Thermo Fisher Scientific Inc. is the world leader in serving science, with annual revenue exceeding $25 billion. Our Mission is to enable our customers to make the world healthier, cleaner and safer. Whether our customers are accelerating life sciences research, solving complex analytical challenges, improving patient diagnostics and therapies or increasing productivity in their laboratories, we are here to support them. Our global team of more than 75,000 colleagues delivers an unrivaled combination of innovative technologies, purchasing convenience and pharmaceutical services through our industry-leading brands, including Thermo Scientific, Applied Biosystems, Invitrogen, Fisher Scientific, Unity Lab Services and Patheon.

George DeShong grew up in Pennsylvania and obtained a BS in Engineering Science with a minor in Biomedical Engineering from Penn State University in 2015. His first role was at Thermo Fisher Scientific as part of their rotational Operations Leadership Development Program (OLDP), where he held positions in manufacturing engineering, production supervision, R&D procurement, and distribution across northern and southern California. Upon completion of the program, he joined the Operations team as a manufacturing manager of life science mass spectrometers and high-performance liquid chromatography devices. Most recently he has shifted to a career in product management and is responsible for molecular diagnostic assays including COVID testing products.
