

How to: Connect to TTUnet VPN using GlobalProtect on Windows

Notice

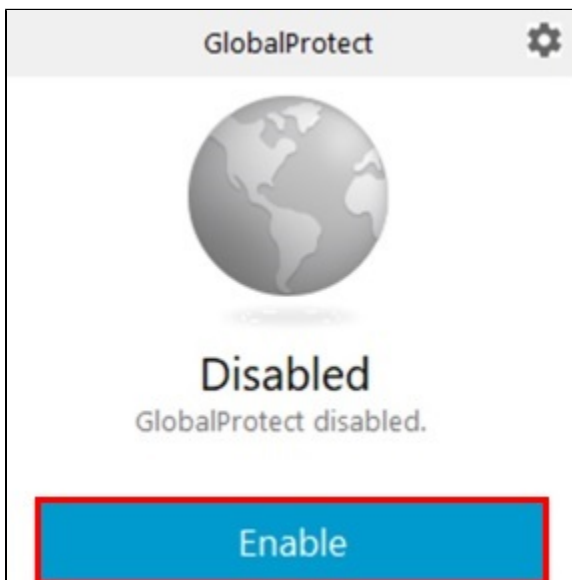

VPN is not necessary for Remote Desktop Connections to Windows PCs from off campus. When using Remote Desktop, simply configure the connection to use TTU's [RDP Gateway](#) **rdp.ttu.edu**. Search askIT for detailed instructions on configuring Microsoft Remote Desktop Connections.

Details

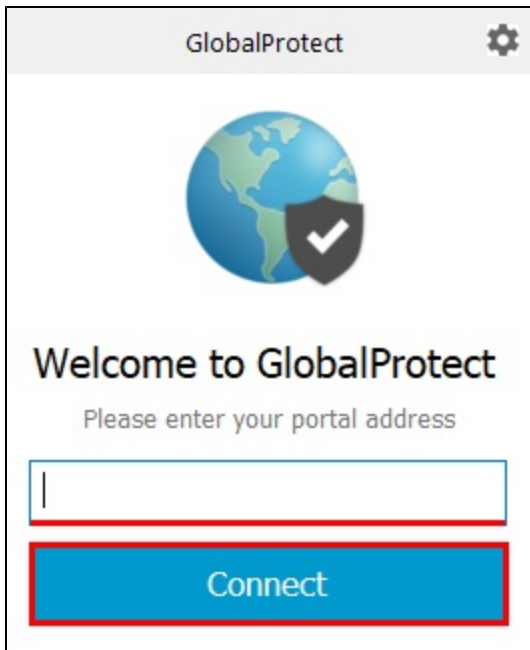

1) Click the "GlobalProtect" icon in the system tray.

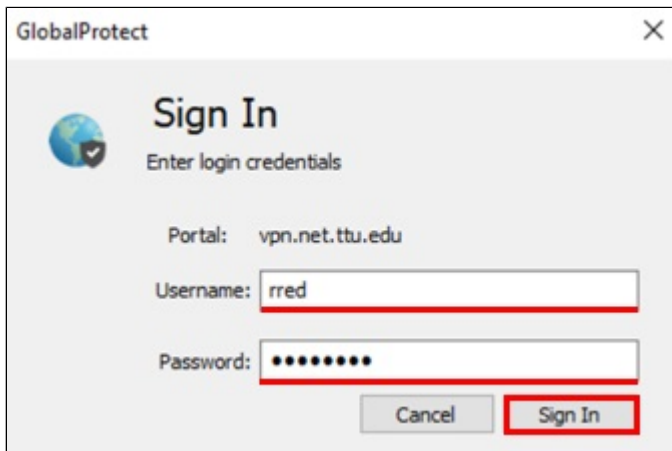

2) If prompted to enable GlobalProject, click **Enable**.

3) For the portal address, type **vpn.ttu.edu**. Then, click **Connect**.

4) Sign in using your eRaider credentials.

OUTCOME

You are now connected to TTUnet VPN using GlobalProtect.
