

Lecturer positions for Computational Thinking course:

Whitacre College of Engineering at Texas Tech University invites applications for two Lecturer positions in Data Science and Computational Thinking. The expected starting date is June 1, 2020. Applicants must have a Masters or a Ph.D. degree in Computer Science or a related engineering discipline. Preference will be given to candidates with experience in Data Science and Python, and a potential for excellence in teaching undergraduate engineering courses. Knowledge of computational thinking is a plus. Successful candidates for this full-time position will be expected to develop and teach the newly proposed Computational Thinking course in the common core freshman engineering curriculum in the College of Engineering.

Applicants must apply at Texas Tech University online job application website at <http://www.depts.ttu.edu/hr/workattexastech/> referencing requisition number 20528BR. The application process requires uploading a detailed CV, a statement of teaching interests and philosophy, and the contact information of at least three references. Applications will be accepted until the position is filled, with those received prior to March 15, 2020, assured full consideration. Candidates must be currently eligible to work in the United States. As an Equal Opportunity/Affirmative Action employer, Texas Tech University is committed to the goal of building a culturally diverse faculty committed to teaching and working in a multicultural environment. We actively encourage applications from all those who contribute, through their research, teaching and/or service, to the diversity and excellence of the academic community at Texas Tech University. The university welcomes applications from minorities, women, protected veterans, persons with disabilities, and dual-career couples.
