. While Job Grid hosts postings specifically for Texas Tech engineering students and alumni, CareerShift pulls postings and company contacts from all over the web.

Getting Started:

Texas Tech University gives access to this site by using a ttu.edu email address. To create an account, go to https://www.careershift.com/?sc=ttu.

Once you’ve created an account, you’ll be directed to the CareerShift homepage.

You will primarily use the Jobs and Contacts tabs in CareerShift.

- **Jobs**: The Jobs tab will enable you to search postings from all over the web using keyword searches and other filters.
  - Once you’ve found jobs you are interested in, start applying!

- **Contacts**: The Contacts tab will enable you to search for contacts at companies all over the world. Start by searching for Texas Tech alumni using “Texas Tech” in quotes. If you can’t find alumni, try to find engineers with titles that align with your interests.
  - Once you’ve found contacts at your target companies, send them a professional introduction note with your resume attached. It is typically best to ask for advice or information rather than ask directly for a job.

For questions related to CareerShift access, email careercenter@ttu.edu.
