SUMMER ENGINEERING IN DUBLIN

Meet your Physics II requirement while spending a summer in Dublin, one of the friendliest cities in the world. A relatively small and accessible city, you’ll study at both the CEA Dublin Center and commute to Dublin City University to complete the lab component of the course (all credit is awarded by CEA's School of Record, University of New Haven). With relatively small class sizes, you’ll have ample opportunities to contribute to discussions, ask questions, and get to know your instructor. Active learning opportunities will take you out the classroom to enhance your learning and learn how Physics can be applied in a global context.

**DATES**
May 25–July 6, 2020
Deadline: March 2

**CREDITS**
5–8 credits
PHYS 2401
Physics II And More!
