Basics of LinkedIn

What is LinkedIn?
LinkedIn is a free social networking site for career development and professional use. LinkedIn can help you get noticed by employers, make and keep professional connections, and ultimately lead to job opportunities.

STEP ONE: Create and Fill Out Your Profile
- **Profile Picture**: This does not have to be a professional headshot, but you want a head and shoulders photograph of yourself looking professional.
- **Appropriate Headline**: This is usually a variation of *Job Title* at *Company* to describe your situation.
  - Examples: Senior Mechanical Engineering Student at Texas Tech, Computer Science Student Seeking Internship, X Intern at Y Company, Incoming X Engineer at Y Company
- **Thoughtful Summary**: 1-2 short paragraphs describing your experience, qualifications, and goals. This is like a general elevator pitch and should explain your goals.
  - Typical questions to answer and tie together: What are you doing now? What have you done in the past? What do you want to do in the future?
- **Experience**: Fill this out like a resume using strong verbs, keywords, and stats. You can include project and work experience here.
  - Always have a current job listed (even if that is Full-Time Student or Recent Graduate)
- **Education**: List your involvement and leadership with engineering-related activities listed first
- **Skills**: List most relevant technical skills before any soft skills
- **Accomplishments**: Add projects, test scores, scholarships, organizations, awards, etc. as appropriate

Additional Profile Tips
- Customize your profile URL for your resume under “Edit public profile & URL”
- Add multimedia like pictures to show off your projects/work experience
  - If adding a resume, redact info you don’t want public like your address and phone number
- Let recruiters know you’re open to new opportunities via your profile

STEP TWO: Using LinkedIn
- Search for and connect with friends, faculty/staff, recruiters, and anyone you may already know first
- Find new connections at companies by searching “*Company Name* ‘Texas Tech’” to find alumni and “*Company Name* Recruiter” to find HR professionals. Rather than paying for LinkedIn Premium, send a thoughtful, personalized message with your connection request to contact the individual.
- Stay in touch via messaging and liking/commenting on posts from connections and companies
- Search and apply for jobs via the jobs tab

Caution
- All content posted on LinkedIn must be professional! Anything you share, comment on, or react to can be seen by your connections and potential employers.
- The default setting on LI is that others are notified when you view their profile. This is designed to help you as you network, but it’s something to keep in mind as you search and view profiles.

REMINDER: Attend a LinkedIn workshop for more information and get your LinkedIn profile critiqued. Contact the EOC at coe.careers@ttu.edu for information on critiques.
